*Plant Production for Sustainable Society as a Semi-closed Ecosystem* Yoshiaki Kitaya, 2024-06-29 This book introduces the concept of a semi closed ecosystem which is necessary for the social implementation of plant production such as agriculture in harmony with the environment While aiming at achieving a sustainable balance of human activities and environmental protection this book focuses on the material cycle within each semi closed system listed below

- 1 Mangrove forests as semi closed systems in coastal ecosystems
- 2 Environmental control in facility based plant production systems as semi closed systems
- 3 Control of the gaseous environment in the root zone as a semi closed system
- 4 Controlled ecological life support system as a completely closed ecosystem in space
- 5 A sustainable balance of human activities and environmental conservation in urban ecosystems

Developing efficient food production with less environmental loads is an important issue Plant production is vital to human health and welfare especially in urban areas as semi closed ecosystems Producing food efficiently under consideration of environmental protection is necessary with material cycling systems especially in semi closed ecosystems Establishing a resource recycling production system with reduced waste emissions has also become important in agriculture Plant production will play an important role not only in food production Goal 2 in SDGs but also in many other goals This book explains how we must regard plant production as semi closed ecosystems reduce material and energy resource inputs and recycle waste emissions generated during production and consumption processes to solve the various issues Students and researchers studying Agricultural Environmental Engineering Environmental and Ecological Engineering Systems Design for Sustainable Society Environmental Control in Agriculture etc will find this publication a helpful reference
