By the 1890 s the martial influence had spilled over into all walks of life and sparked philosophical debates and wondrous fictions Scientists fantasists and people of all creeds looked up and wondered is there life out there Now more than a century later nations around the world are bombarding Mars with an unprecedented fleet of exploratory vehicles Their journey taking less time than it took Amundsen and Shackleton to reach the poles of Earth these small but hardy robotic emissaries are thrusting their way through the depths of interplanetary space to take up residence in the barren Martian deserts Their goal is to answer one of the oldest questions in mankind s history Is there life out there In this sequel to the best selling first volume the reader is brought up to date with the most recent results from our nearest neighbour Filled with a wealth of facts about the latest fleet of Martian explorers as well as a look at what may be coming next in mankind s most ambitious quest for knowledge Includes DVD V DVD ROM featuring Exclusive interviews with Mars Rover Mission Scientist Steve Squyres Senior Flight Engineer Rob Manning Mission Manager Jim Eriksen the complete Cornell animation of the Rovers created by Maas Digital a NASA animation of a proposed Manned Mars mission the exciting mission control broadcast of the landing of Opportunity in Meridiani Planum and as an added extra special bonus extremely rare video of Dr Wernher von Braun filmed in 1976 at the occasion of his last public speech about Mars exploration **Mars Pathfinder Project** , Describes the Mars Pathfinder mission which will be the second of NASA s low cost planetary Discovery missions and will include a stationary lander and a surface rover The launch date is scheduled for December 5 1996 Provides information on the scientific objectives and the scheduled events of the mission Includes information on the projected landing site entry landing strategy and high resolution views of the landing site Links to other Mars mission sites **Roving Mars** Steven Squyres,2005-08-03 Steve Squyres is the face and voice of NASA s Mars Exploration Rover mission Squyres dreamed up the mission in 1987 saw it through from conception in 1995 to a successful landing in 2004 and serves as the principal scientist of its 400 million payload He has gained a rare inside look at what it took for rovers Spirit and Opportunity to land on the red planet in January 2004 and knows firsthand their findings *The Mars Pathfinder* Price Pritchett,Brian Muirhead,1998 [Marswalk One](#) Shayler David,Andrew Salmon,Michael D. Shayler,2007-07-05 MARSWALK ONE First Steps on a New Planet addresses the question of why we should embark on a journey to Mars documenting what the first human crew will do when they place their feet in the red dust of the planet The book also addresses why we need to carry out these tasks and more importantly what a human crew could achieve that an automated mission could not Understanding the clear benefits of sending a human crew to the surface of Mars and how these benefits can be seen back on Earth is the key to sustained long term public and political support for the programme in terms of cash and commitment The book accepts that the journey will be made but does not specify precisely when Flight time and how to get to and from the planet are discussed briefly to understand why the suggested duration spent at Mars is reasonable The main objective of the work is to look at what science will be done on the surface supported by orbital operations and what hardware and technology will be employed to achieve the mission

objectives This analysis is drawn from previous experiences in manned and unmanned space programmes including Apollo Skylab Salyut Mir Shuttle and ISS Viking Luna Lunokhod and recent Mars missions such as Pathfinder and Global Surveyor In addition new interviews with key personalities involved in planning Martian exploration and discussions about current thoughts on what we need to accomplish on Mars when we get there will provide a lively and thought provoking account that could generate fresh debate When the decision is finally made to go to Mars it will be made in the knowledge that most of the world knows why we are going and what benefits mankind will see for the effort The authors primary objective is to begin this understanding

Managing Martians Donna Shirley, 1999-06-01 Donna Shirley's 35 year career as an aerospace engineer reached a jubilant pinnacle in July 1997 when Sojourner the solar powered self guided microwave oven sized rover was seen exploring the Martian landscape in Pathfinder's spectacular images from the surface of the red planet The event marked a milestone in space but for Donna Shirley the leader of the mostly male team that designed and built Sojourner and the first woman ever to manage a NASA program it marked a triumph of another kind Managing Martians is Shirley's captivating memoir of a life and career spent reaching for the stars From her seemingly outlandish aspiration at age ten to build aircraft to abandoning high school Home Ec in favor of mechanical drawing and at sixteen becoming a licensed pilot Shirley defied expectations from the beginning In a vivid narrative rich with anecdotes and thrilling turning points Shirley recounts the intense battles she waged to defend her vision and the ingenuity and resourcefulness of her committed team Her moment by cliffhanging moment account of Pathfinder's landing and Sojourner's first tentative foray across the sands of Mars brilliantly captures the fulfillment of a lifelong dream as it heralds a brave new era of space exploration
