Anales del Museo Nacional de México, 1882 *De Teotihuacán a los Aztecas* Miguel León Portilla, 1983 *Método para determinar minerales* J. Macpherson, 1870 **Water and Politics** Veronica Herrera, 2023-11-29 Most of the world's population lives in cities in developing countries where access to basic public services such as water electricity and health clinics is either inadequate or sorely missing Water and Politics shows how politicians benefit politically from manipulating public service provision for electoral gain In many young democracies politicians exchange water service for votes or political support rewarding allies or punishing political enemies Surprisingly the political problem of water provision has become more pronounced as water service represents a valuable political currency in resource scarce environments Water and Politics finds that middle class and industrial elites play an important role in generating pressure for public service reforms
