## **Solothe Story Of An African Wild Dog:**

**Solo** Hugo van Lawick,1973      **Solo** Hugo Van Lawick,1973      **Solo; the Story of an African Wild Dog Puppy and Her Pack** Hugo van Lawick,1973      **Jane Goodall** Dale Peterson,2008 Peterson shows clearly and convincingly how truly remarkable Goodall s accomplishments were and how unlikely it is that anyone else could have duplicated them This biography details how Goodall helped set radically new standards and a new intellectual style in the study of animal behavior

*The African Wild Dog* Joshua Ross Ginsberg,David Whyte Macdonald,IUCN/SSC Candid Specialist Group,1997 Over the last 30 years the African wild dog population has declined dramatically Dogs have disappeared from 25 of the 39 countries where they were previously found and only 6 populations are believed to number more than 100 Today it is believed that only between 3 000 5 500 dogs remain in 600 1 000 packs with most to be found in eastern and southern Africa The dramatic reduction in their population is attributed to a number of factors including human population growth and activities deterioration of habitat and contact with domestic dogs and their diseases This Action Plan explores some of the reasons behind their disappearance and provides a number of proposed solutions split into 3 priority areas ranging from habitat management and conservation to monitoring domestic dogs      **Solo** Hugo van Lawick,1973      *Wildlife 2001: Populations* D.R. McCullough,R.H. Barrett,2012-12-06 In 1984 a conference called Wildlife 2000 Modeling habitat relationships of terrestrial vertebrates was held at Stanford Sierra Camp at Fallen Leaf Lake in the Sierra Nevada Mountains of California The conference was well received and the published volume Verner J M L Morrison and C J Ralph editors 1986 Wildlife 2000 modeling habitat relationships of terrestrial vertebrates University of Wisconsin Press Madison Wisconsin USA proved to be a landmark publication that received a book award by The Wildlife Society Wildlife 2001 populations was a followup conference with emphasis on the other major biological field of wildlife conservation and management populations It was held on July 29 31 1991 at the Oakland Airport Hilton Hotel in Oakland California in accordance with our intent that this conference have a much stronger international representation than did Wildlife 2000 The goal of the conference was to bring together an international group of specialists to address the state of the art in wildlife population dynamics and set the agenda for future research and management on the threshold of the 21st century The mix of specialists included workers in theoretical as well as practical aspects of wildlife conservation and management Three general sessions covered methods modelling and conservation of threatened species      **The Black-Tailed Prairie Dog** John L. Hoogland,1995-04 In The Black Tailed Prairie Dog John L Hoogland draws on sixteen years of research at Wind Cave National Park South Dakota in the United States to provide this account of prairie dog social behavior Through comparisons with more than 300 other animal species he offers new insights into basic theory in behavioral ecology and sociobiology Hoogland documents interactions within and among families of prairie dogs to examine the advantages and disadvantages of coloniality By addressing such topics as male and female reproductive success inbreeding kin recognition and infanticide Hoogland offers a broad view of

conflict and cooperation Among his surprising findings is that prairie dog females sometimes suckle and at other times kill the offspring of close kin Enhanced by more than 100 photographs this book illuminates the social organization of a burrowing mammal and raises fundamental questions about current theory As the most detailed long term study of any social rodent The Black Tailed Prairie Dog will interest not only mammalogists and other vertebrate biologists but also students of behavioral and evolutionary ecology

**The Biology of African Savannahs** Bryan Shorrocks, William Bates, 2015 Savannah habitats comprise an ecologically important but ultimately fragile ecosystem They constitute one of the largest biomes on Earth covering almost 20% of the land surface and can be simply described as tropical and subtropical grasslands with scattered bushes and trees Most savannahs occur in Africa although smaller areas can be found in South America India and Australia They form a rich mosaic of diverse ecosystems and this book offers a concise but comprehensive introduction to their ecology biodiversity and conservation The Biology of African Savannahs describes the major plants grasses and trees such as Acacia and animals mainly large mammals that live in this habitat and examines the biological and ecological factors that influence their population size interactions such as predation and community composition Conservation issues such as climate change hunting and conflict between wildlife and domestic animals are also discussed This new edition has been updated throughout with the latest research in the field and contains new technique boxes which introduce readers to some of the analytical methods used to study African savannahs This accessible text is suitable for both senior undergraduate and graduate students taking courses in savannah and tropical ecology as part of a wider ecology and or conservation biology degree programme It will also be of relevance and use to the many professional ecologists and conservation practitioners requiring a concise but authoritative overview of the topic

The Woman That Never Evolved Sarah Blaffer

Hrdy, 1999-12-20 Hrdy argues that evolutionary theorists emphasis on sexual competition among males for access to females overlooks selection pressures on females themselves In this account of what female primates themselves do to secure their own reproductive advantage she demolishes myths about sexually passive coy compliant exclusively nurturing females

The Wild Dogs in Life and Legend Maxwell Riddle, 1979

*The Emperor's Embrace* Jeffrey Masson, 2001-02-28 Jeffrey Moussaieff Masson's marvelous Jane Goodall New York Times bestseller When Elephants Weep made us re evaluate the emotional lives of animals And in his follow up New York Times bestseller Dogs Never Lie About Love Masson reflected with intelligence and originality Los Angeles Times Sunday Book Review on the emotional world of dogs Now in The Emperor's Embrace Masson offers a remarkable look at one of the most fulfilling roles in the animal world fatherhood With fascinating insight impeccable research and captivating writing controversial psychoanalyst Jeffrey Masson a new father himself introduces us to the world's best dads He takes us to such places as Antarctica as he explores how emperor penguin fathers incubate the eggs of their young by carrying them around on their feet for two months nestled beneath a special brood pouch And he tells us how once the babies hatch the fathers snuggle the babies on their feet until the mother returns from her time

at sea feeding them a special milk like substance until her arrival Masson a superb storyteller showcases the extraordinary behavior of outstanding fathers heroes among animals including the wolf and why wolves make good fathers and dogs don't the beaver who encourages his young to cling to his tail as he navigates through ponds the sea horse the only male animal that gives birth to its young the marmoset the South American monkey who carries his babies for the first two years of their lives wherever he goes Masson also examines nature's worst fathers lions langurs bears and humans He shows that when a father does care for his young as with the beaver we immediately look for a biological and not an emotional explanation But Masson demonstrates that for these animals as with humans fatherhood is a profound all encompassing experience Groundbreaking compelling inspirational Masson's unique look at one of nature's most venerable institutions takes us to animal habitats around the world yet always returns to the heart For animal lovers fathers mothers sons and daughters everywhere The Emperor's Embrace is a book that will forever change our perceptions of parenthood and family love

**The Langurs of Abu** Sarah Blaffer Hrdy, 1980 The Langurs of Abu will for many years remain one of the major studies of wild primates both for its observational and theoretical content Alison Jolly Sexual combat is not a monopoly of the human species As Sarah Blaffer Hrdy argues in this spellbinding book war between male and female animals has deep roots in evolutionary history Her account of family life among hanuman langurs the black faced gray monkeys inhabiting much of the Indian subcontinent is written with force wit and at times sorrow Male hanumans in pursuit of genetic success routinely kill babies sired by their competitors The mothers of endangered infants counter with various stratagems to deceive the males and prevent destruction of their own offspring Competition and selfishness are dominant themes of langur society Competition among males for access to females competition among females for access to food resources and disregard by one female for the well being of another's infant these are some very common examples Yet there are also moments of heroic self sacrifice as when an elderly female rushes to defend her troop and its babies from an invading infanticidal male The Langurs of Abu is the first book to analyze behavior of wild primates from the standpoint of both sexes It is also a poignant and sophisticated exploration of primate behavior patterns from a feminist point of view This book may inspire controversy it will certainly be read with pleasure by anyone interested in animal behavior Richly illustrated with photographs seven in full color

**Africana Scandinavica, 1969-1974**, 1996 [Africa's Big Five and Other Wildlife Filmmakers](#) Jean Hartley, 2010 Jean Hartley born in Kenya is acknowledged as being the first to legitimise fixing for wildlife film crews Over the last 25 years she has worked on over a thousand films the vast majority being about wildlife and nature She features five of the great film makers who all started their careers in Kenya in the 1950s legends whom she is proud to call personal friends Watching all of their films and many more she became fascinated by the history of film making in Kenya and determined to find out when it all started In this insightful book she traces the roots of wildlife film back a hundred years drawing on accounts of the original film makers and the professional hunters who guided those early safaris She tracks the changes from those

grainy speeded up silent films through to the technologically perfect High Definition and 3D films that are being made today

**Sociobiology** Edward O. Wilson, 2000-03-24 When this work was first published it started a tumultuous round in the age old nature versus nurture debate It shows how research in human genetics and neuroscience has strengthened the case for biological understanding of human nature Beyond The Dyad Michael Lewis, 2013-11-22 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last decade or two seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity between those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion It is hoped that this series which will bring together research on infant biology developing infant capacities animal models the impact of social cultural and familial forces on development and the distorted products of such forces under certain circumstances will serve these important social and scientific needs

What's Love Got to Do with it: The Evolution of Monogamy Alexander G. Ophir, Nancy G. Solomon, 2020-06-25 Beyond Innocence Jane Goodall, 2002 The second volume of Goodall's autobiography in letters this book covers her life after the publication of *In the Shadow of the Man* the book that made her famous photos **Infanticide by Males and Its Implications** Carel van Schaik, Charles H.
