Mulheron, Albert Brown Lyons, 1884 Changing Human Behaviour Silent Perception, 2024-12-01 Changing Human Behaviour Self Awareness Can human behaviour truly change and if so how Changing Human Behaviour Self Awareness is a philosophical and psychological inquiry into the roots of our actions emotions and thoughts This book questions the effectiveness of our traditional approach to change where problems are met with solutions and solutions are imposed through effort It suggests that this method fails not because we aren't trying hard enough but because the very attempt to escape the problem prevents us from understanding it Through a clear and accessible structure the book reveals How behaviour is the expression of conditioning Why our solutions often intensify the problem How escape sustains disorder by creating false separation What it means to observe a problem without trying to change it How observation itself transforms the knowledge behind the behaviour Why true change does not require concepts goals or strategies This book presents a new approach one based not on control but on direct perception When we understand our conditioning without the filter of abstraction change is not something we do it is something that happens Featuring a visual model of how thought operates and transforms Changing Human Behaviour Self Awareness is ideal for readers interested in inner change consciousness and the nature of psychological freedom **Fourth European Symposium on Computer Aided Process Engineering, ESCAPE 4** F.
