Selected Problems in Physical Chemistry Predrag-Peter Ilich,2010-06-17 The latest authors like the most ancient strove to subordinate the phenomena of nature to the laws of mathematics Isaac Newton 1647 1727 The approach quoted above has been adopted and practiced by many teachers of chemistry Today physical chemistry textbooks are written for science and engineering majors who possess an interest in and aptitude for mathematics No knowledge of chemistry or biology not to mention poetry is required To me this sounds like a well de ned prescription for limiting the readership to a few and carefully selected I think the importance of physical chemistry goes beyond this precept The s ject should bene t both the science and engineering majors and those of us who dare to ask questions about the world around us Numerical mathematics or a way of thinking in mathematical formulas and numbers which we all practice when paying in cash or doing our tax forms is important but should not be used to subordinate the infinitely rich world of physical chemistry
