**Stereotomy** José Calvo-López,2020-08-08 This book deals with the general concepts in stereotomy and its connection with descriptive geometry the social background of its practitioners and theoreticians the general methods and tools of this technology and the specific procedures for the members built in hewn stone including arches squinches stairs and vaults ending with a chapter discussing the open problems in this field Thus it can be used as a reference book in the subject but it can also read as a compelling narrative on this subject one of the main branches of pre industrial technology Construction in hewn stone requires the use of geometrical methods and tools to assure that individual stones either blocks or voussoirs fit with one another and conform to the general shape of walls arches or vaults During the Late Middle Ages and the Renaissance such techniques and instruments were developed empirically by masons and architects Later on learned mathematicians and engineers introduced refinements in these procedures and this branch of knowledge known as stereotomy furnished much material to descriptive geometry a science born with the French Revolution which provided the foundation for projective geometry Villard's Legacy Marie-Thérèse Zenner,2017-05-15 Villard s Legacy is in memory of the celebrated iconoclastic historian Jean Gimpel and represents a fundamental contribution to the new AVISTA series with Ashgate Publishing AVISTA was the brainchild of Gimpel a genius at making the right people meet to advance knowledge through a confluence of ideas drawn equally from the practical and scholarly domains Sixteen papers and a tribute to Gimpel underscore this confluence of technology science and art within medieval culture Appropriately six papers offer new interpretations on aspects of Villard de Honnecourt s portfolio which Gimpel rightly recognized and promoted as a unique

and precious record of pre modern technology and culture This thirteenth century manuscript is now known to a wider public as the earliest testimony left by a master builder in Gothic Europe Of particular significance for the first time in eight centuries a Compagnon du Devoir initiated in the same oral tradition as Villard opens the door to interpreting these remarkable drawings Three papers address previously ignored aspects in the construction of French and English Gothic churches from the engineering of aerodynamic spires to the elastic materials of vault webbing to the social conventions of formal design Three other contributors treat essential elements of a broader technological culture such as the horse harness and the minting of coins as well as the applicability of medieval technology to the modern world in particular third world countries a project pioneered by Gimpel Four papers conclude the volume by treating the sciences of measure and their cultural expression in medieval Europe embracing both the concepts of space and time geometry as a mathematical discipline and the graphic expression of scientific data These interdisciplinary studies are comprehensive in chronological and geographic range extending from the 8th to 15th centuries from Ireland across Europe

Receptacle of the Sacred Jinah Kim, 2013-04-12 In considering medieval illustrated Buddhist manuscripts as sacred objects of cultic innovation *Receptacle of the Sacred* explores how and why the South Asian Buddhist book cult has survived for almost two millennia to the present A book manuscript should be understood as a form of sacred space a temple in microcosm not only imbued with divine presence but also layered with the memories of many generations of users Jinah Kim argues that illustrating a manuscript with Buddhist imagery not only empowered it as a three dimensional sacred object but also made it a suitable tool for the spiritual transformation of medieval Indian practitioners Through a detailed historical analysis of Sanskrit colophons on patronage production and use of illustrated manuscripts she suggests that while Buddhism's disappearance in eastern India was a slow and gradual process the Buddhist book cult played an important role in sustaining its identity In addition by

examining the physical traces left by later Nepalese users and the contemporary ritual use of the book in Nepal Kim shows how human agency was critical in perpetuating and intensifying the potency of a manuscript as a sacred object throughout time *Library and Information Sciences* ERIC Clearinghouse on Library and Information Sciences,1972 **Zealots for Souls** Anne Huijbers,2018-01-22 Zealots for souls draws attention to the impact of the Observant reforms within the Order of Preachers and ambitiously stirs up a broad scope of questions pertaining to the institutional narratives produced within the order between c 1388 and 1517 Through the narratives and the forms of remembrance they fostered the author traces the development of contemporary characteristics of the Dominican self understanding The book shows the fluid boundaries between the genres order chronicles convent chronicles collective biographies highlights the interplay between the narrative and the intended audience addresses the complex question of authorship and assesses the indebtedness of modern printed narratives to older chronicles or biographical collections The book demonstrates that the majority of the extant institutional narratives were written by Observant Dominicans who strived for the internal reform of their order They wrote history to justify their own reform agenda and therefore produced invariably partisan chronicles The work s method is widely applicable and contributes to further reassessment of institutional narratives as sources for the analysis of religious and intellectual transformations Quarterly Bulletin Brockton Public Library (Brockton, Mass.),1909 *Brockton Library Bulletin* ,1899 **Bulletin of the Brooklyn Public Library** Brooklyn Public Library,1914
