Something From Nothing Design Proceeb:

Reframing Human Endeavors Bagoes Wiryomartono, 2023-04-21 This ambitious text is a monograph about human experiences concerning the potentialities capacities and features of humankind from the wholeness of the collective mind body spirit The purpose in reframing human endeavors is for enhanced alignment for livability and sustainability This book departs from the concept and practice of design and technology and argues that most crises that endanger and destruct our ecological livability and sustainability come from our way of thinking and doing with design and technology based on the necessity for control It is the control for overcoming the fear of scarcity starvation and the unknown This book is rather an attempt to find alternate way of decision making thru holistic methods It appeals to researchers working in design sustainability architecture and urban studies

Hermeneutic Philosophy of Science, Van Gogh's Eyes, and God B.E. Babich, 2013-06-29 perceptual essences that can be rendered directly manifest in perception with the help of theoretically structured instruments serving as readable technologies Scientific knowledge should thus be understood as an extension of unassisted perception A perceptual fact has an outer horizon which separates it from the ground on which it appears and an inner horizon composed of a multiplicity of possible perceptual profiles organized by an invariant essence The perceiving subject can bring forth a representative sample of the profiles in question occasionally by making use of certain technological processes which are themselves subject to interpretation in terms of theoretical representations The theoretical entities described in these representations are not simply detected thanks to an inferential operation but rather they are directly perceived It follows from this that the correspondence between the manifest image and the scientific image is not done one to one but by a many to one or one to many application between contextually defined perceptual objects within contexts that are mutually incompatible but complementary This should not however be understood as a form of conventionalism nor as a form of cultural relativism Pre comprehension which guides interpretation imposes strict limits to the descriptive categories which can be used and to the manner in which they can be linked to appropriate empirical objects The author applies his hermeneutic principles to the study of visual perception In fact this question is treated in the first part of the book
