finds an unlikely partner in Cassidy Carter the cynical starlet of his film and the two investigate the sun scorched city where they discover the darker side of all that glitters in Hollywood Something New Under the Sun is an unmissable novel for our present moment a bold exploration of environmental catastrophe in the age of alternative facts and a ghost story not of the past but of the near future The New York Times **Carbon Nation** Bob Johnson, 2017-07-15 Fossil fuels don t simply impact our ability to commute to and from work They condition our sensory lives our erotic experiences and our aesthetics they structure what we assume to be normal and healthy and they prop up a distinctly modern bargain with nature that allows populations and economies to grow wildly beyond the older and more clearly understood limits of the organic economy Carbon Nation ranges across film and literary studies ecology politics journalism and art history to chart the course by which prehistoric carbon calories entered into the American economy and body It reveals how fossil fuels remade our ways of being knowing and sensing in the world while examining how different classes races sexes and conditions learned to embrace and navigate the material manifestations and cultural potential of these new prehistoric carbons The ecological roots of modern America are introduced in the first half of the book where the author shows how fossil fuels revolutionized the nation s material wealth and carrying capacity The book then demonstrates how this eager embrace of fossil fuels went hand in hand with both a deliberate and an unconscious suppression of that dependency across social spatial symbolic and psychic domains In the works of Eugene O Neill Upton Sinclair Sherwood Anderson and Stephen Crane the author reveals how Americans material dependencies on prehistoric carbon were systematically buried within modernist narratives of progress consumption and unbridled growth while in films like Charlie Chaplin's Modern Times and George Stevens's Giant he uncovers cinematic expressions of our own deep seated anxieties about living in a dizzying new world wrought by fossil fuels Any discussion of fossil fuels must go beyond energy policy and technology In Carbon Nation Bob Johnson reminds us that what we take to be natural in the modern world is in fact historical and that our history and culture arise from this relatively recent embrace of the coal mine the stoke hole and the oil derrick State of the World 2015 The Worldwatch Institute, 2015-04-13 We think we understand environmental damage pollution water scarcity a warming world But these problems are just the tip of the iceberg Food insecurity financial assets drained of value and a rapid rise in diseases of animal origin are among the underreported consequences of an unsustainable global system In this volume experts explore these hidden threats along with the central question of how we can develop resilience to these and other shocks in World Literature Margaret Ziolkowski, 2024-04-15 Mega Dams in World Literature reveals the varied effects of large dams on people and their environments as expressed in literary works focusing on the shifting attitudes toward large dams that emerged over the course of the twentieth century Margaret Ziolkowski covers the enthusiasm for large dam construction that took place during the mid twentieth century heyday of mega dams the increasing number of people displaced by dams the troubling environmental effects they incur and the types of destruction and protest to which they may

be subject Using North American Native American Russian Egyptian Indian and Chinese novels and poems Ziolkowski explores the supposed progress that these structures bring The book asks how the human urge to exploit and control waterways has affected our relationships to nature and the environment and argues that the high modernism of the twentieth century along with its preoccupation with development casts the hydroelectric dam as a central symbol of domination over nature and the power of the nation state Beyond examining the exultation of large dams as symbols of progress Mega Dams in World Literature takes a broad international and cultural approach that humanizes and personalizes the major issues associated with large dams through nuanced analyses paying particular attention to issues engendered by high modernism and settler colonialism Both general and specialist readers interested in human environment relationships will enjoy this prescient book Food Power Bryan L. McDonald, 2017 Food Power brings together the history of food agriculture and foreign policy to explore the use of food to promote American national security and national interests during the first three decades of the Cold War Volume 1, Tome I: Kierkegaard and the Bible - The Old Testament Jon Stewart, 2016-12-05 Exploring Kierkegaard's complex use of the Bible the essays in this volume use source critical research and tools ranging from literary criticism to theology and biblical studies to situate Kierkegaard's appropriation of the biblical material in his cultural and intellectual context The contributors seek to identify the possible sources that may have influenced Kierkegaard's understanding and employment of Scripture and to describe the debates about the Bible that may have shaped perhaps indirectly his attitudes toward Scripture They also pay close attention to Kierkegaard's actual hermeneutic practice analyzing the implicit interpretive moves that he makes as well as his more explicit statements about the significance of various biblical passages This close reading of Kierkegaard's texts elucidates the unique and sometimes odd features of his frequent appeals to Scripture This volume in the series devotes one tome to the Old Testament and a second tome to the New Testament Tome I considers the canonically disputed literature of the Apocrypha Although Kierkegaard certainly cited the Old Testament much less frequently than he did the New passages and themes from the Old Testament do occupy a position of startling importance in his writings Old Testament characters such as Abraham and Job often play crucial and even decisive roles in his texts Snatches of Old Testament wisdom figure prominently in his edifying literature The vocabulary and cadences of the Psalms saturate his expression of the range of human passions from joy to despair The essays in this first tome seek to elucidate the crucial rhetorical uses to which he put key passages from the Old Testament the sources that influenced him to do this and his reasons for doing so The Turning Points of Environmental History Frank Uekötter, 2010-11-21 From the time when humans first learned to harness fire cultivate crops and domesticate livestock they have altered their environment as a means of survival In the modern era however natural resources have been devoured and defiled in the wake of a consumerism that goes beyond mere subsistence In this volume an international group of environmental historians documents the significant ways in which humans have impacted their surroundings throughout

history John McNeill introduces the collection with an overarching account of the history of human environmental impact Other contributors explore the use and abuse of the earth's land in the development of agriculture commercial forestry and in the battle against desertification in arid and semi arid regions Cities which first appeared some 5 500 years ago have posed their own unique environmental challenges including dilemmas of solid waste disposal sewerage disease pollution and sustainable food and water supplies The rise of nation states brought environmental legislation which often meant selling off natural resources through eminent domain Perhaps the most damaging environmental event in history resulted from a perfect storm of effects cheap fossil fuels especially petroleum and the rapid rise of personal incomes during the 1950s brought an exponential increase in energy consumption and unforseen levels of greenhouse gasses to the earth's atmosphere By the 1970s the deterioration of air land and water due to industrialization population growth and consumerism led to the birth of the environmental and ecological movements Overall the volume points to the ability and responsibility of humans to reverse the course of detrimental trends and to achieve environmental sustainability for existing and future populations
