

# NEEDS VS WANTS

## NEEDS

**Basic needs** refer to the requirements that are essential for an individual to survive and function optimally. Without satisfying these needs, an individual's health, safety, or well-being may be compromised. **Growth needs** are the things that are essential to achieve goals, such as self-optimization and mental health.

## WANTS

**Wants** are desires or aspirations that individuals seek to attain or possess, often driven by personal preferences or societal influences. Unlike needs, wants are not crucial for achieving our goals but add comfort, pleasure, or luxury to one's life. They are often influenced by cultural, social, or individual tastes and can change over time.
