It Is Nothing, Yet, It Is Everything. It Is Eternal.* Richard A. Frank, 2016-04-27 *Essays on Balance* is a collection of thirty three essays that explores possible answers to that one guiding question Why is the world the way it is Split into two parts it explores first the most fundamental questions about the workings of nature energy entropy time space change life and the universe and it investigates them in a way that both laypersons and experts will enjoy reading

In the second part considerations about human nature are explored as they relate to the self the collective self virtue and vice religion politics free will good and evil and the concept of God Approaching these considerations from an innovative worldview it explains both nature and human nature as an indissoluble whole bound by the universal laws of balance Out There Somewhere Jane Edith Park,2007-06-01 As an adopted child I soon realized my life was good I didn't feel abandoned by the birth parents I never knew I was just a few days old when my adoptive parents took me to my new home a small town in Ohio When I was quite young my adoptive mother told me that my biological mother was 13 years old when I was born one of the few facts she knew Who were these people Did I look like them Do I have brothers and sisters After I married and had children I questioned what should my two children know about my side of their biological heritage This is the story of my incredible search and the amazing answers I found to very old questions Little did I know that due to fictitious information on my birth certificate and many dead ends it would take over 11 years before I would meet my birth parents and 10 siblings As you will read it was the slightest event that brought us together Should my story give another searcher the ambition to never lose faith in searching even when much time passes with no answers then my purpose for writing will be fulfilled Book Cover Photo My picture of the Urambamba River Valley near Machu Picchu Peru a place I always knew I must visit To visit her website go to www.ihavefoundthem.net Something Lethal in the Garden Basil Eleftheriou,2007-09 Upon retirement Professor Dean returned to his childhood roots at Salsbury Harbor Maine on Mt Desert Island Maine His three children appeared well settled although people wondered where they had found the money for such a good living since professors don't make good salaries when active or when retired When he died suddenly the coroner pronounced his death from natural causes But a young ambitious detective thought otherwise and pursued his hunches in vain until he found a young coroner trainee who gave him ideas about death due to genetic linkages Finding courage in such medical keys the detective discovers Professor Dean's genetic traits which enabled the killer to dispense with the good old prof without suspicion But with the help of the coroner trainee the detective solves the death and its cause as well as solves a crime of robbery that involved a plane crash and lots of money laundered from drug running Perspectives on 9/11 United States.
