Chinese Masculinities in a Globalizing World Kam Louie,2014-11-20 This book explores how the traditional ideal of Chinese manhood the wen cultural attainment and wu martial prowess dyad has been transformed by the increasing

integration of China in the international scene It discusses how increased travel and contact between China and the West are having a profound impact showing how increased interchange with Western men for whom wu is a more significant ideal has shifted the balance in the classic Chinese dichotomy and how the huge emphasis on wealth creation in contemporary China has changed the notion of wen itself to include business management skills and monetary power The book also considers the implications of Chinese soft power outside China for the reconfigurations in masculinity ideals in the global setting The rising significance of Chinese culture enables Chinese cultural norms including ideals of manhood to be increasingly integrated in the international sphere and to become hybridised The book also examines the impact of the Japanese and Korean waves on popular conceptions of desirable manhood in China Overall it demonstrates that social constructions of Chinese masculinity have changed more fundamentally and become more global in the last three decades than any other time in the last three thousand years
