**American Republic** Jeffrey H. Morrison, 2003-01-27 Jeffrey H. Morrison offers readers the first comprehensive look at the political thought and career of John Witherspoon, a Scottish Presbyterian minister and one of America's most influential and overlooked founding fathers. Witherspoon was an active member of the Continental Congress and was the only clergyman both to sign the Declaration of Independence and to ratify the federal Constitution. During his tenure as president of the College of New Jersey at Princeton, Witherspoon became a mentor to James Madison and influenced many leaders and thinkers of the founding period. He was uniquely positioned at the crossroads of politics, religion, and education during the crucial first decades of the new republic. Morrison locates Witherspoon in the context of early American political thought and charts the various influences on his thinking. This impressive work of scholarship offers a broad treatment of Witherspoon's constitutionalism, including his contributions to the mediating institutions of religion and education and to political institutions from the colonial through the early federal periods. This book will be appreciated by anyone with an interest in American political history and thought and in the relation of religion to American politics. Words of the Founding Fathers Steve Coffman, 2012-08-02 This collection gathers quotations, passages, and documents attributed to America's six essential founders. Topics include liberty, religion, revolution, republican government, the constitution, education, commerce, class war, and peace, and the disenfranchised, slaves, Native Americans, and women. Each quotation is sourced and quoted fully enough for the reader to discern its historical and philosophical context. *Protest in the Long Eighteenth Century* Yvonne Fuentes, Mark R. Malin, 2021-05-18 This edited collection of essays focuses on the topic of protest during the Enlightenment of the long eighteenth century, roughly 1670-1833. Resistance in the eighteenth century was extensive, and the act of protest to foment meaningful societal change took on many forms, from the circulation of ballads, swearing of oaths, to riots and work stoppages, or the composition of essays, novels, posters, caricatures, political cartoons, as well as theater and opera. The contributors to this volume examine the causes of protest as well as the broad ways in which common artifacts, such as poles, trees, drums, conchs, and songs, acted as flashpoints for conflict and vehicles of protest. Rather than approaching the topic with strict geographical, temporal, and structural limitations, this book focuses on the time period from an international perspective and an interdisciplinary scope. Because of its wide scope, this book is an important contribution to the subject that will be of interest to both faculty and students of the history of protest, resistance, and the changes that these forces bring, as it also reminds us that the protests of today are rooted in historical resistances of the past. *The New England Historical and Genealogical Register*, 1913 Beginning in 1924, Proceedings are incorporated into the April no.
