Sonatas Bwv10011006:

Bach: Three Sonatas and Three Partitas for Solo Violin Johann Sebastian Bach, Lawrence Golan, 2010-10-07 Dr Lawrence Golan's edition of Bach's masterpieces for solo violin combines the authenticity and accuracy of a Scholarly Urtext Edition with the practicality and helpfulness of a Performing Edition. A facsimile of Bach's autograph manuscript was used in the preparation of this edition and the composer's intentions have been preserved to the last detail of particular note is the fact that all stems have been beamed together as they appear in the autograph manuscript. This is of great importance when making interpretive decisions regarding dotted rhythms. Helpful fingering and bowing suggestions are provided by the editor but are clearly distinguished from Bach's original notation allowing the performer the freedom to accept or reject any given suggestion. The volume comes complete with Dr Golan's essay *Performing Bach Dotted Rhythms and Trills in the Sonatas and Partitas for Solo Violin* which also includes scholarly discussions of vibrato fingerings bowing styles and ritardandos in Baroque music. The inclusion of this comprehensive study of Baroque performance practices makes this edition a must for any violinist interested in performing the Bach Sonatas and Partitas in an historically informed manner. *Forms of Performance: From J.S. Bach to M. Alunno (1972-)* Michael Maul, Alberto Nones, 2020-02-04 Today Bach is one of the most revered and studied figures of classical music despite there being a time in which he was almost forgotten. Divided into two sections this volume explores research on J S Bach and more broadly examines the topics of music and performance studies with the latter focusing on composers active today such as Marco Alunno or those from the recent past who are lesser known and performed such as Pietro Cimara and Leo Ornstein. Following from Nones's ed previous publication *Music as Communication Perspectives on Music Image and Performance ABE 2018* this work provides a rather unique contribution as a choral attempt at exploring performance today. The intention of this book and the downloadable audio content with live recordings of the music explored at the conference from which the volume originated is to inspire fresh approaches to the study of a monument like Bach while also encouraging original research of modern composition and performance. Recordings of the performances given over the two days of the conference serve either to clarify arguments made in the papers or to attest to the music explored more generally. This volume is founded on the belief that the history of music is comprised of many figures some of whom are undeservedly forgotten and that our understanding of and approach to music is simultaneously shaped by the past and directed by the continual evolution of sounds and attitudes of the present. Examining music styles from baroque Bach to contemporary Alunno *Forms of Performance* will be of particular interest to Bach and performance studies scholars as well as advanced researchers and PhD students in this field. *The secrets of the hidden canons in J.S. Bach's masterpieces* Giovanni Pietro Orefice, 2024-02-08 Why does J S Bach's music deeply resonate in our soul and in our churches like no other one? How can treasures keep hidden in a work that was studied and explored during three centuries? You'll find here the lonely and passionate discovery of marvelous multiple canons structures in many of the famous

works of a music history's giant crowned by surprising revelations that give some new path of attributing the pieces. The analysis of the historical and cultural context and of some contemporaries' masterpiece let emerge Bach's outstanding earing and compositive talent explaining his excellence during the organ tournaments. This unveiling is the starting point for a speculative journey using room acoustics, psycho acoustics and music performer's practice knowledges to explain why Bach did adopt this compositive strategy, this secret ingredient to excel.

6 Sonatas and Partitas Johann Sebastian Bach

It is one of Josef Joachim's great merits not only to have introduced the following sonatas of Johann Sebastian Bach into the Concert Hall but also to have made them loved by the great public. They were almost unknown before Joachim played them with his grand art of interpretation and brought out all the beauties of this magnificent music. Some parts of these sonatas had been played in public by certain violinists before Joachim's time but as the spirit and the technique of these works were quite strange to the performers, the interpretation made a ridiculous impression on the audience. Any success was made quite impossible on account of the want of knowledge in the performers. Then came Joachim and his rendering was a revelation. How he played and interpreted these sonatas is so well known that it is not necessary to mention it. When I completed my studies at the Berliner Hochschule under Joachim's direction, the study of these sonatas formed one of the most important parts of his teaching. Joachim used the very excellent edition by Ferdinand David based on Bach's manuscript to be found in the Royal Library in Berlin. All the same, Joachim changed a great deal in this edition with regard to the manner of playing, bowing, fingering, and marks of interpretation, and I kept to all the alterations made by him. I very often had the opportunity of hearing Joachim play these works at concerts as well as during his classes, and so I was able to observe the fineness of his interpretation down to the smallest detail. As I am

publishing the standard works of violin literature in connection with my own teaching it was a special pleasure to me to revise these Sonatas which I consider one of the most important works written for the violin in such a manner that no doubt may be left as to the best and easiest way of mastering the great and unusual difficulties which they contain I hope to show by this to all young violin artists to whom the study of the following sonatas cannot be too strongly recommended a sure way to a really perfect and beautiful rendering of the same [Rethinking J.S.
