Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 *Paradise Planned* is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United States and northern Europe and gradually proliferated throughout the world. These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar, train and automobile. Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning. Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature. *Paradise Planned* is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape.

Organic Design in Twentieth-Century Nordic Architecture Erik Champion, 2019-02-18 *Organic Design in Twentieth Century Nordic Architecture* presents a communicable and useful definition of organic architecture that reaches beyond constraints. The book focuses on the works and writings of architects in Nordic countries such as Sigurd Lewerentz, Jørn Utzon, Sverre Fehn and the Aaltos, Aino Elissa and Alvar among others. It is structured around the ideas of organic design principles that influenced them and allowed their work to evolve from one building to another. Erik Champion argues organic architecture can be viewed as a concerted attempt to thematically unify the built environment through the allegorical expression of ongoing interaction between designer, architectural brief and building as process. With over 140 black and white images, this book is an intriguing read for architecture students and professionals alike. *Alvar Aalto and The Art of Landscape* Teija Isohauta, 2022-03-14 *Alvar Aalto and The Art of Landscape* captures the essence of the Finnish architect's landscape concept emphasising culture and tradition which characterised his approach to and understanding of architecture as part of the wider environment. From the forests of his youth to sights from his travels, Alvar Aalto 1898-1976 was influenced by outdoor landscapes. Throughout his career he felt the need to shape the terrain and this became a signature of his architecture. Divided into five chapters, this book traces Aalto's relationship with landscape starting with an analysis of his definitions and descriptions of landscape language which ranged from natural references and biological terms to synonyms and comparisons. It includes beautifully illustrated case study projects from the 1950s and 1960s discussing Aalto's transformation of different landscapes through topography, terracing and tiers, ruins and natural elements, horizon outlines, landmarks and the repetition of form. Featuring archival sketches, garden drawings and plans, the book also contains Aalto's text *Architecture in the Landscape of Central Finland* from 1925 in the appendix. This book provides fascinating, untold insights into Aalto's relationship with landscape and how this developed during his lifetime for scholars, researchers and students interested in architecture and landscape history, landscape art and cultural studies. *Community Green* David Nichols, Robert Freestone, 2024-02-06 Neighbourhood open space ranks highly as a key component in suburban liveability.

assessments originating from the development of urban planning as a profession and the proliferation of the garden suburb Community Green uniquely connects the past present and future of planning for small open spaces around the narrative of internal reserves The distinctive planned spaces are typically enclosed on every side hidden within residential blocks serving as local pocket parks and reflecting the evolving values of community life from the garden city movement to contemporary new urbanism This book resuscitates the enclosed almost secretive reserve from history as a distinctive form of local open space whose problems and potentialities are relevant to many other green community spaces In so doing it opens up even wider connections between localism and globalism the past and the future and for connecting community initiatives to broader global challenges of cohesion health food and climate change This fully illustrated book charts the outcomes and implications of this evolution across several continents injecting human stories of civic initiatives struggles and triumphs along the way Community Green will be of interest to a wide readership interested in studying managing and improving the quality of all small open spaces in the urban landscape

Sibelius Glenda Dawn Goss, 2009-12-15 One of the twentieth century's greatest composers Jean Sibelius 1865-1957 virtually stopped writing music during the last thirty years of his life Recasting his mysterious musical silence and his undeniably influential life against the backdrop of Finland's national awakening Sibelius will be the definitive biography of this creative legend for many years to come Glenda Dawn Goss begins her sweeping narrative in the Finland of Sibelius's youth which remained under Russian control for the first five decades of his life Focusing on previously unexamined events Goss explores the composer's formative experiences as a Russian subject and a member of the Swedish speaking Finnish minority She goes on to trace Sibelius's relationships with his creative contemporaries with whom he worked to usher in a golden age of music and art that would endow Finns with a sense of pride in their heritage and encourage their hopes for the possibilities of nationhood Skillfully evoking this artistic climate in which Sibelius emerged as a leader Goss creates a dazzling portrait of the painting sculpture literature and music it inspired To solve the deepest riddles of Sibelius's life work and enigmatic silence Goss contends we must understand the awakening in which he played so great a role Situating this national creative tide in the context of Nordic and European cultural currents Sibelius dramatically deepens our knowledge of a misunderstood musical giant and an important chapter in the intellectual history of Europe

Jean Sibelius and His World Daniel M. Grimley, 2011-08-08 New perspectives on the greatest Finnish composer of all time Perhaps no twentieth century composer has provoked a more varied reaction among the music loving public than Jean Sibelius 1865 1957 Originally hailed as a new Beethoven by much of the Anglo Saxon world he was also

widely disparaged by critics more receptive to newer trends in music At the height of his popular appeal he was revered as the embodiment of Finnish nationalism and the apostle of a new musical naturalism Yet he seemingly chose that moment to stop composing altogether despite living for three more decades Providing wide cultural contexts contesting received ideas about modernism and interrogating notions of landscape and nature Jean Sibelius and His World sheds new light on the critical position occupied by Sibelius in the Western musical tradition The essays in the book explore such varied themes as the impact of Russian musical traditions on Sibelius his compositional process Sibelius and the theater his understanding of music as a fluid and improvised creation his critical reception in Great Britain and America his late style in the incidental music for *The Tempest* and the parallel contemporary careers of Sibelius and Richard Strauss Documents include the draft of Sibelius's 1896 lecture on folk music selections from a roman clef about his student circle in Berlin at the turn of the century Theodor Adorno's brief but controversial tirade against the composer and the newspaper debates about the Sibelius monument unveiled in Helsinki a decade after the composer's death The contributors are Byron Adams Leon Botstein Philip Ross Bullock Glenda Dawn Goss Daniel Grimley Jeffrey Kallberg Tomi Mäkelä Sarah Menin Max Paddison and Timo Virtanen

Nordic Classicism John Stewart, 2018-09-06 Nordic Classicism presents the first English language survey of an important yet short lived movement in modern architectural history It was through the Nordic classical movement that Scandinavian architecture first attracted international attention It was the Nordic Pavilions rather than Le Corbusier's modernism which generated most admiration at the 1925 World Fair and it was the Nordic classical architects including Gunnar Asplund Sigurd Lewerentz and Alvar Aalto who went on to establish Scandinavia's reputation for modern design Yet this brief classical movement was quickly eclipsed by the rise of international modernism and has often been overlooked in architectural studies The book explores the lives and works of various key contributors to Nordic classicism with eleven chapters each focussing on a different architect and on one of the period's outstanding works including the Stockholm Central Library the Resurrection Chapel and the Woodland Cemetery Famous architects and their works are examined alongside many lesser known examples to provide a comprehensive and in depth account As we approach the centenary of many of the events to which the book refers now is a timely opportunity to explore the key themes of the Nordic classical movement its architects their buildings and the social and cultural changes to which they were responding **A**
