Song From The Forest My Life Among The B:

Song from the Forest Louis Sarno, 2015-04-07 As a young man American Louis Sarno heard a song on the radio that gripped his imagination With some funding from musician Brian Eno he followed the mysterious sounds all the way to the Central African rain forest and found their source with the Bayaka Pygmies a tribe of hunters and gatherers Nothing could have prepared him for life among the Pygmies a people legendary for their short stature and musical wealth Sarno never left Considered outwardly lazy by some scrounging and near alcoholic the Pygmies Sarno met had seemingly lost all desire to hunt or make music Only after he had lived with them for some time on a diet of tadpoles was he allowed to join them in the rain forest where they still in relative harmony with nature There Sarno experienced the extraordinary beauty and spiritual sophistication of their culture and the supreme importance of music as the principal means by which they communicate with the rain forest and its magical spirits Over the decades Sarno has recorded more than 1 000 hours of unique Bayaka music He is a fully accepted member of the Bayaka society and married a Bayaka woman Permanently changed by his experience and captivated by a Bayaka culture In Song from the Forest Sarno has chronicled his attempt to protect the fragile existence of the Pygmies in an increasingly destructive world Once when his son Samedi became seriously ill and Sarno feared for his life he held his son in his arms through a frightful night and made him a promise If you get through this one day I ll show you the world I come from Now the time has come to fulfill his promise In a new major documentary film Sarno tells the story of the Bayaka as he travels with Samedi from the African rain forest to another jungle one of concrete glass and asphalt New York City Together they meet Louis family and old friends including his closest friend from college Jim Jarmusch Carried by the contrasts between rainforest and urban America and a fascinating soundtrack Louis and Samedi s stories are interwoven to form a touching portrait of an extraordinary man and his son SONG FROM THE FOREST is a modern epic film set between rainforest and skyscrapers

The Cognitive Neuroscience of Music Isabelle Peretz, Robert J. Zatorre, 2003-07-10 Music offers a unique opportunity to better understand the organization of the human brain Like language music exists in all human societies Like language music is a complex rule governed activity that seems specific to humans and associated with a specific brain architecture Yet unlike most other high level functions of the human brain and unlike language music is a skill at which only a minority of people become proficient The study of music as a major brain function has for some time been relatively neglected Just recently however we have witnessed an explosion in research activities on music perception and performance and their correlates in the human brain This volume brings together an outstanding collection of international authorities from the fields of music neuroscience psychology and neurology to describe the amazing advances being made in understanding the complex relationship between music and the brain Aimed at psychologists and neuroscientists this is a book that will lay the foundations for a cognitive neuroscience of music

Art and Intimacy Ellen Dissanayake, 2015-08-03 To Ellen Dissanayake the arts are biologically evolved propensities of human nature their fundamental features helped early humans adapt to their environment and reproduce themselves successfully over generations In Art and Intimacy she argues for the joint evolutionary origin of art and intimacy what we commonly call love It all begins with the human trait of birthing immature and helpless infants To ensure that mothers find their demanding babies worth caring for humans evolved to be lovable and to attune themselves to others from the moment of birth The ways in which mother and infant respond to each other are rhythmically patterned vocalizations and exaggerated face and body

movements that Dissanayake calls rhythms and sensory modes Rhythms and modes also give rise to the arts Because humans are born predisposed to respond to and use rhythmic modal signals societies everywhere have elaborated them further as music mime dance and display in rituals which instill and reinforce valued cultural beliefs Just as rhythms and modes coordinate and unify the mother infant pair in ceremonies they coordinate and unify members of a group Today we humans live in environments very different from those of our ancestors They used ceremonies the arts to address matters of serious concern such as health prosperity and fecundity that affected their survival Now we tend to dismiss the arts to see them as superfluous only for an elite But if we are biologically predisposed to participate in artlike behavior then we actually need the arts Even or perhaps especially in our fast paced sophisticated modern lives the arts encourage us to show that we care about important things

Children, Childhood, and the Future Andrea Kleeberg-Niepage, 2020-01-10 Although most of the world's children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children's lives

Western Music and Its Others Georgina Born, David Hesmondhalgh, 2000-10-15 Western Music and Its Others will be taken as an important book signalling a new turn within the field It takes the best features of traditional rigorous scholarship and brings these to bear upon contemporary more speculative questions The level of theoretical sophistication is high The studies within it are polemical and timely and of lasting scholarly value Will Straw co editor of *Theory Rules Art as Theory Theory and Art* The great value of this collection lies in the wealth of questions that it raises questions that together crystallize the recent concerns of musicology with force and clarity But it also lies in the authors resistance to the easy postmodernist answers that threaten to turn new musicology prematurely grey The editors comprehensive intellectually adventurous introduction exemplifies the sort of eager yet properly skeptical receptivity to scholarly innovation that fosters lasting disciplinary reform It alone is worth the price of the book Richard Taruskin author of *Stravinsky and the Russian Traditions A Biography of the Works Through Mavra* When cultural studies methods first appeared in musicology 15 years ago they triggered a storm of polemics that sometimes overshadowed the important issues being raised As the canon wars recede however scholars are finding it possible to focus on the concerns that led them to cultural criticism in the first place the study of music and its political meanings Western Music and Its Others brings together leading musicologists ethnomusicologists and specialists in film and popular music to explore the ways European and North American musicians have drawn on or identified themselves in tension with the musical practices of Others In a series of essays ranging from examination of the Orientalist tropes of early

20th century Modernists to the tangled claims for ownership in today's World Music the authors in this collection greatly advance both our knowledge of specific case studies and our intellectual awareness of the complexity and urgency of these problems A timely intervention that should help push music studies to the next level Susan McClary author of *Conventional Wisdom The Content of Musical Form* 2000 This collection provides a sophisticated model for using theory to interrogate music and music to interrogate theory The essays both take up and challenge the dominance of notions of representation in cultural theory as they explore the relevance of the concepts of hybridity and otherness for contemporary art music Sophisticated theory erudite scholarship and a very real appreciation for the specificities of music make this a powerful and important addition to our understanding of both culture and music Lawrence Grossberg author of *Dancing in Spite of Myself*

No Mercy Redmond O'Hanlon, 1998-06-30 Lit with humor full of African birdsong and told with great narrative force No Mercy is the magnum opus of probably the finest writer of travel books in the English language as Bill Bryson wrote in *Outside* and certainly the most daring Redmond O'Hanlon has journeyed among headhunters in deepest Borneo with the poet James Fenton and amid the most reticent imperilled and violent tribe in the Amazon Basin with a night club manager This however is his boldest journey yet Accompanied by Larry Shaffer an American friend and animal behaviorist a man of imperfect health and brave decency he enters the unmapped swamp forests of the People's Republic of the Congo in search of a dinosaur rumored to have survived in a remote prehistoric lake The flora and fauna of the Congo are unrivalled and with matchless passion O'Hanlon describes scores of rare and fascinating animals eagles and parrots gorillas and chimpanzees swamp antelope and forest elephants But as he was repeatedly warned the night belongs to Africa and threats both natural cobras crocodiles lethal insects and supernatural from all powerful sorcerers to Samal a beast whose three clawed hands rip you across the back make this a saga of much fear and trembling Omnipresent too are ecological depredations political and tribal brutality terrible illness and unnecessary suffering among the forest pygmies and an appalling waste of human life throughout this little explored region An elegant disturbing and deeply compassionate evocation of a vanishing world extraordinary in its depth scope and range of characters No Mercy is destined to become a landmark work of travel adventure and natural history A quest for the meaning of magic and the purpose of religion and a celebration of the comforts and mysteries of science it is also and above all a powerful guide to the humanity that prevails even in the very heart of darkness

one of the most legendary and influential bands in American popular music Locating The B 52s in the intellectual climate of their hometown of Athens GA and following the band from New York s downtown scene in the early 1980s to their upcoming farewell tour the book argues that The B 52s are much more significant political and musical influences on American society than their reputation as a silly party band suggests and that their ongoing commitment to values including cooperation mutual support and using disruptive fun as a form of social change are an antidote to the neoliberalization sweeping both Athens and the rest of the Western world For example the book shows how the band synthesized influences from the modern artists displayed at the University of Georgia art museum early queer activism on campus in the 1970s and their experiences as queer people living through the AIDS crisis to create music that continues to be artistically and politically influential today The authors are active members of the Athens GA music scene and the book includes original interviews with a range of number close to the band
