Bierhorst, 1976-05-01 The best of the American Indian myths are works of art blending form and content into an organic whole in which the great themes of human experience are interwoven much as they are in a memorable short story or novella

But if the underlying themes are similar the metaphorical and narrative conventions are vastly different and it is this aesthetic gap that critic John Bierhorst intends to bridge in this companion volume to his well known anthology *In the Trail of the Wind* American Indian Poems and Ritual Orations Over forty cultures including the Eskimo the Iroquois the Navajo the Maya and the Bororo are here represented by sixty four carefully selected myths and tales Yet *The Red Swan* will be valued not so much for its scope or its quantity as for the superb quality of the stories themselves Among the classic narratives included are *The Fight of the Quetzalcoatl* Aztec *The Rival Chiefs* Kwakiutl *The Hungry Old Woman* Anambe Two Friends Greenland Eskimo and *The Red Swan* Chippewa A number of the translations the work of such ethnographers as Franz Boas James Teit and George Bird Grinnell have been left untouched others have been expertly revised and some of the selections all of which deserve to be much better known appear in English for the first time **Soundings** Doreen

Cunningham,2022-07-12 In this memoir of motherhood love and resilience a woman and her toddler son follow the grey whale migration from Mexico to northernmost Alaska In this striking blend of nature writing whale science and memoir Doreen Cunningham interweaves two stories tracking the extraordinary northward migration of the grey whales with a mischievous toddler in tow and living with an I upiaq family in Alaska seven years earlier Throughout the journey she explores the stories of the whales and their young calves their history their habits and their attempts to survive the changes humans have brought to the ocean Cunningham s voice is powerful sharp profound sensitive and unflinching A story of courage and resilience *Soundings* is about the migrating whales and all we can learn from them as they mother adapt and endure their lives interrupted and threatened by global warming It is also a riveting journey onto the Arctic Sea ice and into the changing world of Indigenous whale hunters where Doreen becomes immersed in the ancient values of the I upiaq whale hunt and falls in love For this is Doreen s story too a fierce feminist tale touching on her childhood and her time living in a Women s Refuge with her baby becoming a mother just like the whales Lyrical brave and fearlessly honest *Soundings* is an unforgettable journey **The Return of the Sun** Michael J. Kral,2019 The Return of the Sun shows how Indigenous communities can develop on their own successful suicide prevention strategies Kral details how government colonialism disrupted Inuit lives especially family lives **Arctic Ocean** Samantha Nugent,2017-08-01 The Arctic Ocean is the smallest of the five oceans Its surface is almost entirely covered in ice While this frigid body of water may seem inhospitable to life in reality millions of unique plants and animals thrive below the ice The Our Five Oceans series features stunning visuals detailed maps educational debates and challenging research activities Each book explores key topics such as ocean life ecosystems and environmental issues in order to help readers better understand the importance of protecting the world s oceans *Northern Voices* Penny Petrone,2017-05-24 Inuit of northern Canada have a rich oral tradition in their ancient languages and a more recent tradition of written English Penny Petrone traces the two paths that link the cultural past of arctic peoples with its expression in the present day The book s first section includes traditional legends myths folk history

told by native story tellers and poetry sung by Inuit composers The second presents statements and observations by some of the first Inuit to come into contact with European newcomers including official reports interviews letters and diaries Next are early poetry and prose in translation much of it autobiographical The final section includes contemporary Inuit writing from essays and speeches to fiction poetry and other genres of imaginative literature The editor has provided an introduction for each item and arranged the material chronologically to give historical perspective and continuity to the whole The Sea Can Wash Away All Evils Kimberley Christine Patton,2007 Kimberley Patton examines the environmental crises facing the world s oceans from the perspective of religious history Much as the ancient Greeks believed and Euripides wrote that the sea can wash away all evils a wide range of cultures have sacralized the sea trusting in its power to wash away what is dangerous dirty and morally contaminating The sea makes life on land possible by keeping it pure Patton sets out to learn whether the treatment of the world s oceans by industrialized nations arises from the same faith in their infinite and regenerative qualities Indeed the sea s natural characteristics such as its vast size and depth chronic motion and chaos seeming biotic inexhaustibility and unique composition of powerful purifiers salt and water support a view of the sea as a no place capable of swallowing limitless amounts of waste And despite evidence to the contrary the idea that the oceans could be harmed by wasteful and reckless practices has been slow to take hold Patton believes that environmental scientists and ecological advocates ignore this relationship at great cost She bases her argument on three influential stories Euripides tragedy Iphigenia in Tauris an Inuit myth about the wild and angry sea spirit Sedna who lives on the ocean floor with hair dirtied by human transgression and a disturbing medieval Hindu tale of a lethal underwater mare She also studies narratives in which the sea spits back its contents sins corpses evidence of guilt long sequestered suggesting that there are limits to the ocean s vast salty heart In these stories the sea is either an agent of destruction or a giver of life yet it is also treated as a passive receptacle Combining a history of this ambivalence toward the world s oceans with a serious scientific analysis of modern marine pollution Patton writes a compelling cross disciplinary study that couldn t be more urgent or timely
