Soundings Cross Channel Photographic Mission:

Photoscapes Frédéric Pousin, 2019-07-08 Landscape architecture and photography are closely interrelated since the former is a constantly evolving thing that can be captured in stills even eternalized by photography What role does photography play in landscape design How does photography create a new context for landscape The book investigates such questions in nine essays by North American and French scientists using landscape designs that were created from the 1950s to today

Bridging Divides Eve Darian-Smith, 1999-10 This study uses the Channel Tunnel between England and France to explore the shifting geographies of nationalism postcolonialism and legal autonomy in the formation of the European Union It looks at regional differences in feelings about Europe and at vocabulary used in discussing the Tunnel

Landscape by Signs Alessandro Bianchi, 2019-12-05T00:00:00+01:00 From architecture to landscape the step was not short like the jumping in scale in the perspective perception of spaces For architecture the view stopped against a wall to then enter and capture the space through the category of the Alberti concinnitas This book contains articles developed for conferences and magazine papers written over the last five years and reconstructs a theoretical and design path of the author and his students at the Politecnico di Milano Landscape representations of the students are presented the result of a mixed path between personal perception and visualization techniques including manual drawing photography video and photo retouching The search for new paths can lead to the desperate exaltation of the expressive characters of each of us perhaps meaningless or to the laying of new cornerstones of the representation of the future we need to go beyond the modern to be a frontier we need to be avant garde to recognize in a new sign a symbol of our contemporaneity
