South Westerns Advanced Accounting:

Advanced Accounting Theory and Practice Kabiru I. Dandago, 2009-01-30 Accounting is the discipline with the oldest historical culture being the first to be recognized by humanity when Adam and Eve were made to account for what they did in paradise. It is also the only discipline that will come into play in the Hereafter where everybody would be raised up as an accountant to account for all they have done during their life time on earth. Accounting is a service providing discipline with a rich theoretical background which makes available information especially financial to guide various decision making processes. Business owners, creditors, managers, prospective investors, government and its agencies, employees and even the general public seek accounting information to guide them when taking various informed decisions about reporting entities and the environment within which they operate. This book addresses the historical accounting culture, its theories as well as its practices. It is made up of fifteen chapters covering various historical theoretical and practical aspects of Accounting ranging from accounting standardization to financial reporting. The book is an attempt to address some of the lacunae in advanced accounting issues both in theory and in practice. Students of advanced accounting theory and practice at the professional and academic levels in Universities, Polytechnics and Professional Institutes would find the book an essential companion.

Handbook of cost and management accounting Zahirul Hoque, 2010-05-28 In order to survive in the changing business environment, organisations should rethink their strategic philosophy and the role of management accounting. The primary focus of this book is on techniques and concepts of cost and management accounting for strategic business decisions. It focuses on both conventional and contemporary issues. The book will serve as a reference source for practicing accountants, senior executives and managers working in human resources, operations and accounting divisions. As the principal focus of this book is on conceptual foundations, it would also be ideal for courses in graduate programs such as master's degree, MBA or Executive MBA.

International Accounting and Transnational Decisions S. J. Gray, 2014-05-20 International Accounting and Transnational Decisions explores a wide range of significant international accounting issues with special reference to the comparative development of national systems of accounting, international accounting standards, transnational financial reporting issues and financial planning and control in the multinational corporation. The book is organized into five parts. Part I discusses the international dimensions of accounting including both the financial reporting and managerial decision making perspectives. The second part is concerned with the comparative international aspects of accounting. The Part III presents developments and questions relating to international accounting standards. The fourth part considers a number of selected transnational financial reporting issues of concern both to managers and financial statement users. The last part takes a managerial perspective in its coverage of important problems of transnational financial decision making and control.
