challenges widely held views that diversity and fragmentation are the hallmarks of the region identifying instead the commonalities that have bound the countries of Southeast Asia together through at least two millennia and have provided the basis for a unique regional dynamic. It has only been since World War II that Southeast Asians long influenced by the global environment have defined and developed their own institutions, social structures and communities. Turning away from inadequate and unadaptable Western institutions, they have begun to create structures more in tune with their own historical experiences. Particularly in the political sphere, many of these new structures seemed to be straightforward military dictatorships. However, time has shown them to be more complex, and many unique organizational practices have developed that may presage more open political systems, if not democracies, by strict Western definitions. With the expansion of regional cooperation through ASEAN and strong economic growth, confidence among Southeast Asian states has grown as well. The growing references to an Asian way of life have given verbal expression to a surge in neotraditional values and behavior that have always been part of the fabric of Asian life but that in the past were frowned upon as nonwestern. This text traces the evolution of Southeast Asia and focuses for the first time on the neotraditional bases for contemporary independent development of the region.

Southeast Asia: A Ten Nation Region Ashok K. Dutt, 2012-12-06. This book introduces the ten nation region of Southeast Asia. The main themes of the book are diversity, differential development, and changing socio-economic and political settings affecting these characteristics in the 1990s. The nations of Southeast Asia have different languages, three dominant religions (Buddhism, Islam, and Christianity), varied levels of economic development that range from bare agricultural subsistence to highly urbanized and highly developed. The historically based core areas of these countries have evolved on their own. Moreover, the effects of Indian, Chinese, Islamic, and Western cultures have been experienced differently in different nations at different times in their histories. This book is intended to be understood by all those who want an initial introduction to Southeast Asia. As many aspects of the book are the result of an in-depth research carried out by the contributing authors, it is also a valuable reference. The contributing authors have portrayed the basic spatial aspects of the region as well as their relevance in the 1990s based in novel ways and through original interpretations. All first and some second authors of chapters are professors. All but one have Ph.D.s. Most contributing authors are geographers but with different sub-specialties.
