**Sujetos, políticas y representaciones del mundo rural** Silvia B. Lázzaro, Guido P. Galafassi, 2005 [A desalambrar](#)  
Guido Lissandrello, 2023-12-06 La preocupación sobre el carácter de la revolución en la Argentina se actualizó de manera notable a comienzos de la década del 70 cuando el ciclo insurreccional de masas hizo evidente el surgimiento de una fuerza social revolucionaria que amenazaba la continuidad del capitalismo. Una multiplicidad de organizaciones se desarrollaron en el período adscribiendo a diferentes tradiciones políticas: estalinismo, maoísmo, trotskismo, guevarismo, peronismo de izquierda y socialismo revolucionario. Este libro examina a cada una de ellas para reconstruir los programas políticos que formaron parte del arsenal de la clase obrera. Lo hace a través de un elemento central para el capitalismo: su cuestión agraria. La hipótesis que en estas páginas busca probarse es que la derrota de los revolucionarios se explica en parte por su dificultad para comprender la realidad que pretendían transformar. El conocimiento científico cedió ante adopciones acríticas de diferentes experiencias y tradiciones rusa, china o cubana que funcionaba como tipos ideales. El resultado de una tarea regresiva en las coordenadas económicas del país: reforma agraria. El conocimiento que nos brinda este estudio histórico conserva completa actualidad en particular a mediados de una década del llamado Conflicto del campo que puso sobre la mesa las mismas debilidades de la izquierda argentina y el abandono del verdadero productor de la riqueza agraria: el proletariado. Lejos de todo pesimismo, el reconocimiento de estos déficits de la izquierda y su derrota en los 70 no nos hablan de la imposibilidad de la revolución, sino de la imperiosa necesidad de prepararse adecuadamente para ella. A ello intenta contribuir este libro.

**Low Intensity Breeding of Native Forest Trees in Argentina** Mario J. Pastorino, Paula Marchelli, 2020-11-18 Global climate change requires the development of programs that consider the active restoration of degraded forests and the use of native trees in afforestation to preserve the natural environment. International commitments like the UN REDD program, the Montreal Process and the Convention on Biological Diversity call for the breeding of species rarely contemplated by large industrial companies. Low intensity breeding is the most rational strategy for those species simple but robust and not dependent on continuously increasing funding and therefore effective even with a relatively small budget. It commonly focuses on high genetic diversity rather than improving economic traits and adaptability rather than productivity. Controlled crosses with full pedigrees typical of high intensity breeding are replaced by open pollination. This book presents state of the art breeding strategies from the last two decades for several forest tree species of prime importance in the natural forests of Argentina. They are distributed in the three main forestry ecoregions of the country: the subtropical dry forest Chaco, the subtropical rain forests Yungas and Alto Paraná rainforests, and the temperate forests of Patagonia. The book also discusses the genetic patterns of the selected species defined using genetic markers together with the analysis of the variation in quantitative traits. Further, it examines the crucial features of their reproductive biology such as the mating system and gene flow and describes the current breeding programs. Lastly, it presents the latest developments in genetic resources and their

emerging applications concluding with some reflections and perspectives related to the conditioning imposed by climate change

**Radiografía del nuevo campo argentino** Carla Gras, Valeria Hernández, 2019-11-20 El campo argentino y la cultura empresarial agropecuaria ya no pueden entenderse ni discutirse recurriendo a denominaciones como vieja elite terrateniente o rentista o atendiendo al rol de organizaciones tradicionales como la Sociedad Rural En los últimos cincuenta años se produjo y se consolidó un proceso de transformación profunda que reconfiguró los rasgos de la burguesía agraria y también el modo en que se piensa a sí misma y piensa su rol en el desarrollo del país Con mirada sociológica Carla Gras y Valeria Hernández explican cómo nacieron y crecieron los agronegocios cómo construyeron su hegemonía desplazando otras visiones y presentándose a la vanguardia de la innovación tecnológica cuáles son los perfiles empresariales que sostienen esta matriz y cuáles los puntos de fuga que pueden ponerla en crisis En un arco que va de 1960 a nuestros días el recorrido se detiene en dos instituciones centrales del empresariado del agro AACREA y AAPRESID En los años sesenta la primera definió el rol del agro como el derrotero de un proyecto modernizador sostenido en los valores de la experimentación técnica y el conocimiento y en la misión moral de servir al bien común En los noventa a tono con un mercado globalizado la segunda resignificó la relación entre agro y desarrollo en clave neoliberal Con la tecnología como pilar del modelo de negocios acompañó la articulación de jugadores locales con jugadores transnacionales y tendió puentes sólidos entre el empresariado y otros ámbitos de circulación de saberes como el médico el académico y el científico Ambas instituciones fueron decisivas para relegitimar al sector y desplazar la discusión por la reforma agraria o la tenencia de la tierra Atentas a la heterogeneidad de los actores de los agronegocios las autoras trazan una radiografía imprescindible del perfil de la clase dominante de los mecanismos para construir hegemonía y de las grietas que permiten imaginar modelos alternativos
