**Sukhoi Su-27 Series** Theodore Gianna,2023-09-20 Sukhoi Su 27 production began in 1982 The Su 27 project however started in 1969 when the United States declared intentions to construct a new fighter the F 15 Eagle The Soviet government wasted no time developing a response to counterbalance the latest American aircraft The project was named the Promising Frontline Fighter Project Sukhoi was chosen as the project s winner and the new frontline fighter was named the Su 27 After the Su 27 entered service with the Russian Air Force VVS the sky was the limit for Sukhoi and its family of fighters The company churned out outstanding variants of the Su 27 series The first variant is the Su 30 two seat all weather air to air and air interdiction missions multirole fighter The Su 30 which evolved from the Su 27UB two seat combat trainer features updated avionics and can conduct ground attack missions The following aircraft is the two seat Su 32 fighter bomber It was designed for round the clock all weather engagement of ground and surface targets at considerable distances from home bases It also has precision guided weapons to attack enemy aircraft in an intense counter fire and ECM environment The subsequent aircraft is the Su 33 all weather carrier based twin engine air superiority fighter designed primarily for use on the Russian Admiral Kuznetsov heavy aviation cruiser Next is the superb Su 34 multifunctional supersonic fighter bomber which is equipped with the Kinzhal hypersonic missile system Then comes the granddaddy of the series the Su 35S 4 generation multirole super maneuverable fighter arguably the most visually striking fighter aircraft on the market today and is an exceedingly lethal adversary in a combat situation It possesses extreme super maneuverability and is exceptionally agile and quick It could also strike targets on the ground Lastly there was the Su 37 the most maneuverable variant due to the Thrust Vector Control TVC system which allowed the aircraft to evade a stall

scenario during low speed situations when the control surfaces became ineffective Using TVC the aircraft could be controlled in these conditions by relying on engine thrust as opposed to airflow The Su 37 project was terminated and only one Su 37 was produced Nonetheless the Su 35s today continue to utilize TVC technology      **Sukhoi Su-27 Flanker** Dennis R.
