Landscape Ecology, Function and Management J. Ludwig, D. Tongway, K. Hodgkinson, D. Freudenberger, J. Noble, 1996-11-01. This book encapsulates the extensive knowledge developed by CSIRO's National Rangelands Program on how rangeland landscapes function and the implications for management. It looks at the ecology of rangeland landscape processes and deals with what happens when things go wrong when a landscape loses its ability to efficiently capture and store water and nutrients, a state the authors call dysfunctional. Ways of managing rangelands in response to understanding landscape function are also considered. The concluding Section looks to the future, providing some scenarios for the way rangeland landscapes may be used in 2020.

Noxious Weeds of Australia William Thomas Parsons, Eric George Cuthbertson, 2001. This is a reference book containing information on over 200 species, including where each is proclaimed and what the legal requirements are for its control. Each weed has a detailed description and colour photograph to make identification straightforward.

Frontiers in Turbulence and Coherent Structures J. P. Denier, Jorgen S. Frederiksen, 2007. The Chickasaw Nation, an American Indian nation headquartered in southeastern Oklahoma, entered into a period of substantial growth in the late 1980s. Following its successful reorganization and expansion, which was enabled by federal policies for tribal self-determination, the Nation pursued gaming and other industries to affect economic growth. From 1987 to 2009, the Nation's budget increased exponentially as tribal investments produced increasingly large revenues for a growing Chickasaw population. Coincident to this growth, the Chickasaw Nation began acquiring and creating museums and heritage properties to interpret their own history, heritage, and culture through diverse exhibitionary representations. By 2009, the Chickasaw Nation directed representation of itself at five museums and heritage properties throughout its historic boundaries. Josh Gorman examines the history of these sites and argues that the Chickasaw Nation is using museums and heritage sites as places to define itself as a coherent and legitimate contemporary Indian nation. In doing so, they are necessarily engaging with the shifting historiographical paradigms as well as changing articulations of how museums function and what they represent. The roles of the Chickasaw Nation's museums and heritage

sites in defining and creating discursive representations of sovereignty are examined within their historicized local contexts The work describes the museum exhibitions dialogue with the historiography of the Chickasaw Nation the literature of new museum studies and the indigenous exhibitionary grammars emerging from indigenous museums throughout the United States and the world **Estuaries of Australia in 2050 and beyond** Eric Wolanski,2013-08-28 The book addresses the questions Is Australia s rapidly growing human population and economy environmentally sustainable for its estuaries and coasts What is needed to enable sustainable development To answer these questions this book reports detailed studies of 20 iconic Australian estuaries and bays by leading Australian estuarine scientists That knowledge is synthesised in time and space across Australia to suggest what Australian estuaries will look like in 2050 and beyond based on socio economic decisions that are made now and changes that are needed to ensure sustainability The book also has a Prologue by Mr Malcolm Fraser former Prime Minister of Australia which bridges environmental science population policy and sustainability
