Sunday Week

**John Henry HOBART (Bishop of the
Protestant Episcopal Church in the
State of New York.)**

Sunday Week:

GB84 David Peace,2014-11-04 Never before published in the U S GB84 will be launched in 2014 alongside two other novels by David Peace *The Damned* *Utd* and *Red or Dead* In taut and gripping prose that often feels like the relentless text of a surveillance report GB84 tells the story of the British coal miner s strike of 1984 including the actual bombings riots and protests that brought the country to the brink of civil war Called by its author fiction based on fact the book depicts a real life 1984 more violently dystopian than even Orwell imagined Slowly starving strikers find themselves pitted against a prime minister Margaret Thatcher determined to crush them a police force willing to use infiltration and violence to achieve her will and equally hungry scabs who need a job Mixing real events and characters with the voices of the increasingly desperate strikers the book becomes a stirring saga of courage against overwhelmingly sinister forces and paints a searing and haunting portrait of events that changed the course of British history *Overcome with Paschal Joy* Mark G.

Word and Worship Desk Calendar 2010 Paulist Press,2009-07 This spiral bound desk calendar contains lectionary readings and a calendar for celebrating the Eucharist Features included are a guide for praying the Liturgy of the Hours a Bible Enrichment suggestion and a mention of well known people on the anniversary of their deaths **Nobel Universal Graphical Language** Milan Randic,2010-05-24 Nobel is a pictographic language based on some 120 basic signs and many arrows of different shape that are mutually combined It is named after Alfred Nobel 18331896 Swedish chemist and industrialist inventor of dynamite who left most of his fortune to a foundation that annually gives awards to individuals whose work is characterized as greatest benefit to mankind known as Nobel Prizes Besides the awards for sciences and literature significantly Alfred Nobel included among others a prize for peace that besides individuals also organizations may obtain Although it would be utopian to believe that human conflicts could be avoided if communication tools would improve the emergence of universal languages certainly cannot make the situation worse Universal languages are a communication tool which makes it possible for people of no common language to communicate They are graphic but they should be distinguished from picture writings which only passively offer information on some event or give messages Universal languages have more similarity with the sign languages that are used for people who lost hearing or the sign language of American Plains Indians who spoke different languages and could communicate by sign language that they developed However written language has some advantages over hand sign languages in that one can communicate at a great distance particularly today in the age of fax and computer communications and that one can leave messages for posterity This is not the place to argue for or against the promise of written sign languages Graphic written sign languages exist today and the best known are Chinese characters used in China and Japan The problem with Chinese characters is that there are too many

characters and it is difficult to learn so many It takes years for children in China and Japan to learn so many different characters and the task would be even harder for grown people to learn if they have not done this when young Nobel is designed to remove this difficulty and is based on the following requirements 1 SMALL NUMBER OF BASIC SIGNS 2 SIGNS SHOULD BE EASY TO RECOGNIZE 3 SIGNS SHOULD BE EASY TO REPRODUCE 4 COMBINATIONS LIMITED TO THREE SIGNS 5 COMPLEMENTARY We have already mentioned that Nobel uses about 120 basic signs which can be viewed as a small number particularly in view of over 100 signs of Nobel that are so obvious that they can be easily absorbed The other requirements are also very important There are many signs that can be easily recognized but in order to be acceptable for Nobel they also need to be easily reproduced because that will facilitate communication Also when making combinations of signs one has to make some restriction in order to maintain clarity so we decided to have no more than three signs combined into single word Finally the last requirement that of complementarities needs some explanation Besides having signs that one can easily recognize and easily draw one needs some structure to be embedded into composition of signs that facilitates one to remember and learn signs easily We refer to this structure as complementary or broadly speaking associational and what it implies is that words and objects that are related should have related signs Thus for example pairs of words like man woman cat dog coffee tea good bad love hate etc should have signs that are in some opposition while words like smoke flame fire tree wood forest water sea ocean good better best should have signs that are in competition With this in mind when one sees and learns the basic signs the meaning of many combinations of signs can be in advance anticipated This helps one to learn Nobel rather fast not months not weeks perhaps not even days but a couple of hours may suffice that one may learn hundreds and hundreds of words In this respect Nobel may be unique among languages written spoken of **Holy Ground** Neil Paynter,2005-07-01 Liturgies and worship resources on a range of subjects and concerns globalisation food water HIV AIDS the environment interfaith dialogue the arms trade prisoners of conscience 20th century martyrs homelessness racism gender living in commun **Awards of the Second Division, National Railroad Adjustment Board, with an Appendix** ...
