*Fire Island National Seashore, New York* United States. Congress. House. Committee on Interior and Insular Affairs. Subcommittee on National Parks, 1964 Modern society is ill Many people sit in their work cubicle in jobs that are stressful and unfulfilling With a boss they don t like With a mortgage they cannot afford With relationships that aren t all they could be With a work life balance that s all work and no life It s no wonder there s a stress and depression epidemic in the Western world Many people have simply lost themselves Is this you If so life doesn t have to be like this You can choose to live life in a different way Most people will say that they want more than anything to be themselves and to make a difference This book is about how to be true to yourself in a society that more than ever pushes us to disguise who we are so we end up pretending to be who we re not How can I find a way to be myself Join Mark Eyre to find your own real me and along the way pick up some practical strategies and approaches to help you express who you really are It s time to join the journey of a lifetime and in the words of George Eliot to be who you might have been

*Crabgrass Crucible* Christopher C. Sellers, 2012-06-18 Although

suburb building created major environmental problems Christopher Sellers demonstrates that the environmental movement originated within suburbs not just in response to unchecked urban sprawl Drawn to the countryside as early as the late nineteenth century new suburbanites turned to taming the wildness of their surroundings They cultivated a fondness for the natural world around them and in the decades that followed they became sensitized to potential threats Sellers shows how the philosophy science and emotions that catalyzed the environmental movement sprang directly from suburbanites lives and their ideas about nature as well as the unique ecology of the neighborhoods in which they dwelt Sellers focuses on the spreading edges of New York and Los Angeles over the middle of the twentieth century to create an intimate portrait of what it was like to live amid suburban nature As suburbanites learned about their land became aware of pollution and saw the forests shrinking around them the vulnerability of both their bodies and their homes became apparent Worries crossed lines of class and race and necessitated new ways of thinking and acting Sellers argues concluding that suburb dwellers through the knowledge and politics they forged deserve much of the credit for inventing modern environmentalism
