Situations And Speech Acts:

Situations and Speech Acts David A. Evans, 2016-11-18 First published in 1985 this book aims to develop an approach to speech acts that has the virtue of being straight forward explicit formal and flexible enough to accommodate many of the more general problems of interactive verbal communication The first chapter introduces situation semantics with the second addressing the assumptions implied by the problem of representing speaker intentionality The third chapter presents a streamlined theory of speech acts and the fourth tests the predictions of the theory in several hypothetical discourse situations A summary and suggestions for further research is provided in chapter five and appendices facilitate reference to key concepts

Language and Action Danilo Marcondes de Souza Filho, 1985-01-01 This work consists of an examination and revision of some of the main theses of Speech Act Theory in relation to the problem of ideology and action guiding language Starting from the idea that linguistic philosophy must take into account how the social structure of the linguistic community may influence and direct the way its language is used a critical method of analysis is proposed developing Speech Act Theory in a way suitable for this purpose The main guideline of this proposal is the consideration that a theory of action rather than a theory of meaning should be taken as central in the analysis of language The notion of illocutionary force the problem of intentions and conventions in the constitution of speech acts the definition of context and the classification of speech acts are then discussed Based on the conclusions of this discussion a pragmatic method for the analysis of language is formulated

The Difference between Direct and Indirect Speech Acts. When Are Speech Acts Successful? Sebastian P., 2016-10-10 Seminar paper from the year 2016 in the subject English Language and Literature Studies Linguistics grade 1.0 Technical University of Braunschweig course Approaches to Meaning language English abstract This term paper will deal with speech act theory especially with the success of speech acts depending on certain conditions Due to the usage of direct and indirect speech acts in everyday conversations it will be analysed which conditions have to be fulfilled to have a successful speech act The following theories will be used to answer the research question whether the same conditions have to be fulfilled for direct and indirect speech acts to be successful 1 Theory of Felicity Conditions by John Searle 2 Cooperative Principle by Paul Herbert Grice 3 Inference Theory by Gordon and Lakoff The hypothesis is that indirect speech acts are different than direct speech acts due to the demanded hearer uptake and the possible ambiguity After giving definitions of important linguistic terms and theories the success of utterances and conversations in general will be described by the help of the Cooperative Principle by Grice Then different examples of Direct and Indirect Speech Acts will be analysed that will show the difference between the two forms Some of the used examples are made up and some are dialogues taken from the TV series The Big Bang Theory as well as The Walking Dead To explain how one can interpret the implicature in an utterance the inference theory by Gordon and Lakoff will be taken into account

In the end it is made clear that the success of Indirect Speech Acts depends on the context in which the utterance is made and also on other external conditions which the speaker cannot control himself as the speaker often requests a hearer uptake. Different texts by Austin, Thomas, Levinson, Renkema, Cruse and Yule will be studied to get an answer to the research question. Special focus will be put on the Indirect Speech Acts as they can be ambiguous and ask for a hearer uptake to be successful.
