## **Slow Death 09:**

*438 Days* Jonathan Franklin, 2015-11-17 The miraculous account of the man who survived alone and adrift at sea longer than anyone in recorded history For fourteen months Alvarenga survived constant shark attacks He learned to catch fish with his bare hands He built a fish net from a pair of empty plastic bottles Taking apart the outboard motor he fashioned a huge fishhook Using fish vertebrae as needles he stitched together his own clothes Based on dozens of hours of interviews with Alvarenga and interviews with his colleagues search and rescue officials the medical team that saved his life and the remote islanders who nursed him back to health this is an epic tale of survival Print run 75 000 *Ardeth #09* Felipe

Hernández, 2022-12-06 Architecture is an inward looking discipline Its history conveys the norms of the discipline to an audience composed mostly of architects who are familiar with the work of their predecessors from whom they learnt or for whom they worked As such architecture singularises the multiple processes through which space is produced excluding difference in the pursuit of coherent narratives to sustain its authority and does so mainly through the figure of the architect For a long time now critics have shown how that figure is principally male However little has been said about the fact that the figure of the architect is also white a racial classification that refers not only to epidermal characteristics but to their national origin education and in most cases their class affiliation

**Faxed** Jonathan Coopersmith, 2015-02-28 *Faxed* is the first history of the facsimile machine the most famous recent example of a tool made obsolete by relentless technological innovation Jonathan Coopersmith recounts the multigenerational multinational history of that device from its origins to its workplace glory days in the process revealing how it helped create the accelerated communications information flow and vibrant visual culture that characterize our contemporary world Most people assume that the fax machine originated in the computer and electronics revolution of the late twentieth century but it was actually invented in 1843 Almost 150 years passed between the fax s invention in England and its widespread adoption in tech savvy Japan where it still enjoys a surprising popularity Over and over again faxing s promise to deliver messages instantaneously paled before easier less expensive modes of communication first telegraphy then radio and television and finally digitalization in the form of email the World Wide Web and cell phones By 2010 faxing had largely disappeared having fallen victim to the same technological and economic processes that had created it Based on archival research and interviews spanning two centuries and three continents Coopersmith s book recovers the lost history of a once ubiquitous technology Written in accessible language that should appeal to engineers and policymakers as well as historians *Faxed* explores themes of technology push and market pull user based innovation and blackboxing the packaging of complex skills and technologies into packages designed for novices while revealing the inventions inspired by the fax how the demand for fax machines eventually caught up with their availability and why subsequent shifts in user preferences rendered them mostly pass *Life Without Parole* Ross

Kleinstuber, Jeremiah Coldsmith, Margaret Leigey, Sandra Joy, 2022-04-19 This book is an in depth critical examination of all

pertinent aspects of life without parole LWOP Empirically assessing key arguments that advance LWOP including as an alternative to the death penalty it reveals that not only is the punishment cruel while not providing any societal benefits it is actually detrimental to society Over the last 30 years LWOP has exploded in the United States While the use of capital punishment over that same time period has declined it must be recognized that LWOP is in fact a hidden death sentence It is however implemented in a way that allows society to largely ignore this truth While capital punishment has rightfully been subject to intense debate and scholarship LWOP has mostly escaped such scrutiny In fact LWOP has been touted by both death penalty abolitionists and by tough on crime conservatives which has allowed it to flourish under the radar Specifically abolitionists have advanced LWOP as a palatable alternative to capital punishment which they perceive as inhumane error prone costly and racially biased Conservatives meanwhile advocate for LWOP as an effective means of fighting crime a just form of retribution and necessary tool for managing incorrigible offenders This book seeks to tap into and help inform this growing debate by subjecting these key arguments to empirical scrutiny The results of those analyses fail to produce any evidence in support of any of those various justifications and therefore suggest that LWOP should be abolished and replaced with life sentences that come with parole eligibility after a maximum of 25 years The book will be of great interest to students and scholars of criminology and criminal justice and will also have crossover appeal into the fields of law political science and sociology It will also appeal to criminal justice professionals lawmakers activists and attorneys as well as death penalty abolitionists opponents of mass incarceration advocates for sentencing reform and supporters of prisoners rights

*The Great Music City* Andrea Baker,2019-03-01 In the 1960s as gentrification took hold of New York City Jane Jacobs predicted that the city would become the true player in the global system Indeed in the 21st century more meaningful comparisons can be made between cities than between nations and states Based on case studies of Melbourne Austin and Berlin this book is the first in depth study to combine academic and industry analysis of the music cities phenomenon Using four distinctly defined algorithms as benchmarks it interrogates Richard Florida's creative cities thesis and applies a much needed synergy of urban sociology and musicology to the concept mediated by a journalism lens Building on seminal work by Robert Park Lewis Mumford and Jane Jacobs it argues that journalists are the cultural branders and street theorists whose ethnographic approach offers critical insights into the urban sociability of music activity

*Rehabilitative Postsocialism* Katerina Kolárová,2025-06-30 Kate in a Kol ov's *Rehabilitative Postsocialism* offers a timely interdisciplinary and intersectional analysis of how disability race class and gender operate as ideological tools within the postsocialist Czech Republic formerly Czechoslovakia Kol ov presents

postsocialism as an analytic that can and should be brought to bear to understand cultural politics economic formations and state politics through the present day Rehabilitative Postsocialism names disability sexuality and race as central yet invisible to negotiations of the postsocialist consensus Drawing from a rich and varied archive Rehabilitative Postsocialism maps the formation of new structures of inequalities and social imaginaries of wellness merit and justice in order to understand current articulations of global disenchantment with democracy social justice and solidarity The book also makes clear that disability race and ethnicity continue to circulate in depictions of Eastern Europe as suspended in a chronic developmental delay Rehabilitative Postsocialism both situates this positioning within its political and historical formation and offers the analytical tools to challenge its continued deployment *Places of Invention* Arthur P. Molella, Anna Karvellas, 2015-06-30

The companion book to an upcoming museum exhibition of the same name *Places of Invention* seeks to answer timely questions about the nature of invention and innovation What is it about some places that sparks invention and innovation Is it simply being at the right place at the right time or is it more than that How does place whether physical social or cultural support constrain and shape innovation Why does invention flourish in one spot but struggle in another even very similar location In short Why there Why then *Places of Invention* frames current and historic conversation on the relationship between place and creativity citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History's Lemelson Center for the Study of Invention and Innovation The book is built around six place case studies Hartford CT late 1800s Hollywood CA 1930s Medical Alley MN 1950s Bronx NY 1970s Silicon Valley CA 1970s 1980s and Fort Collins CO 2010s Interspersed with these case studies are dispatches from three learning labs detailing Smithsonian Affiliate museums work using *Places of Invention* as a model for documenting local invention and innovation Written by exhibition curators each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people ready resources and inspiring surroundings Like the locations it explores *Places of Invention* shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond
