**Gemma Calvert, Charles Spence, Barry

Smell And Taste:

Taste and Smell Disorders Allen M. Seiden, 1997 Approximately two million Americans suffer from taste and smell disorders. This much needed book provides complete information on the pathophysiology, anatomy, biochemistry, patient evaluation, and treatment of chemosensory disorders. More than a dozen new topics are covered including **Taste and Smell**. Thomas Hummel, Antje Welge-Lüssen, 2006 Chemosensory dysfunction is a quite frequently occurring problem which significantly affects the patient's quality of life. It can result from infectious agents, environmental factors, toxins, traumatic brain injuries, as well as neurodegenerative diseases. This publication provides up to date articles on the chemical senses including the olfactory, trigeminal, and gustatory systems. The vomeronasal system and its potential significance in humans is also discussed. Based on recent functional imaging data, the book provides an overview on how the lower senses function, how they work together, for example, to produce flavor, how they can be damaged and repaired, and how the function of human chemical senses can be assessed. The publication focuses on chemosensory dysfunction and pays particular attention to taste and its disorders. Renowned experts in their fields of research have contributed their findings to this topical update on chemosensory disorders and made this volume indispensable reading for otorhinolaryngologists and neurologists.

Bioinspired Smell and Taste Sensors Ping Wang, Qingjun Liu, Chunsheng Wu, K. Jimmy Hsia, 2015-10-03 This book discusses the field of bioinspired smell and taste sensors which includes many new areas: sensitive materials, physiological modelling, and simulation, and more. Similar to biological chemical sensing systems, bioinspired smell and taste sensors are characterized with fast response, high specificity, and sensitivity. One of the most important parts of the field is that of sensitive elements originated from biological components which enable the detection of chemical signals by mimicking the biological mechanisms. This book detailedly describes processing devices, recognition principles of sensitive materials, and concrete realizations. It is written for researchers, engineers, and biologists who engage in interdisciplinary research and applications. Dr. Ping Wang is a professor at Zhejiang University, Hangzhou, China. Dr. Qingjun Liu is a professor at Zhejiang University, Hangzhou, China. Dr. Chunsheng Wu is an associated professor at Zhejiang University, Hangzhou, China. Dr. K. Jimmy Hsia is a professor at University of Illinois at Urbana-Champaign, Urbana, USA. **Olfaction, Taste, and Cognition**

Catherine Rouby, Benoist Schaal, Danièle Dubois, Rémi Gervais, A. Holley, 2002-10-28 The human organs of perception are constantly bombarded with chemicals from the environment. Our bodies have in turn developed complex processing systems which manifest themselves in our emotions, memory, and language. Yet the available data on the high order cognitive implications of taste and smell are scattered among journals in many fields with no single source synthesizing the large body of knowledge, much of which has appeared in the last decade. This book presents the first multidisciplinary synthesis of the literature in olfactory and gustatory cognition. Leading experts have written chapters on many facets of taste and smell including odor memory, cortical representations, psychophysics, and functional imaging studies, genetic variation in taste and

the hedonistic dimensions of odors The approach is integrative combining perspectives from neuroscience psychology anthropology philosophy and linguistics and is appropriate for students and researchers in all of these areas who seek an authoritative reference on olfaction taste and cognition **Smelling and Tasting** Alvin Silverstein, Virginia B. Silverstein, Laura Silverstein Nunn, 2002-01-01 Describes the function of smells and tastes how the brain translates and processes these messages and the research in these areas **Psychology** Don H. Hockenbury, Sandra E. Hockenbury, 2002-07-19 New edition of the Hockenburys text which draws on their extensive teaching and writing experiences to speak directly to students who are new to psychology Smell and Taste Complaints Christopher H. Hawkes, 2002 This practical brief guide to diagnosing and treating causes of disorders of smell and taste is the only accessible handbook available for non experts Signs of problems with these two senses may be ignored by the patient or downplayed by the physician but the disruption of the senses may be a first sign of serious illness The wide range of conditions responsible for disorders of smell and taste make it difficult to determine the single underlying cause and to decide upon the best possible plan of treatment Disorders of Smell and Taste will help physicians manage some of these patients thereby minimizing references to specialists The only accessible handbook available for the non expert Pocket sized guide provides easy access for clinicians Practical and brief this handbook aids physicians in the diagnosis and treatment of sense disorders *See, Hear, Smell, Taste, and Touch* Andrew Collins, 2006 Diagrams and simple experiments are used to explain the five senses *Smell and Taste Disorders* Christopher H. Hawkes, Richard L. Doty, 2018-01-25 Loss of the sense of smell or taste is often a sign of neurological disease Evaluating chemosensation the senses of smell and taste during neurological examination can help early detection of neurodegenerative conditions such as Parkinson s and Alzheimer s disease The importance of such testing is now receiving increasingly high profile in the medical curriculum In this book olfactory conditions are completely updated and the sense of taste is now included in similar detail It is written by experts in the field covering anatomy and physiology of human olfaction and taste how they can be measured and their relevance to a wide range of major disorders such as diabetes kidney disease Alzheimer s and Parkinson s disease The Olfactory Vector Hypothesis that suggests a neuropathogen may enter the nose en route to the brain is evaluated in detail This introduction to smell and taste disorders is an essential guide for neurologists neurosurgeons otolaryngologists medical trainees and chemosensory scientists **The Handbook of Multisensory Processes** Gemma Calvert, Charles Spence, Barry E. Stein, 2004 Research is suggesting that rather than our senses being independent perception is fundamentally a multisensory experience This handbook reviews the evidence and explores the theory of broad underlying principles that govern sensory interactions regardless of the specific senses involved
