Sociology Of Developmental Behavior:

Human Development and Criminal Behavior Michael Tonry, Lloyd E. Ohlin, David P. Farrington, 2012-12-06 Human Development and Criminal Behavior proposes an extensive agenda for crime research. The book is part of a pioneering effort to understand the causes of crime particularly its developmental course. It defines and sets the conditions necessary to conduct an accelerated longitudinal study of individuals at risk to become engaged in criminal careers. This work offers a blueprint for research to elucidate and possibly prevent crime in our society. **The Development of Criminal and**

Antisocial Behavior Julien Morizot, Lila Kazemian, 2014-12-02 This edited book summarizes the current state of knowledge on the development of criminal and antisocial behavior over the life course. It focuses mainly on the developmental perspective which has had a paradigmatic influence on current theoretical and empirical works in criminology. With a multidisciplinary perspective, the book reviews: a) the fundamental concepts of developmental criminology; b) the risk factors and developmental processes related to the most salient personal e.g. genetics, personality and environmental e.g. family, peers, school domains explaining the development of criminal and antisocial behavior; c) the developmental issues related to a number of special themes e.g. women, criminality, street gangs; and d) the applied and policy implications of research in developmental criminology. In each chapter, prominent researchers from different disciplines such as criminology and psychology summarize the state of knowledge on a specific topic, identify the shortcomings of past research, offer recommendations for future research needs. Life-Span Development and Behavior David L. Featherman, Richard M.

Lerner, Marion Perlmutter, 2014-01-14 This volume continues the tradition of the Life Span Development Series, presenting overviews of research programs on a variety of developmental topics. Research and theory in life span development have given increased attention to the issues of constancy and change in human development and to the opportunities for and constraints on plasticity in structure and function across life. Acknowledging the need for and existence of interconnection between age and developmental periods, it focuses on conditions for possibly discontinuous development that emerge at later periods. Contributors to this series are sensitive to the restrictive consequences of studying only specific age periods such as old age, infancy or adolescence. Each scholar attempts to relate the facts about one age group to similar facts about other age groups and to move toward the study of transformation of characteristics and processes over the life span. Dimensions of Human Behavior Elizabeth D. Hutchison, 2008 What is it about the multiple dimensions of person, environment and time that social workers need to understand? How do diversity and inequality play a role in human behavior? How does our biology, spirituality and psychology impact behavior? And finally, what can we learn about how social institutions, families, groups, organizations and communities impact the vast range of human behaviors? The Third Edition of this powerful text aims to examine these dimensions by expanding on these important questions. In this text, you will meet social workers and clients from a variety of work settings and situations who bring the passion and power of social work to life through engaging case

Developmental Theories Of Crime And Delinquency Terence P. Thornberry, In *Developmental Theories of Crime and Delinquency* Terence P Thornberry and his contributors show that criminal behavior is not a static human attribute but ebbs and flows over the life course of the individual Criminal behavior tends to follow a distinct psychological pattern It is relatively uncommon during childhood is initiated by most offenders during adolescence flourishes during late adolescence and early adulthood and usually diminishes or disappears by the mid twenties This pattern is not characteristic of all people some never commit crimes and others become career criminals but it is a general description of the developmental pattern of criminal offenders This pattern has profound implications for theories of crime and delinquency Not only does it explain initiation into maintenance of and desistance from involvement in crime it offers insight into why crime flourishes during adolescence Traditional theories of crime and delinquency have often failed to distinguish among different phases of criminal careers They tend to ignore developmental changes that occur across a person s life course changes that coincide with and can explain the causes and patterns of criminal behavior This paperback edition of the seventh volume of the distinguished series *Advances in Criminological Theory* moves us from static identifications of the criminal by presenting a broad range of developmental explanations of crime Each contributor articulates a developmental or life course perspective in explaining how people become involved in delinquency and crime Each covers a wide range of theoretical territory and reveals how a developmental perspective enhances the explanatory power of traditional theories of crime and delinquency This volume is an invaluable tool for criminologists sociologists psychologists and other professionals seeking to teach how crime and violence can be understood in our culture
