Understandable Statistics Eighth Edition, Custom Publication Brase, 2005-04 **A New Dictionary of the Social Sciences, Second Edition** G. Duncan Mitchell, Designed especially to meet the needs of beginners in all the social sciences A New Dictionary of the Social Sciences follows its highly successful distinguished predecessor A Dictionary of Sociology first published in 1968 Many of the entries have been revised and updated to keep abreast of the recent proliferation in the vocabulary of the social sciences The entries include social psychological terms terms in social and cultural anthropology terms common to political science social administration and

social work In the choice of words a generous definition of social science was employed making the dictionary a very useful reference source for all beginners in the social sciences Some terms are explained quite briefly while others are given lengthy treatment according to the further assumptions that some sociological terms can imply Thus long entries are given on words such as authority consensus phenomenology role social stratification structuralism whereas short and succinct entries suffice for words such as agnate eidōs or mores A number of short biographical sketches are also included The contributors are all scholars working in universities predominantly in the United Kingdom and the United States More than a glossary A New Dictionary of the Social Sciences helps the student understand some of the theoretical considerations underlying the use of sociological terms as well as something of their history and therefore resembles an encyclopedia in its scope and depth of information

Moral Markets Nico Stehr, 2015-12-03 Nothing affects modern society more than the decisions made in the marketplace especially but not only the judgments of consumers Stehr's designation of a new stage in modern societies with the term moral markets signals a further development in the social evolution of markets Market theories still widely in use today emerged in a society that no longer exists Consumers were hardly in evidence at all in early theories of the market Today growing affluence greater knowledge and high speed communication among consumers builds into the marketplace notions of fairness solidarity environment health and political considerations imbued with a long term perspective that can disrupt short term pursuits of the best buy Importantly such social goals individual apprehensions and modes of consumer conduct become inscribed today in products and services offered in the marketplace as well as in the rules and regulations that govern market relations Stehr uses examples to illustrate these trends and build new theory fitting today's changing consumerism

Sociology Joan Ferrante-Wallace, 2006

Deviant Behavior Erich Goode, 2019-04-23 Deviant Behavior offers an engaging and wide ranging discussion of deviant

behavior beliefs and conditions It examines how the society defines labels and reacts to whatever and whoever falls under this stigmatizing process thereby providing a distinctly sociological approach to the phenomenon The central focus in defining what and who is deviant is the audience members of the influential social collectivities that determine the outcome of this process The discussion in this volume encompasses both the explanatory or positivist approach and the constructionist or labeling perspectives thereby lending a broad and inclusive vista on deviance The central chapters in the book explore specific instances or forms of deviance including crime substance abuse and mental disorder all of which share the quality that they and their actors believers or bearers may be judged by these influential parties in a negative or derogatory fashion And throughout *Deviant Behavior* the author emphasizes that to the sociologist the term deviant is completely non pejorative no implication of inferiority or inherent stigma is implied what the author emphasizes is that specific members of the society social circles or collectivities define and treat certain parties in a derogatory fashion the sociologist does not share in this stigmatizing process but observes and describes it

The Nature and Types of Sociological Theory Don Martindale,2013-11-05 First Published in 1998 This is Volume XI of twenty two in a series on Social Theory and Methodology Notions are widespread that sociological theory is either an industrious activity on the drawing boards of the architects of fantasy or a branch of esoterics operating in a shadowy realm of semi darkness The present study holds neither of these conceptions of sociological The present study's function is to illuminate the difference between one theory and another The power and reliability of a theory are not always evident all at once A theory may have a power to explain what was not originally anticipated it may also disclose the existence of problems it cannot explain

Survival of the African American Family Karen S. Jewell,2003-11-30 Challenging widely held beliefs this provocative book offers nothing less than a blueprint for enhancing the social and economic status of African American families Despite the implementation of liberal social policies in the 1960s and 70s successive U S administrations continue to dash the hopes and expectations of African Americans who remain subject to racism and discrimination Arguing that social policies and their absence have affected the stability of the African American family Jewell refutes the myth of significant progress for African American families emanating from the civil rights era exposing the myriad reasons why greater advancement toward equality has not occurred in major societal institutions Attention is focused on the extent to which African American families have been adversely affected by a process of assimilation that was socio psychological rather than

economic This new edition builds upon the first edition and is revised and expanded to reflect new and persistent institutional policies and practices of race gender and class inequality facing African American families The revised edition explores such issues as racial profiling capital punishment police brutality predatory lending No Child Left Behind welfare reform affirmative action and racial disparities in healthcare academic achievement and home ownership Jewell proposes a variety of strategies and policies that are needed to ensure greater social and economic equality and justice for African American families *Once More Unto the Breach, Dear Friends* Irving Louis Horowitz, 2017-07-05 Candor breadth judiciousness all these are attributes Irving Louis Horowitz possesses as a scholar Under his leadership there is no academic publication from which I have learned as much as Transaction Society David Riesman Harvard University We are all happy beneficiaries of Horowitz's acutely perceptive and often devastatingly plain spoken self as sociologist and sage broad gauged scholar dedicated teacher tough minded editor and publisher with an ingrained sense of fairness Robert K Merton Columbia University **Rethorizing Race and Whiteness in the 21st Century** Charles A. Gallagher, France Winddance Twine, 2014-01-02 Rethorizing Race and Whiteness in the 21st Century examines the role whiteness and white identities play in framing and reworking racial categories hierarchies and boundaries within the context of nation class gender and immigration It takes as its theoretical starting point the understanding that whiteness is not and nor has it ever been a static uniform category of social identification The scholarship in this book uses new empirical studies to show whiteness as a multiplicity of identities that are historically grounded class specific politically manipulated and gendered social relations that inhabit local custom and national sentiment Contributors to this book examine a wide range of issues yet all chapters are linked by one common denominator they examine how power and oppression are articulated redefined and asserted through various political discourses and cultural practices that privilege whiteness even when the prerogatives of the dominant group are contested Rethorizing Race and Whiteness in the 21st Century is an important new contribution to the study of whiteness for academics researchers and advanced students of Ethnic Studies Sociology Political Science and Ethnography This book was originally published as a special issue of Ethnic and Racial Studies *Catalog of Copyright Entries. Munene, 2018-02-15 Contextualizing

and Organizing Contingent Faculty Reclaiming Academic Labor in Universities seeks to develop a counterculture that eschews the neoliberal ideology and interloping market values in higher education More than merely lamenting the disruptive effects of these marketplace values in higher education institutions it develops both theoretical insights and practical organizing strategies pertinent to challenging new academic capitalist values and behaviors Contributors local and international present cases from various institutions to illuminate how national trends concerning contingent faculty are articulated implemented and challenged at the local level They present organizing strategies which are analyzed from an interdisciplinary perspective providing a thorough and comprehensive view of the contingent labor movement This book will provide useful lessons to a broad array of audiences in universities labor movements and national and local governments

Intimate Relationships across Cultures Charles T. Hill, 2019-06-20 A ground breaking study of the ways that intimate relationships are similar around the world and the ways they are different Defensive Environmentalists and the Dynamics of Global Reform Thomas Rudel, 2013-03-11 As global environmental changes become increasingly evident and efforts to respond to these changes fall short of expectations questions about the circumstances that generate environmental reforms become more pressing Defensive Environmentalists and the Dynamics of Global Reform answers these questions through a historical analysis of two processes that have contributed to environmental reforms one in which people become defensive environmentalists concerned about environmental problems close to home and another in which people become altruistic environmentalists intent on alleviating global problems after experiencing catastrophic events such as hurricanes droughts and fires These focusing events make reform more urgent and convince people to become altruistic environmentalists Bolstered by defensive environmentalists the altruists gain strength in environmental politics and reforms occur
