Social Stratification: Volume 1, Sociological Studies J. A. Jackson, 1968-11-02 All the papers in the first volume of Sociological Studies are centred round the theme of social stratification **Methodological Individualism** Lars Udehn, 2002-11-01 Throughout the history of social thought there has been a constant battle over the true nature of society and the best way to understand and explain it This volume covers the development of methodological individualism including the individualist theory of society from Greek antiquity to modern social science It is a comprehensive and systematic treatment of methodological individualism in all its manifestations *The Limits of Public Choice* Lars Udehn, 2002-09-11 Public choice has been one of the most important developments in the social sciences in the last twenty years However there are many people who are frustrated by the uncritical importing of ideas from economics into political science Public Choice uses both empirical evidence and theoretical analysis to argue that the economic theory of politics is limited in scope and fertility In order to arrive at a more comprehensive understanding of political life political scientists must learn from both economists and sociologists *Repression and Mobilization* Christian Davenport, Hank Johnston, Carol McClurg Mueller, 2005-01-01 It was the summer of 2001 when political scientists and sociologists gathered at the University of Virginia to present new information and assess the status of study about political mobilization and political repression The 10 papers presented and printed here focus on interactions between protesters and police case studies come from Germany the

Media of Reason Matthias Vogel, 2012-11-06 Matthias Vogel challenges the belief dominant in contemporary philosophy that reason is determined solely by our discursive linguistic abilities as communicative beings In his view the medium of language is not the only force of reason Music art and other nonlinguistic forms of communication and understanding are also significant Introducing an expansive theory of mind that accounts for highly sophisticated penetrative media Vogel advances a novel conception of rationality while freeing philosophy from its exclusive attachment to linguistics Vogel's media of reason treats all kinds of understanding and thought propositional and nonpropositional as important to the processes and production of knowledge and thinking By developing an account of rationality grounded in a new conception of media he

raises the profile of the prelinguistic and nonlinguistic dimensions of rationality and advances the Enlightenment project buffering it against the postmodern critique that the movement fails to appreciate aesthetic experience Guided by the work of Jürgen Habermas Donald Davidson and a range of media theorists including Marshall McLuhan Vogel rebuilds if he does not remake the relationship among various forms of media books movies newspapers the Internet and television while offering an original and exciting contribution to media theory
