Religions have always been associated with particular forms of knowledge often knowledge accorded special significance and

sometimes knowledge at odds with prevailing understandings of truth and authority in wider society New religious movements emerge on the basis of reformulated often controversial understandings of how the world works and where ultimate meaning can be found Governments have risen and fallen on the basis of such differences and global conflict has raged around competing claims about the origins and content of religious truth Such concerns give rise to recurrent questions faced by academics governments and the general public How do we treat statements made by religious groups and on what basis are they made What authorities lie behind religious claims to truth How can competing claims about knowledge be resolved Are there instances when it is appropriate to police religious knowledge claims or restrict their public expression This book addresses the relationship between religion and knowledge from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge

Richardson, 2003-09-02 In the last half century new religious movements or cults of one sort and another have mushroomed throughout the US and Europe Increasingly these groups have been met with attempts to monitor and control them on the part of the state and concerns about the protection of religious consumers have been set against the democratic right to religious freedom In this collection leading sociologists of religion from the UK US Western and Eastern Europe debate the political practical and ethical issues

which arise from these changes in the religious landscape

A Future for Religion? William H. Swatos, 1993 In the 1960s many sociologists proclaimed traditional religion to be in its death throes But just as secularization gained nearly universal acceptance among scholars religious resurgence burst forth from many directions new religious movements and the growth of Islamic fundamentalism for example In *A Future for Religion* contributors ask whether if such dynamic forces are at work is religion really dying They discuss issues usually excluded from books on the sociology of religion including religious experience emotional renewal religion and the body
