## **Soe The Scientific Secrets:**

**SOE** Fredric Boyce, Douglas Hugh Everett, 2003 This book is unique and well documented account of how Winston Churchill's government used scientific and technical skills to support the heroic efforts of SOE agents world wide during World War II

**SOE: The Scientific Secrets** Fredric Boyce, 2011-11-08 The history of Special Operations Executive SOE seems to spring a never ending run of surprises and here are some more This book explores the mysterious world of the tools SOE used for their missions of subversion and sabotage An often grim reality is confronted that is more akin with the world of James Bond and Q's workshop than previously believed Written by two scientists one of whom served in the SOE and one who was tasked with clearing up after it was disbanded their insider knowledge presents a clear account of the way in which SOE's inventors worked From high explosive technology to chemical and biological devices from the techniques of air supply to incendiarism from camouflage to underwater warfare and from radio communications to weaponry SOE The Scientific Secrets is a revelation about the tools that allowed the murky world of spying and spies to operate during wartime

**SOE's Ultimate Deception** Fredric Boyce, 2009-03-12 In the closing months of the Second World War General Eisenhower exhorted the Western Allied forces to redouble their efforts to break the German will to resist In considering this appeal General Gubbins whose Special Operations Executive was making a significant contribution to the liberation of occupied territory was faced with a fundamental difficulty in the case of Germany Although opposition to Nazism was present in some areas it was neither organised nor pro Allied Then someone had the idea of creating an entirely fictional German resistance movement and selling it to the Nazi security authorities From January until April 1945 SOE rained propaganda leaflets on the hapless population fleeing the ruins of their cities and the oncoming Allied ground forces they broadcast messages to the resistance they planted the most scandalous lies about eminent Nazis and at the end they even dropped four agents on fictitious missions This imaginative response to Ike's exhortation and the sheer audacity of the operation itself demand to be told to a wider audience

**A ^AGenius for Deception** Nicholas Rankin, 2009-11-10 Nicholas Rankin offers a lively and comprehensive history of how Britain bluffed tricked and spied its way to victory in two world wars As Rankin shows a coherent program of strategic deception emerged in World War I resting on the pillars of camouflage propaganda secret intelligence and special forces Rankin vividly recounts such little known episodes as the invention of camouflage by two French artist soldiers the creation of dummy airfields for the Germans to bomb during the Blitz and the fabrication of an army that would supposedly invade Greece

**Operation Suicide** Robert Lyman, 2013-11-05 During the Second World War it is hard to imagine a situation where the British High Command could think that one of the only ways they could attack Hitler was to send ten canoeists with limpet mines to paddle one hundred miles up the Gironde estuary in the middle of winter in an attempt to sink German blockade ships in Bordeaux harbor Yet this is precisely what happened in 1942 The man who gave the go ahead for the audacious commando raid Lord Louis Mountbatten head of Combined Operations fully

anticipated that all ten men would die in the attempt Mountbatten wasn't far wrong two ripped their collapsible canoes as they were manhandling them out of the submarine two drowned when their canoes capsized entering the Gironde estuary and a further six were captured by the Germans and later executed By complete chance the two canoeists who managed to escape Major Blondie Hasler and Marine Bill Sparks stumbled into the arms of the French resistance Once in their care Hasler and Sparks made their way across France and into Spain crossing the Pyrenees in the company though they did not know it of a Gestapo agent intent on bringing down the resistance network Operation Suicide is the first account of this enthralling raid for over fifty years In utilizing primary source material including detailed German records captured by the British in 1944 which remained censored until 1976 Robert Lyman brings to life one of the most courageous and dramatic events to take place in the darkest days of the Second World War Churchill's School for Saboteurs Bernard O'Connor,2013-09-15 The secret life of Brickendonbury Manor the WW2 assassins saboteurs who set occupied Europe alight

**The Small Scale Raiding Force** Brian Lett,2013-10-23 The Small Scale Raiding Force SSRF was formed in February 1942 by Gus March Phillips with Major General Gubbins SOE European chief's approval March Phillips and his Maid of Honor Force had just had complete success with their operation POSTMASTER off West Africa Equipped with a specially adapted motor torpedo boat the SSRF immediately started planning for operations Op FROUDESLEY with the aim of destroying the battleship Tirpitz ran into technical problems and was delayed but in August and September three daring cross Channel missions were successfully carried out without loss The author describes these and the disastrous fourth operation ACQUATINT when all 10 SSRF men including March Phillips were killed or captured Despite this hammerblow SSRF now commanded by Geoffrey Appleyard made two raids on Sark a week later Again their story is fully told in this fascinating book along with those of three further 1942 raids Inter service rivalry the war within led to the break up of the SSRF in early 1943 The Author describes the many colourful characters who made up this special force including Anders Lassen VC Graham Hayes and Andre Desgranges the Free Frenchman whom the Gestapo turned This superbly researched book lifts the veil on a little known but highly effective special force unit and the gallant individuals who served in it As seen in Dorset Magazine Book of the Month Britain at War Magazine April 2014 Malice Aforethought Ian Jones,2016-08-31 An examination of the uses of explosive traps in a military context and the measures that have been taken to negate their effects and to neutralize them War has always provided a stimulus to technological development and throughout the twentieth century this new technology was harnessed to produce increasingly deadly and malicious types of explosives in the form of booby traps mines delayed action devices and mobile charges Designed constructed or adopted to kill or injure these lethal mechanisms function when a person disturbs or approaches a seemingly harmless object or performs an apparently safe act In other instances they are set off by remote control or automatically after a lapse of time Fully illustrated with diagrams and photographs Malice Aforethought traces the design deployment and effectiveness of these deadly devices throughout both

world wars to the Vietnam War Expertly and compellingly written this unique study is a tribute to the brave men who risked their lives daily to neutralize the booby traps laid in the dimly lit dugouts of the Western Front on the beaches of Normandy or in the dark and dangerous tunnels of Chu Chi

**Spies in the Congo** Susan Williams, 2016-08-09 In the 1940s the brightest minds of the United States and Nazi Germany raced to West Africa with a single mission to secure the essential ingredient of the atomic bomb and to make sure nobody saw them doing it Albert Einstein told President Franklin D Roosevelt in 1939 that the world's only supply of uniquely high quality uranium ore the key ingredient for bomb could be found in the Katanga province of the Belgian Congo at the Shinkolobwe Mine Once the US Manhattan Project was committed to developing atomic weapons for the war against Germany and Japan the rush to procure this uranium became a top priority one deemed vital to the welfare of the United States But covertly exporting it from Africa posed a major risk the ore had to travel via a spy infested Angolan port or 1 500 miles by rail through the Congo and then be shipped by boats or Pan Am Clippers to safety in the United States It could be poached or smuggled at any point on the orders of Nazi Germany To combat that threat the US Office of Strategic Services sent in a team of intrepid spies led by Wilbur Owings Dock Hogue to be America's eyes and ears and to protect its most precious and destructive cargo Packed with newly discovered details from American and British archives this is the gripping true story of the unsung heroism of a handful of good men and one woman in colonial Africa who risked their lives in the fight against fascism and helped deny Hitler his atomic bomb

**Britain's War Machine** David Edgerton, 2011-09-09 The familiar image of the British in the Second World War is that of the plucky underdog taking on German might David Edgerton's bold compelling new history shows the conflict in a new light with Britain as a very wealthy country formidable in arms ruthless in pursuit of its interests and in command of a global production system Rather than belittled by a Nazi behemoth Britain arguably had the world's most advanced mechanized forces It had not only a great empire but allies large and small Edgerton shows that Britain fought on many fronts and its many home fronts kept it exceptionally well supplied with weapons food and oil allowing it to mobilize to an extraordinary extent It created and deployed a vast empire of machines from the humble tramp steamer to the battleship from the rifle to the tank made in colossal factories the world over Scientists and engineers invented new weapons encouraged by a government and prime minister enthusiastic about the latest technologies The British indeed Churchillian vision of war and modernity was challenged by repeated defeat at the hands of less well equipped enemies Yet the end result was a vindication of this vision Like the United States a powerful Britain won a cheap victory while others paid a great price Putting resources machines and experts at the heart of a global rather than merely imperial story Britain's War Machine demolishes timeworn myths about wartime Britain and gives us a groundbreaking and often unsettling picture of a great power in action

The World War Two Reader Gordon Martel, 2004 This comprehensive reader provides an overview of research in the study of the Second World War and includes chapters by some of the best known and most innovative scholars working today It gives

attention to the fighting of the war throughout the world      The Means to Kill Gerrit Dworok, Frank Jacob, 2015-12-03 Throughout human history technological innovation has functioned as a driver of civilization and inspired many people's belief in progress. When it comes to warfare where technology is applied with a cruel and deadly logic, a nuanced view is needed. From siege engines to drones, innovation has often served a less enlightened aim: elimination of the enemy. This collection of new essays from specialists in military history examines the interdependence between war and technology from a number of regional perspectives.

*Spycraft* Robert Wallace, Harold Keith Melton, 2008 An insider's tour of the past half century's espionage technologies also recounts some of the CIA's most secretive operations and how they have been performed using state-of-the-art spy instruments.

Gold Run Robert Pearson, 2015-06-04 The WWII story of Norwegian resistance in the face of Nazi invasion, a daring escape for the Norwegian royal family and fifty tons of gold bullion. *Gold Run* recounts the thrilling story of the loyal Norwegians who rescued the Norwegian royal family government and nearly fifty tons of gold bullion from invading Nazis during World War II. One of the greatest gold snatches in history, it is a tale of loyal citizens who achieved an incredible feat against overwhelming odds through bravery, endurance, and leadership, plus a little good fortune and help from the British Royal Navy. The German invasion on the night of April 9, 1940, took Norway almost completely unawares. But one small coastal battery took swift action to protect the country's leadership. In desperate haste, the royal family fled Oslo by rail, dodging bombs and strafing. With extraordinary ingenuity, the gold was moved by road, rail, and fishing boat, hotly pursued by the Germans. After several instances of near disaster, the Norwegians managed to get the gold to the coast where the Royal Navy came to the rescue. It was taken off in three Royal Navy Cruisers: HMS Enterprise, Galatea, and Glasgow. The ships were attacked in port, then constantly harassed and bombed by the Luftwaffe as they made their way back to the United Kingdom. The Germans had gained a country but lost a king, a government, and a huge amount of bullion that would have financed their war machine.

The Global Infrastructure of the Special Operations Executive Derwin Gregory, 2021-12-23 During the Second World War, the British government established the Special Operations Executive (SOE) for the purpose of coordinating all action by way of subversion and sabotage against the enemy overseas. Although the overseas operations of this branch of the British Secret Services are relatively well known, few studies have explored the backroom sections of this organisation. This book draws together the infrastructure developed to support an agent's journey from recruitment to despatch to the field. At the start of the Second World War, there were few existing facilities established within the UK to support clandestine operations. As the conflict progressed in parallel to learning the operational procedures of their trade, SOE also had to rapidly expand their support infrastructure around the world. The organisation could effectively support their agents only by establishing facilities dedicated to training, research and development, supply, transportation, communication, and command and control. By predominately focusing on the organisation's agent-facing infrastructure, this book provides a backdrop to the brave men and women who conducted operations abroad. In addition, it gives an overview of

the facilities in which SOE's backroom staff lived and worked The book will be of interest to students and scholars of archaeology history and war studies     The Cockleshell Canoes Quentin Rees,2008-12-15 The gripping story of the development of the Cockleshell Canoes     **Clandestine Lives of Colonel David Smiley** Clive Jones,2019-05-21 Drawing on extensive interviews and archival research this biography uncovers the motivations and ideals that informed Smiley's commitment to covert action and intelligence during the Second World War and early part of the Cold War often among tribally based societies With particular reference to operations in Albania Oman and Yemen it addresses the wider issues of accountability and control of clandestine operations     Brainwash Dominic Streatfeild,2024-05-01 Vivid and disturbing Brainwash is essential insight into the modern practice of interrogation and torture from the acclaimed author of Cocaine With access to formerly classified documentation and interviews from the CIA US Army MI5 MI6 and British Intelligence Corps Dominic Streatfeild traces the evolution of mind control from its origins in the Cold War to the height of today's war on terror Behind the front lines of every war in the world prisoners are forced to sit for interrogation manipulated coerced and sometimes tortured often without ever being touched Brainwash is a history of the methods intended to destroy and reconstruct the minds of captives to extract information convert dissidents and lead peaceful men to kill and be killed A gripping survey of the post war history of interrogation techniques Telegraph on Sunday UK Breathless reads like a spy thriller The Guardian UK Marvelously engrossing This book is a series of wonderfully detailed and cleverly told stories each of which debunks the brainwashing myth Streatfeild's narrative control cannot be faulted His research is formidable The Sunday Times UK An expansive and multifaceted exploration of brainwashing in its multitude of forms Booklist     **Station 12** Des Turner,2011-09-30 The full story of Aston House in the Second World War has never been told before Its activities were top secret and as important to the Allied war effort as those of Bletchley Park but in a different way Situated near Stevenage Aston House was one of many British country houses requisitioned during the Second World War by the Special Operations Executive SOE Born out of Bletchley Park where it began life as SIS Section D for Destruction Station 12's scientific and military personnel invented made and supplied toys for the Commandos Special Boat Service SAS and resistance groups Included in their deadly arsenal of weapons were plastic explosives limpet mines pressure switches tree spigots incendiary bombs incendiary liquids and arrows and a variety of time fuses They worked on the tools for famous operations such as the St Nazaire and Dieppe Raids and the assassination of Himmler's deputy in Prague Also revealed are the human stories of personnel stationed in this extremely remote village and the explosive pranks they played on each other and certain visitors which add some light relief to their destructive purpose     **Disrupt and Deny** Rory Cormac,2018-05-09 British leaders use spies and Special Forces to interfere in the affairs of others discreetly and deniably Since 1945 MI6 has spread misinformation designed to divide and discredit targets from the Middle East to Eastern Europe and Northern Ireland It has instigated whispering campaigns and planted false evidence on officials working behind the Iron Curtain tried to

foment revolution in Albania blown up ships to prevent the passage of refugees to Israel and secretly funnelled aid to insurgents in Afghanistan and dissidents in Poland MI6 has launched cultural and economic warfare against Iceland and Czechoslovakia It has tried to instigate coups in Congo Egypt Syria Saudi Arabia Iran and elsewhere Through bribery and blackmail Britain has rigged elections as colonies moved to independence Britain has fought secret wars in Yemen Indonesia and Oman and discreetly used Special Forces to eliminate enemies from colonial Malaya to Libya during the Arab Spring This is covert action a vital though controversial tool of statecraft and perhaps the most sensitive of all government activity If used wisely it can play an important role in pursuing national interests in a dangerous world If used poorly it can cause political scandal or worse In *Disrupt and Deny* Rory Cormac tells the remarkable true story of Britain's secret scheming against its enemies as well as its friends of intrigue and manoeuvring within the darkest corridors of Whitehall where officials fought to maintain control of this most sensitive and seductive work and above all of Britain's attempt to use smoke and mirrors to mask decline He reveals hitherto secret operations the slush funds that paid for them and the battles in Whitehall that shaped them
