Guide to Sources for Agricultural and Biological Research J. Richard Blanchard, Lois Farrell, 2023-07-28      **Drylands**  
Peter Beaumont, 2014-04-08 Drylands which cover over half the world's area have witnessed rapid development exploitation and change with the discovery of mineral reserves urbanization and population growth Environmental management is critical to the conservation and sustainable use of resources This comprehensive text offers a systematic study of the physical nature of drylands and the history of human response to and uses of these harsh landscapes Detailed case studies including urban as well as pastoral drylands from California to Soviet Central Asia the Middle East the Sahara and Australia contrast different management approaches and problems      Desertification and Land Degradation Ajai, Rimjhim Bhatnagar, 2022-03-30  
Desertification and land degradation are complex phenomena and we need to understand their causes consequences and means to mitigate and combat their impact Therefore this book aims to explain the concept and characteristics of drylands desert and desertification land degradation wastelands and the concept of ecosystem services It also discusses various types of processes of land degradations their characteristics physics and indicators along with mapping monitoring and assessment of methods involved Concept of Ocean Biological Deserts is discussed along with international and regional efforts towards combating land degradation and desertification Key Features Provides all the aspect of desertification and land degradation at one place Includes comprehensive methods to monitor different desertification land degradation processes Comprehensive overview of the mapping monitoring and modelling techniques Role of space borne data in identifying monitoring and combating desertification is evaluated and reported with real case studies Explains the concept of ocean biological deserts their characteristics and mapping      **Water Quality Management Under Conditions of Scarcity** Hillel Shuval, 2012-12-02 Water Quality Management under Conditions of Scarcity Israel as a Case Study focuses on the problems of water quality management under circumstances of severe water resource scarcity particularly in Israel This book examines how Israel's engineers and scientists deal with the development and management of its limited water resources Comprised of 13 chapters this book starts with an overview of the interrelationships between man's well being and the water environment This text then explores the goal of water quality control in protecting human health and well being from exposure to toxic chemicals and detrimental pathogenic microorganisms Other chapters discuss the development of science technology and administrative practice dealing with water quality control including hygiene environmental health sanitation sanitary engineering ecology and environmental protection The final chapter deals with the concept of hierarchical and selective water use Biologists engineers chemists agronomists public health officers and water resources authorities will find this book extremely useful      **Sand Dune Stabilization, Shelterbelts and Afforestation in Dry Zones**, 1985-01-01  
**Biology Bulletin of the Academy of Sciences of the USSR**. Akademii nauk SSSR., 1979      **Tropical Agriculture Research Series**, 1982      **A Handbook of Soil Terminology, Correlation and Classification** Pavel

Krasilnikov, Juan-Jose Ibanez Marti, Richard Arnold, Serghei Shoba, 2009-12-01 Soil classification and terminology are fundamental issues for the clear understanding and communication of the subject However while there are many national soil classification systems these do not directly correlate with each other This leads to confusion and great difficulty in undertaking comparative scientific research that draws on more than one system and in making sense of international scientific papers using a system that is unfamiliar to the reader This book aims to clarify this position by describing and comparing different systems and evaluating them in the context of the World Reference Base WRB for Soil Resources The latter was set up to resolve these problems by creating an international umbrella system for soil correlation All soil scientists should then classify soils using the WRB as well as their national systems The book is a definitive and essential reference work for all students studying soils as part of life earth or environmental sciences as well as professional soil scientists Published with International Union of Soil Sciences     Advances in Archaeological Method and Theory Michael B

Schiffer, 2014-06-30 Advances in Archaeological Method and Theory Volume 1 presents the progressive explorations in methods and theory in archeology This book discusses the strategy for appraising significance which is needed to maximize the preservation and wise use of cultural resources Organized into 10 chapters this volume begins with an overview of planning for the best long term use of cultural resources which is the essence of conservation archeology This text then examines importance of the concept in cultural ecological studies Other chapters consider the methods used in determining the density size and growth rate of human populations This book discusses as well the use of demographic variables in archeological explanation The final chapter deals with the decisions that must be made in designing a survey and to identify the alternative consequences for data recovery of various strategies This book is a valuable resource for archeologists and planners     *Sustainable Development of Dryland Agriculture in India* R.P. Singh, 2011-01-01 There are chapters on varied topics covering the major gamut of dryland agriculture The topics covered by eminent scientists are Dryland agricultural research in India a historical perspective The eminence of authors and the institutions they represent gives credence to the contents of the book Research and development workers all would like to possess this book for ready reference and use

Geologist's library Gérard Sustrac, 1984     **Selected Water Resources Abstracts** ,1991     **Advances in Soil Science** ,2012-12-06 *Advances in Soil Science* was conceived in 1982 to provide a forum for leading international scientists to analyze and summarize the available scientific information on a subject assessing its importance and identifying additional research needs This goal seems even more appropriate today Much is known about our soil resources The principles learned and the technology developed need to be used to increase food production particularly in developing

countries and sustain the productivity of the resource base Advances in Soil Science fills a gap between the scientific journals and the comprehensive reference books Scientists can delve in depth on a particular subject relating to soil science Contributors are asked in particular to develop and identify principles that have practical applications to both developing and developed agricultures Advances in Soil Science was established to be international in scope and cover all subjects relating to soil science This volume certainly fulfills that objective The first chapter is concerned with denitrification The significance of denitrification in nitrogen use efficiency in agricultural grassland and forest ecosystems and in global nitrogen cycling is now well recognized Therefore an understanding of denitrification is essential for the efficient use of nitrogen fertilizers and for protecting the environment The second chapter looks at the effects of subzero temperatures on the physical biological and chemical processes This is an important area of soil science that has not been studied in great detail **Recent**
