Soldering And Brazing:

Brazing and Soldering John J. Stephens, 2006-01-01 Principles of Soldering Giles Humpston, David M. Jacobson, 2004 Brazing and Soldering James F. Hobart, 2015-06-15 Excerpt from Brazing and Soldering Soldering and brazing are terms often used to denote the same operation that of joining similar or dissimilar metals by means of molten metal which may be of the same kind but which usually has a lower melting point than the metals to be joined The term brazing is usually employed to denote the soldering with an alloy of copper or zinc Soldering is usually taken to represent the joining of surfaces by means of an alloy of lead and tin and hard soldering is understood to mean the process of uniting as above described with silver and its alloys used as a uniting metal Hard soldering and brazing are practically the same and are both done in about the same way The theory of brazing is the melting of a low fusing metal against the metals to be united while they are in such a condition of cleanliness and temperature that the metal welds itself to them Soft brass when melted will weld itself to iron copper and a number of other metals while the temperature of the metals in question is at a considerable number of degrees below their several melting points In fact only heat enough need be employed to fairly melt the uniting metal and to render it fluid enough to flow or to run as the mechanic aptly states it To braze also to solder it is absolutely necessary that the surfaces to be united are clean and free from oxide About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Soldering, Brazing, and Welding (Classic Reprint)** Bernard E. Jones, 2017-09-15 Excerpt from Soldering Brazing and Welding Apart from the use of rivets screws etc metal is commonly joined by soldering brazing or welding three groups of processes that have one thing in common the use of heat to fuse either the metals themselves or an alloy which is interposed to consolidate the joint The word solder is derived through the French from a Latin word meaning solid Soldering may be soft or hard Soft soldering uses lead tin alloys which are easily melted in a bunsen gas flame or with a hot iron or bit while hard soldering employs a silver copper alloy to melt which a mouth blowpipe at least is necessary Brazing is hard soldering with spelter brass and a forge or a heavy blowlamp or a powerful blowpipe must be employed to provide the heat About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of
