Tollefson, 2009-06-03 The continued spread of democracy into the twenty first century has seen two thirds of the almost two hundred independent countries of the world adopting this model In these newer democracies one of the biggest challenges has been to establish the proper balance between the civilian and military sectors A fundamental question of power must be addressed who guards the guardians and how In this volume of essays contributors associated with the Center for Civil Military Relations in Monterey California offer firsthand observations about civil military relations in a broad range of regions including Latin America Africa Asia and Eastern Europe Despite diversity among the consolidating democracies of the world their civil military problems and solutions are similar soldiers and statesmen must achieve a deeper understanding of one another and be motivated to interact in a mutually beneficial way The unifying theme of this collection is the creation and development of the institutions whereby democratically elected civilians achieve and exercise power over those who hold a monopoly on the use of force within a society while ensuring that the state has sufficient and qualified armed forces to defend itself against internal and external aggressors Although these essays address a wide variety of institutions and situations they each stress a necessity for balance between democratic civilian control and military effectiveness **The Military and Society** Betsy C. The Midshipman Culture and Educational Reform Todd A. Forney, 2004 The Midshipman Culture and Educational Reform examines the effect of educational and professional reforms on the culture of Annapolis from 1945 to 1976. The Naval Academy has juggled the competing priorities of training and education throughout its history. Proper balance was a perennial problem since the academy was limited to a four year timetable to graduation. Bancroft Hall was the focal point for professional indoctrination and the heart and soul of the academy culture. Its traditions and activities often competed with academics for the midshipmen's time and attention. Technology and operational requirements forced the school to reevaluate the emphasis paid to academics. Outside groups such as the Folsom Board and Admiral Hyman Rickover also acted as a catalyst for reform. The culmination of these efforts was the academic revolution of the 1960s which transformed Annapolis into an elite engineering college. Midshipmen and their officers occasionally resisted changes that undercut their most cherished traditions including plebe indoctrination. Ironically most core values of the academy culture remained similar to what they had always been including the emphasis on career service and loyalty to one's shipmates. Forney's book uses all original sources including a thorough survey of graduates from these years.

To Serve Canada Richard A. Preston, 1991 In *To Serve Canada* Preston takes up the story of RMC, Royal Military College, as one of Canada's three military colleges and examines its development through the uncertain years of the Cold War, through the vagaries of public indifference towards defence, through the evolution of degree granting status and the moves towards institutional bilingualism, and through the frequent Ottawa directed re-evaluations of their roles. By chronicling the development of RMC and its sister colleges from the post-Korea period to the present, Dr. Preston has provided a valuable and entertaining addition to the historical literature of this country.
