Solidarity P:

What We Owe to Nonhuman Animals Gary Steiner, 2023-09-27 This book strongly challenges the Western philosophical tradition's assertion that humans are superior to nonhuman animals. It makes a case for the full and direct moral status of nonhuman animals. The book provides the basis for a radical critique of the entire trajectory of animal studies over the past fifteen years. The key idea explored is that of felt kinship, a sense of shared fate with and obligations to all sentient life. It will help to inspire some deep rethinking on the part of leading exponents of animal studies. The book's strong outlook is expressed through an appeal for radical humility on the side of humans rather than a constant reference to the human-animal divide. Historical figures examined in depth include Aristotle, Seneca, and Kant; contemporary figures examined include Christine Korsgaard and Martha Nussbaum. This book presents an account according to which the tradition has not proceeded on the basis of impartial motivations at all but instead has made a set of pointedly self-serving assumptions about the proper criteria for assessing moral worth. Readers of this book will gain exposure to a wide variety of thinkers in the Western philosophical tradition, historical as well as contemporary. This book is suitable for professionals working in nonhuman animal studies, students, advanced undergraduates, and practitioners working in the fields of philosophy, environmental studies, law, literature, anthropology, and related fields.

Monthly Labor Review, 1989-09 Publishes in depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews. *Community, Diversity, and Difference*, 2021-07-26 This book has its philosophical starting point in the idea that group-based social movements have positive implications for peace and politics. It explores ways of imagining community, nation, and international systems through a political lens that is attentive to diversity and different lived experiences. Contributors suggest how groups might work toward new nonviolent conceptions and experiences of diverse communities and global stability. **A Covert**

Action Seth G. Jones, 2018-09-11 A tale of victory for peace, for freedom, and for the CIA: a trifecta rare enough to make for required reading. Steve Donoghue, *Spectator* USA. In 1981 the Soviet-backed Polish government declared martial law to crush a budding democratic opposition movement. Moscow and Washington were on a collision course. It was the most significant crisis of Ronald Reagan's fledgling presidency. Reagan authorized a covert CIA operation codenamed QRHELPFUL to support dissident groups, particularly the trade union Solidarity. The CIA provided money that helped Solidarity print newspapers, broadcast radio programs, and conduct an information campaign against the government. This gripping narrative reveals the little-known history of one of America's most successful covert operations through its most important characters: spymaster Bill Casey, CIA officer Richard Malzahn, Solidarity leader Lech Walesa, Pope John Paul II, and the Polish patriots who were instrumental to the success of the program. Based on in-depth interviews and recently declassified evidence, *A Covert Action* celebrates a decisive victory over tyranny for US intelligence behind the Iron Curtain, one that prefigured the Soviet collapse.

Welfare and Old Age in Europe and North America Bernard Harris, 2015-10-06 Over the last twenty years, historians

have become increasingly interested in the role of non state organizations in the development of welfare services This study is particularly focused on the role of friendly societies and other insurance bodies in the provision of aid for the elderly and the sick *Levinas, Messianism and Parody* Terence Holden, 2011-09-22 There is no greater testament to Emmanuel Levinas reputation as an enigmatic thinker than in his meditations on eschatology and its relevance for contemporary thought Levinas has come to be seen as a principal representative in Continental philosophy alongside the likes of Heidegger Benjamin Adorno and Zizek of a certain philosophical messianism differing from its religious counterpart in being formulated apparently without appeal to any dogmatic content To date however Levinas messianism has not received the same detailed attention as other aspects of his wide ranging ethical vision Terence Holden attempts to redress this imbalance tracing the evolution of the messianic idea across Levinas career emphasising the transformations or indeed displacements which this idea undergoes in taking on philosophical intelligibility He suggests that in order to crack the enigma which this idea represents we must consider not only the Jewish tradition from which Levinas draws inspiration but also Nietzsche who ostensibly would represent the greatest rival to the messianic idea in the history of philosophy with his notion of the parody of messianism Revolution and Resistance in Eastern Europe Kevin McDermott, Matthew Stibbe, 2006-10-01 The history of Eastern Europe during the Cold War is one punctuated by protest and rebellion Revolution and Resistance in Eastern Europe covers these flashpoints from the Stalin Tito split of 1948 to the dramatic collapse of the Berlin Wall in 1989 Covering East Germany Czechoslovakia Hungary Yugoslavia Poland and Romania the authors provide comprehensive critical analysis of the varying forms of dissent in the East European socialist states They take a comparative approach and show how the different movements affected one another Incorporating archival material only accessible since 1989 they discuss issues such as the diverse manifestations of non conformity among different strata of the population the complex relationship between Moscow and the national Communist Parties the loosening of Soviet control after 1985 and everyday resistance to state authority This book offers a firm grounding in the tumultuous decades of communist rule which is essential to understanding the contemporary politics of Eastern Europe *James P. Cannon and the Origins of the American Revolutionary Left, 1890-1928* Bryan D. Palmer, 2010-10-01 Bryan D Palmer s award winning study of James P Cannon s early years 1890 1928 details how the life of a Wobbly hobo agitator gave way to leadership in the emerging communist underground of the 1919 era This historical drama unfolds alongside the life experiences of a native son of United States radicalism the narrative moving from Rosedale Kansas to Chicago New York and Moscow Written with panache Palmer s richly detailed book situates American communism s formative decade of the 1920s in the dynamics of a specific political and economic context Our understanding of the indigenous currents of the American revolutionary left is widened just as appreciation of the complex nature of its interaction with international forces is deepened *The Socially Responsive Self* Larry May, 1996-11 Larry May argues that socially responsive individuals need not be self sacrificing or overly conscientious According to May a person s integrity and

moral responsibility are shaped and limited not just by conscience but also by socialization and moral support from the communities to which he or she belongs Applying his theory of responsibility to professional ethics May contends that current methods of professional socialization should be changed so that professionals are not expected to ignore considerations of personal well being family or community For instance lawyers should not place client loyalty above concerns for the common good doctors should not place the physical well being of patients above their mental and spiritual well being scientists and engineers should not feel obliged to blow the whistle on fraud and corruption unless their professional groups protect them from retaliation This book should prove provocative reading for philosophers political scientists social theorists professionals of many stripes and ethicists *Public Vision, Private Lives* Mark Sydney Cladis, 2007 Mark S Cladis pinpoints the origins of contemporary notions of the public and private and their relationship to religion in the work of Jean Jacques Rousseau His thesis cuts across many fields and issues philosophy of religion women s studies democratic theory modern European history American culture social justice privacy laws and notions of solitude and community and wholly reconsiders the political cultural and legal nature of modernity in relation to religion Turning to Rousseau s *Garden of the Solitaires* and the question of restoration and redemption that preoccupied much of Rousseau s thought Cladis examines how Rousseau addressed the tension between the joys and moral obligations of social engagement and the desire for solitude He was caught between two possibilities active involvement in the creation of an enlightened and humane society or extrication from social entanglements in favor of cultivating a spiritual interior life Yet Rousseau did not view this conflict as a desperate division Rather for him it was a moral struggle to be endured by those who had fallen from the Garden For this edition Cladis has added a substantive introduction that discusses the role of religion in contemporary democratic societies particularly in American public life Cladis proposes four models of thinking about religion in public and champions what he calls spiritual democracy a dynamic culturally specific and progressive democracy Cladis argues that spiritual democracy refers not only to a society s legal codes and principles but also to its democratic culture and symbols and its daily practices and institutions It encompasses the nation s character diverse identities and a distinctivel exchange between the nation s public vision and citizens complex private lives **Arthur Miller - Death of a Salesman/The Crucible** Stephen Marino, 2015-08-16 Arthur Miller was one of the most important American playwrights and political and cultural figures of the 20th century Both *Death of a Salesman* and *The Crucible* stand out as his major works the former is always in performance somewhere in the world and the latter is Miller s most produced play As major modern American dramas they are the subject of a huge amount of criticism which can be daunting for students approaching the plays for the first time This Reader s Guide introduces the major critical debates surrounding the plays and discusses their unique production histories initial theatre reviews and later adaptations The main trends of critical inquiry and scholars who have purported them are examined as are the views of Miller himself a prolific self critic **Richard Rorty** Michael

Bacon,2008-01-01 Michael Bacon gives a critical presentation of Rorty's writings on pragmatism and political theory comparing and contrasting him with pragmatists such as Hilary Putnam and Susan Haack and liberals such as John Rawls and Brian Barry The result is an imaginative presentation of one of contemporary philosophy's most innovative and important thinkers

Religion without Transcendence? T. Tessin,D. Phillips,2016-07-27 What can transcendence mean for us We live in a world in which there are many conceptions of transcendence Some philosophers say that they all point in their way to a transcendent realm without which death and life's sorrows have the last word while their opponents argue that since this realm is an illusion we must use our own resources to meet life's trials Others argue that moral and religious concepts of transcendence are obscured by philosophical notions of transcendence and must be rescued from them These conflicting views on a central issue in our culture are brought into sharp relief in the present collection

The World's Religions after September 11 Arvind Sharma,2008-11-30 This set is an unprecedented examination of religion's influence on modern life an honest assessment of how religion can either destroy us or preserve us and a thorough exploration of what steps might be necessary for all religions to join together as a force for good Convening on the fifth anniversary of the terrorist attack on the World Trade Center the global congress The World's Religions after September 11 explored the negative and positive possibilities of the religious dimensions of life The presentations from the congress have been pulled together in this set which addresses religion's intersection with human rights spirituality science healing the media international diplomacy globalization war and peace and more This comprehensive set includes contributions from such well known scholars of religion as Arvind Sharma and a host of others from all the world's religious traditions This set is an unprecedented examination of religion's influence on modern life an honest assessment of how religion can either destroy us or preserve us and a thorough exploration of what steps might be necessary for all religions to join together as a force for good Because of the attack on the World Trade Center on September 11 2001 the very concept of religion underwent a paradigm shift Instead of standing for virtue and piety peace and harmony the word religion also came to be inextricably associated with evil aggression and terror People around the world began to question whether the religious and secular dimensions of modern life can be reconciled whether the different religions of the world can ever coexist in harmony Indeed the very future of religion itself has sometimes seemed to be uncertain or at least suspect

Decolonizing Global Citizenship Education Ali A Abdi,Lynette Shultz,Thashika Pillay,2015-12-01 The ideas for this reader came out of a conference organized through the Centre for Global Citizenship Education and Research CGCER at the University of Alberta in 2013 With the high expansion of global citizenship education scholarship in the past 15 or so years and with most of this scholarship produced in the west and mostly focused on the citizenship lives of people in the so called developing world or selectively attempting to explain the contexts of marginalized populations in the west the need for multidirectional and decolonizing knowledge and research perspectives should be clear Indeed the discursive as well as the practical constructions of current global citizenship

education research cannot fulfill the general promise of learning and teaching programs as social development platforms unless the voices of all concerned are heard and validated With these realities this reader is topically comprehensive and timely and should constitute an important intervention in our efforts to create and sustain more inclusive and liberating platforms of knowledge and learning This collection of cutting edge theoretical contributions examines citizenship and neo liberal globalization and their impacts on the nexus of the local and global learning production of knowledge and movements of people and their rights Case studies in the collection also provide in depth analysis of lived experiences that challenge the constructed borders which derive from colonial and imperial re structuring of the contemporary world and nation states The contributors articulate agency in terms of both resistance and proactive engagement toward the construction of an alternative world which acknowledges equality justice and common humanity of all in symbiosis with the social and natural environment It is a valuable reader for students scholars practitioners and activists interested in the empowering possibilities of decolonized global citizenship education N Dr
