Solitary Twist:

Localization and Solitary Waves in Solid Mechanics A. R. Champneys, G. W. Hunt, J. M. T. Thompson, 1999 This book is a collection of recent reprints and new material on fundamentally nonlinear problems in structural systems which demonstrate localized responses to continuous inputs It has two intended audiences For mathematicians and physicists it should provide useful new insights into a classical yet rapidly developing area of application of the rich subject of dynamical systems theory For workers in structural and solid mechanics it introduces a new methodology for dealing with structural localization and the related topic of the generation of solitary waves Applications range from classical problems such as the buckling of cylindrical shells twisted rods and pipelines to the folding of geological strata the failure of sandwich structures and the propagation of solitary waves in suspended beam systems **Dynamical Processes in Generalized Continua and** Structures Holm Altenbach, Alexander Belyaev, Victor A. Eremeyev, Anton Krivtsov, Alexey V. Porubov, 2019-03-06 This book presents a collection of chapters on the current problems of the theory of dynamical processes in generalized continua and structures and has been compiled to commemorate the 70th birthday of Prof Dmitry Indeitsev a leading specialist in the field of dynamical processes in solids fluids and structures It discusses various applications related to Prof Indeitsev s contributions including various discrete and continuous dynamic models of structures and media as well as a number of dynamical processes in generalized media The Female Investigator in Literature, Film, and Popular Culture Lisa M. Dresner, 2014-12-24 In this book the author examines how women detectives are portrayed in film in literature and on TV Chapters examine the portrayal of female investigators in each of these four genres the Gothic novel the lesbian detective How to Cut a Cake Ian Stewart, 2006-10-12 Welcome back to Ian Stewart's magical world of novel television and film mathematics. This is a strange world of never ending chess games empires on the moon furious fireflies and of course disputes over how best to cut a cake Each guirky tale presents a fascinating mathematical puzzle challenging fun and also introducing the reader to a significant mathematical problem in an engaging and witty way The Gay Detective Novel Judith A. Markowitz, 2015-02-16 Gertrude Stein called it the only really modern novel form that has come into existence yet the mystery genre was a century old before it featured its first gay main character in a novel Since then gay and lesbian detective fiction has been one of the fastest growing segments of the genre It incorporates gay and lesbian cultural elements and offers crossover appeal Its authors call upon a century of development in the mystery genre while providing new more accurate images of lesbians and gay men than generally found in mainstream literature and popular media This groundbreaking study of gay and lesbian detective fiction examines mystery series and historically significant stand alone novels published since the early 1960s Part I is an overview that describes how these novels make gay and lesbian life visible and forge new powerful images It also examines how they fit into the larger history of mystery fiction The series analyses in Part II are grouped according to the type of main character police officer private investigator amateur sleuth etc Each

section discusses main and secondary characters of that type characteristic themes for the group and more The analyses of individual series cover main characters themes plot points and other elements Comments from authors interviewed for this book play a central role in those analyses Part III lists series spanning themes e g homophobia the closet gay marriage and the novels and series that address each of those themes A Monographic Revision of the Twisted Winged Insects

Comprising the Order Strepsiptera Kirby William Dwight Pierce, 1909 The writer presents in monographic form a grouping of the most important facts recorded concerning the insects of the order Strepsiptera Kirby often known as the coleopterous family Stylopidae Kirby together with considerable new material bearing on the classification structure and habits of the order Differentials in Behavior of the Two Generations of Salpa Democratica Relative to the Temperature of the Sea Christine Elizabeth Essenberg, Ellis Le Roy Michael, 1918 Differentials in Behavior of the Two Generations of Salpa Democratica Relative to the Temperature of the Sea Ellis Le Roy Michael, 1918 University of California Publications in Zoology University of California (1868-1952), University of California, Berkeley, 1917
