Some Thoughts on Improving Economic Statistics Michael J. Boskin, Presents the full text of the essay entitled Some Thoughts on Improving Economic Statistics by Michael J Boskin Discusses the importance of economic statistics in the Information Age the implications of the Information economy and the statistics to be affected *The economic effects of the liability system* , Some Implications of the Turnover of Political Power in Taiwan Ramon Hawley Myers, 2010 This paper maintains that Taiwan's new president is promoting Taiwanese nationalism is turning away from negotiations to reunify Taiwan with China and is likely to cause serious conflict with China **Russia's oil in America's future** , Presidents George Bush and Vladimir Putin will hold a summit at the end of September that will focus on economic and other ties between the United States and Russia The two presidents have long recognized the central position of energy in our bilateral relations and in that sphere nothing is as critical as oil Today Russia may again be the largest oil exporter in the world but very little yet comes to the United States Russia's oil industry is dominated by rich and aggressive young private companies Generally they are eager to deal with foreigners but despite significant state reforms they often are still inhibited by a dilapidated state controlled delivery system and a residue of traditional thinking and institutions Many of Russia's as yet unresolved post Soviet problems exploded in mid 2003 when the prosecutor general's office attacked Yukos the country's most modernized productive and pro American private oil company Thus even as Washington and American oil industry leaders actively sought alternatives to unstable sources in the Middle East Africa and Latin America basic questions re emerged in Russia about the privatizations of the 1990s the security of private property the mixing of law and politics and the exercise of power in the Kremlin Today Russians with the support of American and European allies must create conditions that will welcome the foreign funds technology and expertise needed to develop the critical oil industry but also to lay foundations of law and infrastructure that will help make Russia a stable member of the world community Americans must decide how much involvement Russia can constructively absorb to promote not only short term oil supplies but also long term Russian development and broader U S foreign policy goals Finally the critical long term lesson of 9 11 and other recent experiences for Americans is that even as we cultivate Russia as an ally and major source of oil we must actively develop alternative sources of energy In an unstable world the United States must not forever be held hostage by other nations with their often very different cultures institutions and interests Summary **The Case Against the International Monetary Fund** , Political instability as a source of growth , **The Congressional Response to Social Security Surpluses, 1935-1994** , A Strategic Flip-flop in the Caribbean: Lift the Embargo on Cuba , The sanctions and U S policy in Cuba have failed in establishing democracy improving human rights and sparking economic reform Instead they have only promoted conflict both within Cuba and abroad The authors claim that the imperialistic Helms Burton Law alienates allies worldwide and will poison relations between the United States and Cuba for generations to come **Doing it wrong and**

doing it right William E. Ratliff,2003 **Climate policy--from Rio to Kyoto** Siegfried Fred Singer,2000
