

Reference list Vs Bibliography

- All the items you have made direct reference to in your essay (by the authors' name and year of publication).
- Material that has been helpful for reading around the subject but from which you do not make specific reference to in your work.
- Confusingly some people call the 'reference list' the 'bibliography' (and only use one list). No one is right or wrong in doing either, often institutional convention will determine some aspects of style.
