Some Choice Law Medicine And The Market

George J. Annas

Some Choice Law Medicine And The Market:

Some Choice George J. Annas,1998 This book is a passionate critique of the shallowness of choice rhetoric used to camouflage critical personal and public policy issues in contemporary debates in American medicine Our public discourse on life and death from health care to medical research and from risky behavior to assisted suicide is dominated by the market model of consumerism augmented by appeals to individual freedom In fact however in most cases there is no real choice left for individuals to make the important choices have been made by others and the illusion of choice fosters complacency Knee jerk libertarianism leads to a superficial consumer culture and life choices valued only by their monetary value *Some Choice* uses the cases of cloning drive through deliveries emergency medicine genetic privacy human experimentation tobacco control and physician assisted suicide among others to suggest ways in which we can break through our vapid and superficial public discourse on life and death issues and begin to engage in a public dialogue that enriches our lives and society rather than cheapens them George Annas is one of the most widely recognized names in current bioethics debates His goal in this new book is to help open a national and international dialogue that sees the search for universal human rights as valuable and international cooperation to define protect and promote them as central to life

Research Handbook on Voluntary Assisted Dying Law, Regulation and Practice Ben P. White,2025-09-10 This unique Research Handbook examines voluntary assisted dying VAD laws through the lens of regulatory theory It sheds light on interdisciplinary perspectives and outlines policy debates around the revision and implementation of these laws Ben P White brings together global experts to discuss the law and practice of VAD in all permitting jurisdictions This title contains one or more Open Access chapters

Bioethical and Evolutionary Approaches to Medicine and the Law W. Noel Keyes,2007 Bioethics is a multidisciplinary field of law and one that can not be ignored *Bioethical and Evolutionary Approaches to Medicine and the Law* is a comprehensive scholarly analysis of bioethics and the development of its standards The book is broken up into the following four parts Part I deals with scientific religious ethical and legal aspects of bioethics Part II evaluates 100 current bioethical issues and sets forth specific approaches for their resolution Part III focuses on medical legal and other problems from beginning of life overpopulation birth control in vitro fertilization etc through end of life physician assisted suicide advance directives euthanasia etc Part IV discusses the major bioethical issues in genetics and genetic engineering

Health Care Reform and the Law in Canada Timothy Caulfield,Barbara von Tigerstrom,2002 Sweeping changes are being proposed as Canadians examine our health care system But what are the legal implications of health care reform In this timely collection lawyers and legal scholars discuss a variety of topics in health care reform including regulation of private care interpretation of the Canada Health Act and the constitutional implications of proposed reforms Barbara von Tigerstrom is currently studying at the University of Cambridge in England Timothy Caulfield lives in Edmonton where he teaches at the University of Alberta

Self-determination in Health Care Leroy C. Edozien,2016-03-03 It is generally accepted in legal

and bioethical discourse that the patient has a right to self determination In practice though this is often not the case Paternalism is waning and it is increasingly recognised that there are values other than medical factors which determine the choices that patients make Unfortunately these developments have not resulted in huge advances for patient self determination which is largely because the consent model has fundamental flaws that constrain its effectiveness This book sets out to offer an alternative model to consent In the property model proposed here the patient s bodily integrity is protected from unauthorised invasion and their legitimate expectation to be provided with the relevant information to make an informed decision is taken to be a proprietary right It is argued that the property model potentially overcomes the limitations of the consent model including the obstacle caused by the requirement to prove causation in consent cases The author proposes that this model could in the future provide an alternative or complementary approach for the courts to consider when dealing with cases relating to self determination in health care

Psychology and Health Wade

Pickren,2019-11-08 Weaving together the various foundations of psychology and health into a compelling narrative this book culturally and historically situates the practice strengths and shortcomings of the field Historian of psychology Wade Pickren traces the development of the relationship of health and psychology through a critical history that incorporates context culture and place from the early modern period to the present day Covering a range of topics and time periods including psychology and health in the nineteenth century stress in post World War II USA and the relationship between body mind and emotion in the modern world Psychology Health Culture Place and History outlines the journey of an understanding of health rooted in nature to a commodity governed by the neoliberal values of the marketplace including an exploration of the roles of self help emotions and resilience The book closes with an outline of contemporary alternatives in health psychology and points toward a future when once again psychology and health are grounded in nature Throughout the rich connections across cultures illustrate the importance of cultural variations in understanding health disease and treatment This book is essential reading for scholars and students of health psychology at all levels It will also be of interest to professionals and practitioners in related fields as well as those interested in the enduring connection between health and psychology

In the Wake of Terror Jonathan D. Moreno,2003 Timely and provocative essays on bioethical questions brought to the forefront by the bioterrorist threat

Guiding Icarus Rahul K. Dhanda,2003-03-31 There is a palpable need for business to explore the issues Dhanda raises Guiding Icarus offers a flight plan from the Foreword by Philip R Reilly Guiding ICARUS Merging Bioethics with Corporate Interests Rahul K Dhanda While bioethicists may enjoy the most thorough appreciation of both the promise and perils of new biotechnologies international corporations are in fact the entities generating these technologies and determining their application An industry insider versed in the language of bioethics Rahul Dhanda offers in Guiding Icarus Merging Bioethics with Corporate Interests a Rosetta stone to these two camps explaining why each needs the other why their disparate concerns often cohere and why an ethical business is likely a successful one The author

develops a dialogue between bioethics and corporate interests by examining case studies of several hot button issues including Genetically modified foods DNA data banking Personalized medicine Stem cell research In each instance he provides a treatment of the particular science under consideration a list of the benefits of the technology a description of the ethical issues involved an account of past industry response and recommendations for future action Given the expansive nature of biotechnology ramifications in the pharmaceutical and agricultural industries are covered in depth as well The book also features a Foreword by world renowned bioethicist and biotechnology CEO Philip R Reilly as well as a step by step discussion of the components of business and bioethical issues Written for a general audience Guiding Icarus will be particularly useful to biotechnologists regulatory affairs managers and corporate officers of biotechnology firms as well as bioethicists in the academic community Dhanda's peerless text provides a unique tool for understanding and addressing the ethical dilemmas confronting society in the 21st century

Competence and Vulnerability in Biomedical Research

Philip Bielby, 2008-09-16 Enhanced knowledge of the nature and causes of mental disorder have led increasingly to a need for the recruitment of cognitively vulnerable participants in biomedical research These individuals often fall into the grey area between obvious decisional competence and obvious decisional incompetence and as a result may not be recognised as having the legal capacity to make such decisions themselves At the core of the ethical debate surrounding the participation of cognitively vulnerable individuals in research is when if at all we should judge them decisionally and legally competent to consent to or refuse research participation on their own behalf and when they should be judged incompetent in this respect In this book the author develops a novel justificatory framework for making judgments of decisional competence to consent to biomedical research with reference to five groups of cognitively vulnerable individuals older children and adolescents adults with intellectual disabilities adults with depression adults with schizophrenia and adults with dementia including Alzheimer's disease Using this framework the author argues that we can make morally defensible judgments about the competence or incompetence of a potential participant to give contemporaneous consent to research by having regard to whether a judgment of competence would be more harmful to the generic rights of the potential participant than a judgment of incompetence The argument is also used to justify an account of supported decision making in research and applied to evaluate the extent to which this approach is evident in existing ethical guidelines and legal provisions The book will be of interest to bioethicists as well as psychiatrists and academic medical lawyers interested in normative questions raised by the concepts of competence and capacity

Perspectives on Health and Human Rights Sofia Gruskin, 2005 This anthology of

articles collected by a cast of award winning scholars in the field of public health illustrates that promoting and protecting human rights is fundamental to promoting and protecting health New issues covered in this volume include emerging technologies family and health responding to violence and methods and strategies

Medical Paradoxes

Francisco Kerdel-Vegas, 2019-01-16 Medicine is not a precise science There are always several options to manage and cure a disease

The best help for the treating doctor comes from the patient The better informed the patient is the more helpful this is to the physician Changing the U.S. Health Care System Ronald M. Andersen, Thomas H. Rice, Gerald F. Kominski, 2011-02-15

The third edition of Changing the U S Health Care System is a thoroughly revised and updated compendium of the most current thought on three key components of health care policy improving access ensuring quality and controlling costs Written by a panel of health care policy experts this third edition highlights the most recent research relevant to health policy and management issues New chapters address topics such as the disparities in health and in health care information systems and performance in the area of nursing Revisions to chapters from the previous edition emphasize the most recent developments in the field Handbook of Psychology, Health Psychology Arthur M. Nezu, Christine M. Nezu, Pamela A. Geller, 2003-01-07 Includes established theories and cutting edge developments Presents the work of an international group of experts Presents the nature origin implications an future course of major unresolved issues in the area Legal and Ethical Regulation of Biomedical Research in Developing Countries Remigius N. Nwabueze, 2016-04-22 There has been a rapid increase in the pace and scope of international collaborative research in developing countries in recent years This study argues that whilst ethical regulation of biomedical research in Africa and other developing countries has attracted global attention legal liability issues such as the application of common law rules and the development of legally enforceable regulations have been neglected It examines some of the major research scandals in Africa and suggests a new ethical framework against which clinical trials could be conducted The development of research guidelines in Uganda Tanzania Malawi and Nigeria are also examined as well as the role of ethics committees Providing a detailed analysis of the law of negligence and its application to research ethics committees and their members common law and constitutional forms of action and potential negligence claims the book concludes by suggesting new protocols and frameworks improved regulation and litigation This book will be a valuable guide for students researchers and policy makers with an interest in medical law and ethics bioethics customary law in Africa and regulation in developing countries Genes, Women, Equality Mary Briody Mahowald, 1999-10-14 Genetics is not gender neutral in its impact Mahowald cites a wide range of biological and psychosocial examples that reveal its different impact on men and women especially with regard to reproduction and caregiving She examines the extent to which these differences are associated with gender injustice arguing for positions that reduce inequality between the sexes The critical perspective Mahowald brings to this analysis is an egalitarian interpretation of feminism that demands attention to inequalities arising from racism ethnocentrism ableism and classism as well as sexism Eschewing a notion of equality as sameness Mahowald defines equality as attribution of the same value to different objects Gender justice she claims imputes the same value to men and women despite their differences It can only be maximized by practical efforts to equalize the burdens and benefits associated with genetics The topics considered include participation in research allocation of genetic services cultural difference sex selection misattributed paternity prenatal and

preimplantation diagnosis carrier testing genetic interventions genetic disabilities preferences for genetic ties to offspring genetic susceptibility to late onset disorders behavioral genetics genetic discrimination in employment and insurance and human cloning Cases both real and concocted are used to illustrate the questions addressed

Pharmacocracy Thomas Szasz, 2003-09-01 The modern penchant for transforming human problems into diseases and judicial sanctions into treatments replacing the rule of law with the rule of medical discretion leads to a type of government social critic Thomas Szasz calls pharmacocracy He warns that the creeping substitution of democracy for pharmacocracy private personal concerns increasingly perceived as requiring a medical political response inexorably erodes personal freedom and dignity

American Bioethics George J. Annas, 2009 Bioethics was born in the USA and the values American bioethics embrace are based on American law including liberty and justice This book crosses the borders between bioethics and law but moves beyond the domestic law bioethics struggles for dominance by exploring attempts to articulate universal principles based on international human rights The isolationism of bioethics in the US is not tenable in the wake of scientific triumphs like decoding the human genome and civilizational tragedies like international terrorism Annas argues that by crossing boundaries which have artificially separated bioethics and health law from the international human rights movement American bioethics can be reborn as a global force for good instead of serving mainly the purposes of U S academics This thesis is explored in a variety of international contexts such as terrorism and genetic engineering and in U S domestic disputes such as patient rights and market medicine The citizens of the world have created two universal codes science has sequenced the human genome and the United Nations has produced the Universal Declaration of Human Rights The challenge for American bioethics is to combine these two great codes in imaginative and constructive ways to make the world a better and healthier place to live

A Merciful End Ian Robert Dowbiggin, 2003 This is the first full history of the euthanasia movement in the U S It tells for the first time the dramatic story of those reformers who struggled throughout the twentieth century to change the nation's attitudes towards mercy killing and assisted suicide Original wide ranging in scope but sensitive to the personal dimensions of euthanasia A Merciful End is an illuminating and cautionary account of tension between motives and methods within twenty century social reform providing a refreshingly new perspective on an old debate

Monitoring Stem Cell Research President's Council on Bioethics (U.S.), 2004

Worst Case Bioethics George J. Annas, 2010 In Worst Case Bioethics George Annas employs contemporary disputes involving death and disaster to explore the radical changes underway in public health practice the application of constitutional law to medicine and human rights discourse to promote human health and wellbeing

Some Choice Law Medicine And The Market: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. Some Choice Law Medicine And The Market : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Some Choice Law Medicine And The Market : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papan, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
