Shackelford, Viviana A. Weekes-Shackelford, 2012-08-23 This volume synthesizes the theoretical and empirical work of leading scholars in the evolutionary sciences to produce an extensive and authoritative review of this literature **The ^AOxford Handbook of Evolutionary Psychology and Religion** James R. Denmark France and the UK They explore how people understand what it means to belong to their nation and show that different aspects of national attachment national identity national pride and national chauvinism have contrasting effects on support for redistribution and on attitudes towards immigrants The psychological mechanisms that may explain why people's identity matters for their willingness to extend support to others are examined in depth Equally important is how the potential recipients of such support are perceived Ethnic and civic conceptions of national identity are often contrasted but the empirical basis for such a distinction is shown to be weak In their place a cultural conception of national identity is explored and defended against the charge that it is essentialist and therefore exclusive of minorities Particular attention is given to the role that religion can legitimately play within such identities Finally the book examines the challenges involved in integrating immigrants dual nationals and other minorities into the national community It shows that although these groups mostly share the liberal values of the majority their full inclusion depends on whether they are seen as committed and trustworthy members of the national we
