Something From The Oven:

Something from the Oven Laura Shapiro, 2004 In this delightfully surprising history Laura Shapiro author of the classic *Perfection Salad* recounts the prepackaged dreams that bombarded American kitchens during the fifties Faced with convincing homemakers that foxhole food could make it in the dining room the food industry put forth the marketing notion that cooking was hard opening cans on the other hand wasn't But women weren't so easily convinced by the canned and plastic wrapped concoctions and a battle for both the kitchen and the true definition of homemaker ensued Beautifully written and full of wry observation this is a fun illuminating and definitely easy to digest look back at a crossroads in American cooking

Something from the Oven Laura Shapiro, 2004 A fun lively history of the revolution in American cooking that took place in the 1950s traces the innovations cookbooks products techniques and marketing campaigns that changed the way Americans prepared food forever

Kitchen Literacy Ann Vileisis, 2008-02 Ask children where food comes from and they'll probably answer the supermarket Ask most adults and their replies may not be much different Where our foods are raised and what happens to them between farm and supermarket shelf have become mysteries How did we become so disconnected from the sources of our breads beef cheeses cereal apples and countless other foods that nourish us every day Ann Vileisis's answer is a sensory rich journey through the history of making dinner *Kitchen Literacy* takes us from an eighteenth century garden to today's sleek supermarket aisles and eventually to farmer's markets that are now enjoying a resurgence Vileisis chronicles profound changes in how American cooks have considered their foods over two centuries and delivers a powerful statement what we don't know could hurt us As the distance between farm and table grew we went from knowing particular places and specific stories behind our foods origins to instead relying on advertisers' claims The woman who raised plucked and cooked her own chicken knew its entire life history while today most of us have no idea whether hormones were fed to our poultry Industrialized eating is undeniably convenient but it has also created health and environmental problems including food borne pathogens toxic pesticides and pollution from factory farms Though the hidden costs of modern meals can be high Vileisis shows that greater understanding can lead consumers to healthier and more sustainable choices Revealing how knowledge of our food has been lost and how it might now be regained *Kitchen Literacy* promises to make us think differently about what we eat
