**Books in Print Supplement** ,2002      *Constructing Inequality in Multilingual Classrooms* Luisa Martín Rojo,2010-07-30 In her groundbreaking and innovative study the author takes us on a fascinating journey through some of Madrid s multilingual and multicultural schools and reveals the role played by linguistic practices in the construction of inequality through such processes as what she calls de capitalization and ethnicization Through a critical sociolinguistic and discourse analysis of the data collected in an ethnographic study the book shows the exclusion caused by monolingualizing tendencies and ideologies of deficit in education and society The book opens a timely discussion of the management of diversity in multilingual and multicultural classrooms both for countries with a long tradition of migration flows and for those where the phenomenon is relatively new as is the case in Spain This study of linguistic practices in the classroom makes clear the need to rethink some key linguistic concepts such as practice competence discourse and language and to integrate different approaches in qualitative research The volume is essential reading for students and researchers working in sociolinguistics education and related areas as well as for all teachers and social workers who deal with the increasing heterogeneity of our late modern societies in their work      **Somos Asi Ya!, Grades 10-12** James F. Developments in the analysis of linguistic variation show the need for a theoretical model whereby variants are viewed as cognitively based communicative choices In this book the analysis of the first and second grammatical persons in Spanish media discourse illustrates an approach to linguistic structure and usage as motivated by the need to create meaning at all semiotic levels Rather than mere sets of deictic forms persons constitute arrays of functional strategies used by speakers to develop certain representations of themselves and others The degree of salience attributed to some participant through grammatical configuration including features like person way of formulation and syntactic function strongly conditions the discursive role of that participant as well as the communicative situation at large Methodologically the demonstration conjugates the analysis of quantitative usage patterns with that of specific instances of choice in order to elucidate the stylistic potential of syntactic forms in media contexts Understanding variation as the construction of meaning is essential to the scientific advancement of linguistics as an inherently social and cognitive discipline
