**Rivista di Estetica 86** AA.VV., 2024-12-11 The concept of speculative thinking is in many ways ambiguous. First, the concept of speculation refers on the one hand to philosophical research, i.e. to the need for philosophy to remain committed to pure thought and not to bend to instances alien to conceptual ones, while on the other hand it refers to financial transactions aimed at profiting from fluctuations in market prices. Second, even within philosophical discourse, the term remains equivocal. At times, speculation refers to an inquiry that, precisely by being merely speculative, seems detached from the practical concerns of the world, thereby indicating the essential theoretical element of philosophical inquiry; at other times, the term marks the extreme experience of thinking in which ordinary discursiveness touches its limits. After a period of relative oblivion, the notion of the speculative has returned today within contemporary philosophical debate. This special issue focuses on the notion of speculative thinking both in its Hegelian and neo-Hegelian interpretations and in contexts that partially diverge from that tradition, aiming to philosophically explore the term's rich and varied meanings. *The Canadian Modern Language Review*, 1990-10
