Southern Africa On The Wild Side:

On the Wild Side Martin Gardner, 2010-10-04 I have always been intrigued by fringe science writes Martin Gardner in the preface to this book perhaps for the same reason that I enjoy freak shows and circuses Pseudoscientists especially the extreme cranks are fascinating creatures for psychological study Moreover I have found that one of the best ways to learn something about any branch of science is to find out where its crackpots go wrong A unique combination of horse sense and drollery has made Martin Gardner the undisputed dean of the critics of pseudoscience This bountiful collection of essays and articles will be wholeheartedly greeted by Gardner's fans as well as by new readers This collection of articles many of which first appeared in the Skeptical Inquirer the New York Review of Books and Free Inquiry explores pseudoscience and strange religious beliefs with the author's trademark wit and verve Destined to be a classic of skeptical literature this book covers a wide range of topics including UFOs rainmaking ghosts the Big Bang ESP Oral Roberts as well as the early history of spiritualism and today's bizarre trance channeling cults

Walking on the Wild Side Kristi M. Fondren, 2015-12-11 The most famous long distance hiking trail in North America the 2 181 mile Appalachian Trail the longest hiking only footpath in the world runs along the Appalachian mountain range from Georgia to Maine Every year about 2 000 individuals attempt to thru hike the entire trail a feat equivalent to hiking Mount Everest sixteen times In Walking on the Wild Side sociologist Kristi M Fondren traces the stories of forty six men and women who for their own personal reasons set out to conquer America's most well known and arguably most social long distance hiking trail In this

fascinating in depth study Fondren shows how once out on the trail this unique subculture of hikers lives mostly in isolation with their own way of acting talking and thinking their own vocabulary their own activities and interests and their own conception of what is significant in life They tend to be self disciplined have an unwavering trust in complete strangers embrace a life of poverty and reject modern day institutions The volume illuminates the intense social intimacy and bonding that forms among long distance hikers as they collectively construct a long distance hiker identity Fondren describes how long distance hikers develop a trail persona underscoring how important a sense of place can be to our identity and to our sense of who we are Indeed the author adds a new dimension to our understanding of the nature of identity in general Anyone who has hiked or has ever dreamed of hiking the Appalachian Trail will find this volume fascinating Walking on the Wild Side captures a community for whom the trail is a sacred place a place to which they have become attached socially emotionally and spiritually
