Suicide And The Soul:

Suicide and the Soul James Hillman, 1964 **Suicide from the Soul's Perspective** Neroli Duffy, Marilyn C. Barrick, 2004 Offers powerful life changing partnerships with heavenly rescuers practical tools and priceless insights for suicidal people and their loved ones to allow light to transform a dark world This book will save lives Christianity, LGBTQ Suicide, and the Souls of Queer Folk Cody J. Sanders, 2020-05-15 While garnering the attention of professionals across disciplines from medicine to public health to psychology and frequently covered as a topic of public concern in the news media the elevated occurrence of suicide attempts among LGBTQ persons has received little attention within the literature of theology and religious studies This book fills that lacuna by addressing the role that religious spiritual and theological narratives play in shaping the souls of queer folk Taking a narrative approach to qualitative interview material from LGBTQ individuals who survived their suicide attempts Cody J Sanders argues that theological narratives can operate violently upon the souls of LGBTQ people in ways that make life precarious and at time seem unlivable The book critically addresses the violence of theological narratives upon queer souls filling a crucial void in scholarship concerning the role of religion specifically Christianity in LGBTQ suicide Ultimately the author draws upon the interview material to move readers toward constructive methods of contributing to the resistance and resilience of queer souls in relation to soul violence asking how we can intervene with practices of care in order to cultivate livability of life for queer people **The Enigma of Suicide** George Howe Colt, 1992 For anyone trying to understand how and why suicide happens here is a provocative exploration of the subject Colt interviewed hundreds of people who have had intimate encounters with suicide to unveil the mysteries that surround this tragic phenomenon **Soul's Perfection** Sylvia Browne, 2009-10 Browne and her guides help solve a great mystery in this fascinating book namely what is the meaning of life This text describes how to discover a sense of intellectual and spiritual fulfillment **Torment of the Soul** Benedict Auer, Jessy A. Suicide: A Global Perspective

Maurizio Pompili, 2012-09-19 In the year 2000 approximately one million people died from suicide a global mortality rate of 16 per 100 000 or one death every 40 seconds In the last 45 years suicide rates have increased by 60% worldwide Suicide is now among the three leading causes of death among those aged 15-44 years both sexes these figures do not include suicide attempts up to 20 times more frequent than completed suicide Suicide worldwide is estimated to represent 1.8% of the total global burden of disease in 1998 and 2.4% in countries with market and former socialist economies in 2020 Although traditionally suicide rates have been highest among the male elderly rates among young people have been increasing to such an extent that they are now the group at highest risk in a third of countries in both developed and developing countries Mental disorders particularly depression and substance abuse are associated with more than 90% of all cases of suicide however suicide results from many complex sociocultural factors and is more likely to occur particularly during periods of socioeconomic family and individual crisis situations e.g. loss of a loved one employment honour The economic costs associated with completed and attempted suicide are estimated to be in the billions of dollars One million lives lost each year are more than those lost from wars and murder annually in the world It is three times the catastrophic loss of life in the tsunami disaster in Asia in 2005 Every day of the year the number of suicides is equivalent to the number of lives lost in the attack on the World Trade Center Twin Towers on 9/11 in 2001 Everyone should be aware of the warning signs for suicide Someone threatening to hurt or kill him/herself or talking of wanting to hurt or kill him/herself someone looking for ways to kill him/herself by seeking access to firearms available pills or other means someone talking or writing about death dying or suicide when these actions are out of the ordinary for the person Also high risk of suicide is generally associated with hopelessness rage uncontrolled anger seeking revenge acting reckless or engaging in risky activities seemingly without thinking feeling trapped like there's no way out increased alcohol or drug use withdrawing from friends family and society anxiety agitation unable to sleep or sleeping all the time dramatic mood changes no reason for living no sense of purpose in life Table 1 Understanding and helping the suicidal individual should be a task for all Suicide Myths How to Help the Suicidal Person Warning Signs of Suicide Myth Suicidal people just want to die Fact Most of the time suicidal people are torn between wanting to die and wanting to live Most suicidal individuals don't want death they just want to stoop the great

psychological or emotional pain they are experiencing Listen Accept the person's feelings as they are Do not be afraid to talk about suicide directly Ask them if they developed a plan of suicide Expressing suicidal feelings or bringing up the topic of suicide Giving away prized possessions settling affairs making out a will Signs of depression loss of pleasure sad mood alterations in sleeping eating patterns feelings of hopelessness Myth People who commit suicide do not warn others Fact Eight out of every 10 people who kill themselves give definite clues to their intentions They leave numerous clues and warnings to others although clues may be non verbal or difficult to detect Remove lethal means for suicide from person's home Remind the person that depressed feelings do change with time Point out when death is chosen it is irreversible Change of behavior poor work or school performance Risk taking behaviors Increased use of alcohol or drugs Social isolation Developing a specific plan for suicide Myth People who talk about suicide are only trying to get attention They won't really do it Fact Few commit suicide without first letting someone know how they feel Those who are considering suicide give clues and warnings as a cry for help Over 70% who do threaten to commit suicide either make an attempt or complete the act Express your concern for the person Develop a plan for help with the person Seek outside emergency intervention at a hospital mental health clinic or call a suicide prevention center Myth Don't mention suicide to someone who's showing signs of depression It will plant the idea in their minds and they will act on it Fact Many depressed people have already considered suicide as an option Discussing it openly helps the suicidal person sort through the problems and generally provides a sense of relief and understanding Suicide is preventable Most suicidal individuals desperately want to live they are just unable to see alternatives to their problems Most suicidal individuals give definite warnings of their suicidal intentions but others are either unaware of the significance of these warnings or do not know how to respond to them Talking about suicide does not cause someone to be suicidal on the contrary the individual feels relief and has the opportunity to experience an empathic contact Suicide profoundly affects individuals families workplaces neighbourhoods and societies The economic costs associated with suicide and self-inflicted injuries are estimated to be in the billions of dollars Surviving family members not only suffer the trauma of losing a loved one to suicide and may themselves be at higher risk for suicide and emotional problems Mental pain is the basic ingredient of suicide Edwin Shneidman calls such pain psychache¹ meaning an ache in the psyche Shneidman suggested that the key questions to ask a suicidal person are Where do you hurt and How may I help you If the function of suicide is to put a stop to an unbearable flow of painful consciousness then it follows that the clinician's main task is to mollify that pain Shneidman¹ also pointed out that the main sources of psychological pain such as shame guilt rage loneliness hopelessness and so forth stem from frustrated or thwarted psychological needs These psychological needs include the need for achievement for affiliation for autonomy for counteraction for exhibition for nurturance for order and for understanding Shneidman² who is considered the father of suicidology has proposed the following definition of suicide Currently in the Western world suicide is a conscious act of self-induced annihilation best understood as a

multidimensional malaise in a needful individual who defines an issue for which the suicide is perceived as the best solution Shneidman has also suggested that that suicide is best understood not so much as a movement toward death as it is a movement away from something and that something is always the same intolerable emotion unendurable pain or unacceptable anguish Strategies involving restriction of access to common methods of suicide have proved to be effective in reducing suicide rates however there is a need to adopt multi sectoral approaches involving other levels of intervention and activities such as crisis centers There is compelling evidence indicating that adequate prevention and treatment of depression alcohol and substance abuse can reduce suicide rates School based interventions involving crisis management self esteem enhancement and the development of coping skills and healthy decision making have been demonstrated to reduce the risk of suicide among the youth Worldwide the prevention of suicide has not been adequately addressed due to basically a lack of awareness of suicide as a major problem and the taboo in many societies to discuss openly about it In fact only a few countries have included prevention of suicide among their priorities Reliability of suicide certification and reporting is an issue in great need of improvement It is clear that suicide prevention requires intervention also from outside the health sector and calls for an innovative comprehensive multi sectoral approach including both health and non health sectors e g education labour police justice religion law politics the media
