Rohan, 2016-09-24 In this final book in the Weaverworld Trilogy 14 year old Jack Fisher is summoned back to Weaverworld on an urgent mission he must help Rainbow Mudrake free her father the famous Bowmaker from the dungeon at Stranglespit Labyrinth Once there however he finds himself enmeshed in a life or death struggle of epic proportions Hungry for power beyond imagining the evil Grimsnipe is planning to breach the barrier between Weaverworld and the Realworld a feat he means to achieve with the help of Jack's best friend Simon Goldberg He creates a fantastical amusement park to lure gullible Realies into paying huge sums of money for the adventure of a lifetime their last Jack is not alone on this voyage His younger sister Jillian and their dog Hairy Spotter are along for the ride and friends old new and unexpected become essential to their survival Among them is an eccentric Timekeeper who helps Jack confront the hardest decision of his life and the greatest sacrifice in order to save Weaverworld and the girl he loves **Schild's Ladder** Greg Egan, 2002-02-21 For twenty thousand years every observable phenomenon in the universe has been successfully explained by the Sarumpaet Rules the laws governing the dynamics of the quantum graphs that underlie all the constituents of matter and the geometric structure of spacetime Now Cass has stumbled on a set of quantum graphs that might comprise the fundamental particles of an entirely different kind of physics and she has travelled three hundred and seventy light years to Mimosa Station a remote experimental facility in the hope of bringing this tantalising alternative to life The novo vacuum is predicted to begin decaying the instant it s created but even a short lived microscopic speck could shed light on the origins of the universe and test the Sarumpaet Rules more rigorously than ever before Cass s experiment turns out to be more successful than anticipated the novo vacuum is more stable than the ordinary vacuum around it and a region in which the new physics holds sway proceeds to expand out from Mimosa at half the speed of light Six hundred years later more than two thousand inhabited systems have been lost to the novo vacuum On the Rindler a ship that has matched velocities with the encroaching border people have come from throughout inhabited space to study the phenomenon Most are Preservationists hunting for a

way to turn back the tide but a few belong to another faction Yielders who believe that the challenge of adapting to survive on the far side of the border would reinvigorate a civilisation that has grown stale and insular Tchicaya has come to the Rindler to join the Yielders but when Mariama a childhood friend whose example inspired him to abandon his own home world and traditions for a life of travel arrives soon after he is shocked to discover that she plans to help the Preservationists find a way to destroy the novo vacuum As a theoretical breakthrough leads to a sequence of experiments that begins to reveal the true richness of the world behind the border tensions between the opposing factions grow When a splinter group responds to these revelations with violent unilateral action Tchicaya and Mariama are forced into an uneasy alliance and travel together through the border balancing old and new loyalties against the fate of two incomparably different universes

Spinning Into Control Jerry Palmer,2000-01-01 Ground breaking in its analysis of the relationship between journalists and sources Spinning into Control is a useful and colorful introduction to the key issues of contemporary news reporting for students of media communication and journalism Fundamental to this relationship is the question of the values that determine which events are selected as newsworthy and which are neglected The book provides a case study based account of how information flows in news reporting Rhetoric and Educational Discourse Richard Edwards,Katherine Nicoll,Nicky Solomon,Robin Usher,2013-02-01 Educational policy is often dismissed as simply rhetoric and a collection of half truths However this is to underestimate the power of rhetoric and the ways in which rhetorical strategies are integral to persuasive acts Through a series of illustrative chapters this book argues that rather than something to be dismissed rhetorical analysis offers a rich and deep arena in which to explore and examine educational issues and practices It adopts an original stance in relation to contemporary debates and will make a significant contribution to educational debates in elucidating and illustrating the pervasiveness of persuasive strategies in educational practices Rhetoric and Educational Discourse is a useful resource for postgraduate and research students in education and applied linguistics The book will also be of interest to academics and researchers in these fields of study and those interested in discursive approaches to research and scholarship

own way trying to balance a return to normality whilst seeking the truth or otherwise When the local national and international come into contact via the UK Prime Ministers wife the wives of politicians and the mistrust of such wives produce a comical mayhem that nevertheless still ends in a simple sadness **Re-Reading Education Policies**, 2009-01-01 This book collects studies with a critical education policy orientation and presents itself as a handbook of matters of public concern The term critical does not refer to the adoption of a particular theoretical framework or methodology but rather it refers to a very specific ethos or way of relating to the present and the belief that the future should not be the repetition of the past This implies a concern about what is happening in our societies today and what could or should be happening in the future As a consequence the contributors to the book rely on a general notion of public policy that takes on board processes practices and discourses at a variety of levels in diverse governmental and non governmental contexts and considers the relation of policy to power to politics and to social regulation Following the detailed introduction that aims at picturing the landscape of studies with a critical education policy orientation the book presents re readings of six policy challenges globalization knowledge society lifelong learning equality democracy social inclusion accountability control efficiency and teacher professionalism It seeks to contextualise these in relation to issues of current global concern at the start of the 21st century Despite the diversity of approaches this collection of critical education policy studies shares a concern with what could be called the public and its education and represents a snapshot of education policy research at a particular time

Crime Statistics in the News Jairo Lugo-Ocando, 2017-10-06 This book offers a comparative exploration of how journalists across different newsrooms around the world access and interpret statistics when producing stories related to crime Looking at the nature of news sources regularly used by journalists Lugo Ocando analyses how these numbers are used to report crime As the author argues far from being straightforward the relationship between numbers and journalists in the context of crime reporting is complex and at times problematic Because the reporting of crime statistics impacts upon policymaking we need to better understand how these statistics are used and reported in order to improve the process of decision Finally Lugo Ocando maintains that the only way to create a fairer justice system and a better informed general public is by improving the way crime is covered in the news A compelling and informed text this book will be of interest to scholars and students of criminology and journalism alike
