success rates in middle school many schools and districts have implemented summer math programs designed to improve student preparation for algebra content in grade 8 However little is known about the effectiveness of these programs While students who participate typically experience learning gains there is little rigorous evidence evaluating the effects of the programs on math achievement or readiness for algebra content This study fills that void by rigorously examining the effects of one such summer program the Elevate summer math program on student achievement In summer 2014 the Silicon Valley Education Foundation SVEF the research team and several Silicon Valley school districts collaborated on a randomized controlled trial to assess the effects of the Elevate Math summer program on math achievement algebra readiness and attitudes toward math The study focused on three primary questions 1 What is the impact of the Elevate Math summer program on the math achievement and algebra readiness of rising grade 8 students 2 What is the impact of the Elevate Math summer program on math achievement in the math topic areas most closely aligned with the program s curriculum and 3 What is the impact of the Elevate Math summer program on the math interest and math self efficacy of rising grade 8 students The randomized controlled trial was conducted in summer 2014 at eight schools in six districts in California s Silicon Valley Participating districts identified eligible students based on existing grade 6 California Standards Test CST data The districts enrollments range from 2 487 to 13 162 with an average of 9 426 The percentage of English learner students in each district ranges from 19% to 53% with an average of 38% Students were randomly assigned to a treatment group that received access to the program at the beginning of the summer or to a control group that received access to the program later in the summer Math achievement was measured using the Mathematics Diagnostic Testing Project MDTP Algebra Readiness test which was administered to the treatment and control groups on the first and last days of their participation in the summer program The Elevate Math summer program significantly improved math achievement and algebra readiness among participating grade 7 students The program improved the math achievement of the treatment group compared with

the control group across several metrics The Elevate Math summer program also had a positive statistically significant effect on algebra readiness Despite the Elevate Math summer program s effects students math achievement at the end of the program suggested that many students were still not ready for the algebra content in grade 8 math courses There were no significant impacts on math interest or math self efficacy The estimated level of interest in math for the treatment group was higher than that of the control group but the difference was not statistically significant The Silicon Valley Education Foundation and several Silicon Valley school districts collaborated on this study For the Regional Educational Laboratory West report **The Effects of the Elevate Math Summer Program on Math Achievement and Algebra Readiness REL 2015 096** 2015 see ED558157 Summer Success, Grades 5-6 School Specialty Publishing, Carson-Dellosa Publishing, 2003-04-01 During the summer months between grades this series helps children bridge the learning gap by offering activities that review reinforce and extend the important skills they need for the coming year Full color Key to Success, Level 1 Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2006 **The Effects of the Elevate Math Summer Program on Math Achievement and Algebra Readiness. REL 2015-096** Jason Snipes, Chun-Wei Huang, Karina Jaquet, Neal Finkelstein, 2015 The Effects of the Elevate Math summer program on math achievement and algebra readiness This randomized trial examined the effects of the Elevate Math summer program on math achievement and algebra readiness as well as math interest and self efficacy among rising 8th grade students in California s Silicon Valley The Elevate Math summer math program targets students who score in the range between high basic and low proficient on state math tests It consists of 19 days of mathematics instruction consisting of three hours per day in traditional classroom instruction and one hour per day using Khan Academy a free online learning system During summer 2014 students were randomly assigned to a treatment group that received access to the program at the beginning of the summer or to a control group that received access to the program later in the summer End of program test scores and survey responses of students in the treatment group were compared with those of students in the control group prior to their exposure to the program Treatment group students scored significantly higher than the control group 4 points or 0.7 standard deviation on a test of algebra readiness They were also significantly more likely 29 percent versus 12 percent to reach achievement thresholds associated with success in algebra I However treatment and control groups did not show significant differences in terms of math interest or self efficacy The results show that the Elevate Math summer program can significantly improve student math achievement and algebra readiness however 70 percent of program participants were still not ready for algebra I content This suggests that summer math programs such as Elevate Math s may be important tools for improving math achievement among rising eighth grade students but most targeted students will need additional support in order to ensure success in algebra The following are appended 1 Data outcomes and methodology and 2 Sensitivity analyses **Summertime Learning Grd 6** Teacher Created Resources, Inc, 2011-03 Here s the question parents ask at the end of every school year How can we help
