## **Sunset Lives British Retirement Migration To The Mediterranean:**

*Sunset Lives* Russell King, 2000 An analysis of the phenomenon of international retirement migration this traces the story of the migrants from their old to their new homes and examines the conceptual and policy contexts of this relatively new form of transnational mobility

*Retirement Migration and Precarity in Later Life* Marion Repetti, Toni Calasanti, 2025-01-21 The last few decades have seen an increase in the migration of ageing people from richer Northern and Western countries to poorer Southern and Eastern countries This book seeks to understand the motivation behind retirement migration and how precarity in later life contributes to this trend Drawing on accounts of retirees from different nations the book examines how welfare policies in their home country and their country of migration interact to shape their experiences of migration It shows how ageism impacts social precarity across different social classes and across economic social and health dimensions It also evaluates how local and global systems of inequalities influence retirement migrants experience providing both opportunities and constraints that differ across countries

*Retirement Migration* Caroline Oliver, 2012-08-06 The book is the first ethnographic study of international retirement migration and offers a sometimes surprising picture of the potentials seductions and limitations of the lifestyles People envision retirement as freedom from responsibilities through shedding the restrictive shackles of their former selves in a time of life dedicated to fun friendship healthy activity and individual fulfillment However as Oliver documents a number of contradictions underpin the pursuits of such a lifestyle She shows how retirees must balance time use to achieve both freedoms and busy social schedules their activities their relationships and their cultural identities to balance both the security of nationality with the discovery of the new Retirement Migration gives a critical insight into the new ways aging identities are experienced by a growing number of older people in Western societies today

*Europe after Empire* Elizabeth Buettner, 2016-03-24 Europe after Empire is a pioneering comparative history of European decolonization from the formal ending of empires to the postcolonial European present Elizabeth Buettner charts the long term development of post war decolonization processes as well as the histories of inward and return migration from former empires which followed She shows that not only were former colonies remade as a result of the path to decolonization so too was Western Europe with imperial traces scattered throughout popular and elite cultures consumer goods religious life political formations and ideological terrains People were also inwardly mobile including not simply Europeans returning home but Asians Africans West Indians and others who made their way to Europe to forge new lives The result is a Europe fundamentally transformed by multicultural diversity and cultural hybridity and by the destabilization of assumptions about race culture and the meanings of place and where imperial legacies and memories live on

**Debating Multiculturalism in the Nordic Welfare States** P. Kivisto, Ö. Wahlbeck, 2013-08-30 This collection addresses the ways that Nordic countries have approached the issue of bringing ethnic minorities into the societal mainstream With multicultural incorporation as an option the authors explore the potential impact of the politics of identity in societies with social democratic welfare states

committed to redistributive politics      Ageing, Diversity and Equality Sue Westwood, 2018-10-31 Current understandings of ageing and diversity are impoverished in three main ways Firstly with regards to thinking about what inequalities operate in later life there has been an excessive preoccupation with economic resources On the other hand less attention has been paid to cultural norms and values other resources wider social processes political participation and community engagement Secondly in terms of thinking about the who of inequality this has so far been limited to a very narrow range of minority populations Finally when considering the how of inequality social gerontology's theoretical analyses remain under developed The overall effect of these issues is that social gerontology remains deeply embedded in normative assumptions which serve to exclude a wide range of older people Ageing Diversity and Equality aims to challenge and provoke the above described normativity and offer an alternative approach which highlights the heterogeneity and diversity of ageing associated inequalities and their intersections The Open Access version of this book available at <https://www.taylorfrancis.com/books/9781351851329> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 licence

Transnational Aging Vincent Horn, Cornelia Schweppe, 2015-09-16 This book focuses on the diverse interrelationships between aging and transnationality It argues that the lives of older people are increasingly entangled in transnational contexts on the social as well as the cultural economic and political levels Within these contexts older people both actively contribute to and are affected by border crossing processes In addition while some may voluntarily opt for adding a transnational dimension to their lives others may have less choice in the matter Transnational aging therefore provides a critical lens on how older people shape organize and cope with life in contexts that are no longer bound to the frame of a single nation state Accordingly the book emphasizes the agency of older people as well as the personal and structural constraints of their situations The chapters in this book reveal these aspects by approaching transnational aging from different methodological angles such as ethnographic research comparative studies quantitative data and policy and discourse analysis Geographically the chapters cover a wide range of countries in Africa Asia Europe North and South America such as Namibia Thailand Russia Germany the United States and Ecuador      **Immigration, Integration and Mobility** Adrian Favell, 2015-05-08 A compilation of Adrian Favell's innovative and agenda setting essays which since the late 1990s have charted the emergence of new migration patterns and politics in Europe Tackling in turn issues of multiculturalism immigrant integration free movement high skilled mobilities new East West migrations and regional integration the collection offers a comprehensive introduction to the dynamic field of international migration studies At the same time it poses a sharp challenge to current complacencies challenging researchers to escape methodological nationalism and the unreflective reproduction of concepts and assumptions in the field as well as embracing new methodologies and theoretical resources Moving fluidly across intellectual boundaries as much as national borders Favell points the way forward to new thinking in this burgeoning and rapidly evolving interdisciplinary field      *Mobile Europe* Ettore Recchi, 2015-03-09

With a particular focus on their integration paths political participation and identifications this book draws on large cross national surveys of this specific population carried out between 2004 and 2012 as well as in depth interviews and aggregate statistical data from a plethora of sources Intra-European Student Mobility in International Higher Education Circuits Christof Van Mol, 2014-08-19 Adopting an interdisciplinary approach this book empirically investigates the im mobility decisions social network formation sense of European identity and migratory aspirations of higher education students It draws on a large scale survey in depth interviews and focus groups conducted in Austria Belgium Italy Norway Poland and the UK *Selected Studies in International Migration and Immigrant Incorporation* Marco Martiniello, Jan Rath, 2010 The editors have selected from both the grounding classics and the best new work to show how migration is transforming the rich democracies Professor John Mollenkopf The City University of New York **International Handbook of Rural Demography** László J. Kulcsár, Katherine J. Curtis, 2011-12-15 This is the third in an essential series of Springer handbooks that explore key aspects of the nexus between demography and social science With an inclusive international perspective and founded on the principles of social demography this handbook shows how the rural population which recently dropped below 50 per cent of the world total remains a vital segment of society living in proximity to much needed developmental and amenity resources The rich diversity of rural areas shapes the capacity of resident communities to address far reaching social environmental and economic challenges Some will survive become sustainable and even thrive while others will suffer rapid depopulation This handbook demonstrates how these future development trajectories will vary according to local characteristics including but not limited to population composition The growing complexity of rural society is in part a product of significant international variations in population trends making this comparative and comprehensive study of rural demography all the more relevant Collating the latest research on international rural demography the handbook will be an invaluable aid to policy makers as they try to understand how demographic dynamics depend on the economic social and environmental characteristics of rural areas It will also aid researchers assessing the unique factors at play in the rural context and endeavoring to produce meaningful results that will advance policy and scholarship Finally the handbook is an ideal text for graduate students in a spread of disciplines from sociology to international development Ageing and Diversity Daatland, Svein Olav, Biggs, Simon, 2006-04-05 Assessing the stereotyped conceptions of ageing this book explores the diversity of individual pathways of ageing the sources of identifications migration and otherness and the tension between social structures and personal agency It is aimed at academics students and practitioners in the fields of sociology social psychology and welfare **English-Speaking Caribbean Immigrants** Lear Matthews, 2013-10-30 This book highlights important but insufficiently documented dimensions of the experience of English speaking Caribbean immigrants in the United States It focuses on successes and challenges of what might be perceived as living in two worlds The central theme post migration transnational connections is informed by new research on the topic The thrust of the book is on trends

practices and policies pertaining to transnational issues and it uses both academic and applied approaches in its research Having examined contemporary adjustment concerns of Caribbean immigrants the authors present research findings critical analyses and suggest possible solutions to social and psychological problems immigrants confront as their life space is influenced by both places of origin and destination This book fills a void in the literature pertaining to the emerging transnational experiences of Anglophone Caribbean immigrants that has not been fully explored **Handbook of Globalisation and Tourism** Dallen J. Timothy, 2019-12-27 Globalization entails the world becoming a smaller place through political socio cultural and economic processes These processes have salient implications for tourism and tourism itself is one of the driving forces behind globalization This book is a collection of conceptual treatises by international scholars about the dynamics and reach of globalization and its relationships with tourism It anatomizes and deconstructs the global forces processes and challenges that face the world of tourism It is international in scope encyclopedic in its conceptual depth empirically evocative and contemporary in its coverage *Aging and the Digital Life Course* David Prendergast, Chiara Garattini, 2017-06 Across the life course new forms of community ways of keeping in contact and practices for engaging in work healthcare retail learning and leisure are evolving rapidly This book examines how developments in smart phones the Internet cloud computing and online social networking are redefining experiences and expectations around growing older in the twenty first century Drawing on contributions from leading commentators and researchers across the world this book explores key themes such as caregiving the use of social media robotics chronic disease and dementia management gaming migration and data inheritance to name a few *Migration, Risk and Uncertainty* Allan M. Williams, Vladimír Baláž, 2014-08-07 Migration is one of the driving forces of economic and social change in the modern world It is both informed by risk and a generator of risk whether for individuals households communities or societies Although the relationship between migration and risk is widely acknowledged it has long been neglected in academic research with a few exceptions such as household diversification strategies Instead risk is assumed to be implicit in economic or social models rather than being explicitly theorised or analysed This book represents the first major review of these key relationships It draws on a wide range of theories from economics psychology sociology anthropology and geography and an equally broad range of empirical material to provide a highly original overview **Tourism Enclaves** Jarkko Saarinen, Sandra Wall-Reinius, 2021-04-12 Exclusively planned tourism destinations have increased substantially over the last decades As a result gated leisure communities all inclusive resorts private cruise liner owned island and other tourism enclaves are rather common features in tourism especially in the peripheries and low and middle income countries Tourism enclaves can have varied characteristics and scales of operations but typically they involve standardized non local themes or appeal in their design activities and economies Typically such tourism spaces contain all or a vast majority of facilities and services needed for tourists who have limited possibilities or desires to leave the enclave At the same time the locals access to these spaces is

often limited or otherwise regulated Thus enclave tourism spaces are controlled and separated from surrounding communities Tourism Enclaves Geographies of Exclusive Spaces in Tourism focuses on tourism enclaves in different theoretical and geographical contexts The chapters of the book aim to contribute to our understanding of how these exclusive spaces are created and transformed and how they shape places and place identities The chapters in this book were originally published as a special issue of the journal Tourism Geographies

**Moving People and Knowledge** Louise Ackers, Bryony Gill, 2009-01-01 The book can be seen as a welcomed contribution to this field of study it raises some important questions and problems of scientific mobility H gni Kals Hansen Papers in Regional Science This is a very timely book looking at East West migration which has recently become a hot political issue in various West European countries It does an excellent job in laying out the intricacies of mobility that affect different groups particularly knowledge migrants The book successfully shows that knowledge migrants follow different motivational routes than other groups of migrants in their choice of mobility between institutes and nations It makes a valuable contribution to a growing body of research that seeks to change established thinking and rhetoric about migration and to shift it from a dualistic thinking of migration in terms of economic vs non economic migrants What this book shows is that the professional identity of people often supersedes their nationalities in relation to why and where they move Sami Mahroum NESTA UK Based on excellent empirical research on migrating scientists from Poland and Bulgaria to the UK and Germany this book follows an innovative agenda which is crucial to the world today the movement of people and the movement of knowledge It achieves this by a creative blend of analysing personal stories embedded in their professional and family networks on the one hand and macro scale discussions of brain drain brain gain and national and European policy implications on the other Russell King University of Sussex UK This book makes a timely contribution to understanding the circulation of scientific knowledge via international mobility It skillfully combines an analysis of structural and institutional changes with a focus on individual circumstances life courses and motivations The outcome is a compelling account of the role of international migration in the transfer of knowledge across borders and in shaping the careers of individual scientists This places people and human mobility at the heart of the debate about how the knowledge economy is produced and reproduced Allan Williams London Metropolitan University UK Moving People and Knowledge provides a fresh examination of the processes of highly skilled science migration Focusing on intra European mobility and in particular on the new dynamics of East West migration the authors investigate the movement of Polish and Bulgarian researchers to and from the UK and Germany Key questions include who is moving how long for and why In addressing the motivations and experiences of mobile scientists and their families insights into professional and personal motivations are provided demonstrating how relationships networks and infrastructures shape decision making This book provides a useful perspective on the implications of increasing researcher mobility for both sending and receiving regions and the individuals concerned which is necessary for the construction of future policies on sustainable scientific

development This empirical account provides a nuanced analysis of the duration and flow of scientific mobility showing the prevalence of repeat and shuttle moves in science careers It will be of particular interest to researchers in European social policy migration studies and EU law as well as policymakers in the field of highly skilled migration especially those working on the free movement of persons provisions and the European Research Area and European Area of Higher Education

*International Residential Mobilities* Josefina Dominguez-Mujica, Jennifer McGarrigle, Juan Manuel

Parreño-Castellano, 2021-10-04 This book assesses the drivers and impacts of new international residential mobilities by considering a range of mobilities in different countries across the globe from investment amenity and retirement mobilities to those of the new global middle class and the transnational elites It examines the intersection of these mobilities with the increase in the volume of global tourism the advent of the sharing economy and peer to peer platforms and the effects of transnational property investment The consequent transformations are considered in urban environments where tourism pressure coexists with gentrification increasing house prices and processes of social and ethnic segregation By offering a broad perspective based on different case studies the book portrays the contradictory consequences of international residential mobilities both favouring local opportunities for development and disrupting housing markets through the disassociation from local demand As a result this book is a great resource for academics and students in tourism urban and migration studies as well as policy makers and practitioners involved in urban planning social affairs and tourism management
